Subject: Re: u alive?

I think this looks good. We may make some final changes (like 7.11.2 instead of 7.11). I'm still waiting for eng to review, but send the full doc now. I don't expect changes.

Just checking in.. Here is the basic language on the exhibit, once we close on this we are done. Call me to discuss and we can review.

Phase I

Microsoft and Company will provide the capability to allow Silverlight 1.0 and 2 to control the move plug-in via the use of a JavaScript bridge documented in the Silverlight SDK. [REDACTED]

Requirements

Basic player control functionality must be enabled such as Play, Pause, Stop, Start, FFW, RW. Via javascript from Silverlight to Move.

Microsoft and Company will also provide ability to access the both plug-ins via JavaScript that is consistent with the Silverlight 1.0 and 2 SDK and Move SDK's accordingly.

Phase II

Microsoft and Company will work closely to integrate and install Silverlight with all new and existing installations.

Microsoft will deliver the following API's

<Microsoft API's>

In this version of the Move/Silverlight, Move technology renders the Silverlight

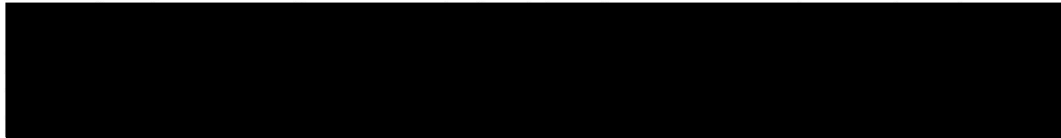

PUBLIC VERSION

overlay in conjunction with Move video with positioning, transparency and other graphic control variables similar to the Move/Flash implementation (see Flash Overlay documentation).

The tools adapted to work with Silverlight are included in the Move JSDK. The Move JSDK will provide the following API's to allow communication with Silverlight hosting API's.

<Insert Move API's here>

Phase III -
