Table of contents

- Foreword
- ▼ Introduction
 - ▶ 0.1 Purpose
 - ▶ 0.2 Overview of the algorithm
 - 0.3 Encoding
 - 0.4 Decoding
 - 0.5 Structure of the coded video bitstream
 - ▶ 0.6 Features supported by the algorithm
- ▼ Section 1 General
 - 1.1 Scope
 - 1.2 Normative references
- ▼ Section 2 Technical elements
 - 2.1 Definitions
 - ▶ 2.2 Symbols and abbreviations
 - 2.3 Method of describing bitstream
 - ▶ 2.4 Requirements
- Annex A 8by8 Inverse discrete cosine transform
- ▼ Annex B Variable length code tables
 - B.1 Macroblock addressing
 - B.2 Macroblock type
 - B.3 Macroblock pattern
 - B.4 Motion vectors
 - B.5 DCT coefficients
- ▼ Annex C Video buffering verifier
 - C.1 Video buffering verifier

Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work.

In the field of information technology, ISO and IEC have established a joint technical committee, ISO/IEC JTC 1. Draft International Standards adopted by the joint technical committee are circulated to national bodies for voting. Publication as an International Standard requires approval by at least 75 % of the national bodies casting a vote.

International Standard [ISO/IEC 11172-2](#) was prepared by Joint Technical Committee ISO/IEC JTC 1, *Information technology*, Sub-Committee SC 29, *Coded representation of audio, picture, multimedia and hypermedia information*.

[ISO/IEC 11172](#) consists of the following parts, under the general title *Information technology — Coding of moving pictures and associated audio for digital storage media at up to about 1,5 Mbit/s*:

— *Part 1: Systems*

— *Part 2: Video*

— *Part 3: Audio*

— *Part 4: Compliance testing*
