Description

Sea Eagle 473rl RazorLite™ Inflatable Kayak Pro and Pro Carbon Inflatable Kayak

Fast, easy, and fun to paddle! Click here to see our package deals Packages

The Worlds First All Drop Stitch Kayak!

Sea Eagle's patent pending RazorLite™ Kayak is a high performance ultra light kayak and the world's first and only inflatable kayak made entirely with Drop Stitch Technology throughout! This enables the RazorLite™ to be inflated to a much higher pressure (up to 12 psi) than other kayaks (3-4 psi) which increases overall rigidity.

Straight Hull Design

An important factor of speed and performance is design! A unique feature of the RazorLite™ Kayak is its straight hull design which provides the maximum straight hull waterline length which in turn translates into more speed and better performance!

Bow and Stern Molds

The RazorLite™ Kayak's rigid bow and stern molds create a razor sharp speed entry and exit system. The bow mold cuts through the water effortlessly at a high velocity. The water then meets the carefully designed Tapered Side Walls creating lift while reducing friction and drag, then exits just as fast as it entered at the stern mold leaving little to no wake behind.

Another First For Inflatable Kayaks!

achievement in inflatable kayak designs. Not only do you have a speed entry system that creates lift while reducing friction and drag but Sea Eagle now introduces the inflatable worlds first and only Double Concave entry and exit system. Allowing pockets of air to enter in between the hull and the water thus creating even more lift and reducing even more friction and drag!

High Pressure Drop Stitch Construction

A very important feature is the high pressure drop stitch construction. It provides rock solid rigidity to the whole structure of the kayak making it very responsive to paddle strokes. The drop stitch construction makes this kayak super rigid, ultra light, and extremely fast!

The Sea Eagle RazorLite™ Kayak can be paddled for many miles and many hours with minimal effort. It will go straight in whatever direction you want and it will hold a course no matter at what angle you are paddling in relation to the wind.

This new design is truly a breakthrough in the evolution of inflatable kayaks!

Plus... A THREE YEAR WARRANTY

Our Sea Eagle boats are covered for a full three years against manufacturer's defects ... from bow to stern.

We can afford to offer this unprecedented two-part guarantee because of our 46 year experience in designing and selling inflatable boats. We know quality products, and we stand behind them.

Sea Eagle 473rl RazorLite™ Drop Stitch Kayak

front view Top View Side View

The world's first all Drop Stitch inflatable kayak! A lighter, narrower and faster to paddle, high performance solo kayak for the adventurer. With a tapered, hard-nose bow and stern, and fully constructed with Drop Stitch technology, the 473RL cuts through waves cleaner, straighter and sharper than any other kayak on the market allowing paddling speeds up to 6 mph.

Standard Features

NMMA Certified

Fully Constructed with Drop Stitch Technology

2 Self-bailing Drain Valves

Small Removable Rear Skeg

Front & Rear Spray Skirts with Carry Handles

6 D-Rings to Secure Seat and FootRest

3 One-Way Air Valves

Printed Instructions

473rl RazorLite™ Specifications

Exterior: 473 cm x 76 cm

Weight: 17.2 kg

Capacity: 2 Adults or 272 kg + Gear (68 kg) = 340 max
total kg

Interior: 452 cm x 56 cm

Tube Dimensions: 25.4 cm High x 10 cm Thick

Deflated: 84 cm x 56 cm x 25

Chambers: 3, Port, Starboard, Floor

Material: 1100 Decitex Reinforced

Seam: Overlap

Air Valves: 3 Recessed One Way

Inflation time: 8 Minutes

Sea Eagle 473rl RazorLite™ Pro Package

The incredible combination of performance, comfort and portability is what this Pro Package Offers! Includes: High Performance Design 393RL Kayak with removable rear skeg, AB40 four part performance paddle, Tall Back Seat with wrap around sides and contoured seat pad for long term comfort, adjustable foot rest to maximize paddling power efficiency and control, All Purpose Backpack for easy storage and transport, high pressure pump with inline pressure gauge, and repair kit.

*Package Contents*

Item		Value
	473rl RazorLite™ Drop Stitch Kayak Hull	\$1,399
	Two Tall Back Seats	\$198
	Two 8' AB40 Paddles	\$190
	Backpack (BLUE)	\$99
	Hand Piston pump	\$49
	Two Tube Footrests	\$24
	Repair Kit	\$15
	Slide in Swept Back Skeg	\$29
	Total Value: \$2,003	

Sea Eagle 473rl RazorLite™ Pro Carbon Package**Includes:***The 473rl Pro Carbon Package Contents*

The 473rl Key Features

The RazorLite™ Kayak's Straight Hull Design

An important and unique

feature of the RazorLite™ Kayak is its straight hull design which provides the maximum straight hull waterline length. This feature combined with the very narrow kayak width (25" at the waterline) allows the RazorLite™ to paddle as fast as any rigid kayak. The Bow and stern molds are made of durable plastic and cut through the wind, waves, current, and water like a sharp edge straight razor on a clean close shave. With superior length to width ratio, razor sharp bow entry, straight line planing surface and a precision razor sharp stern exit at the rear these inflatable kayaks are in a performance league of their own.

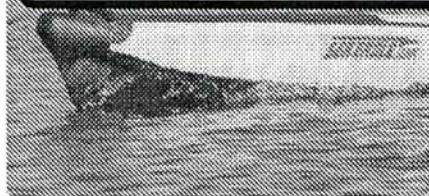

The RazorLite™ Kayak's rigid bow and stern molds create the worlds very first speed entry system that leads into a double concave and then opens into a flat planing surface. The double concave design at bow allows pockets of air to enter in between the hull and the water creating lift while reducing friction and drag. The double concave at stern creates a super clean exit. The Tapered Drop Stitch Side Walls provide a rigid chine at the waterline and secondary buoyancy and stability. These features combine to enable the RazorLite™ to

The RazorLite™ Kayak's Unique Bow and Stern Design with Tapered Side Walls

glide quickly and effortlessly through the water!

The RazorLite™ Kayak's rigid bow and stern molds create a razor sharp speed entry and exit system. The bow mold cuts through the water effortlessly at a high velocity. The water then meets the carefully designed Tapered Side Walls creating lift while reducing friction and drag, then exits just as fast as it entered at the stern mold leaving little to no wake behind.

The patent pending Sea Eagle RazorLite™ High Performance Ultra Light Kayak is the world's first and only inflatable kayak made entirely with Drop Stitch Technology throughout! This kayak uses 3" Drop Stitch material for the floor and 4" Drop Stitch material for the side walls. Our Drop Stitch material uses thousands of high tensile strength threads connecting the top and bottom fabric layers, creating thousands of I-beam supports. This enables the RazorLite™ to be inflated to a much higher pressure (10 psi) than other kayaks (3-4 psi) which increases overall rigidity. The unique Drop Stitch construction makes the RazorLite™ as fast as any rigid kayak in it's class and provides the added benefit of being able to pack in its own backpack. The RazorLite™ is as tough as nails, incredibly rigid, ultra light, and a delight to paddle.

The World's First and Only Kayak Made Entirely Of Drop Stitch Material
