A close second to that post run/workout high is the good mood that ensues when you wake up and realize it's going to be a good hair day. But if you can't relate because maybe it's been that long since you experienced one, it might be time to switch up your hair care routine.

Similar to how there are different skin products that cater to different skin types (oily, dry, etc.), there are hair products for every texture across the board. The key is making sure you're using the right one for your strands, which will in turn give you the hair of your dreams.

So, where to begin? Right here! For our third annual Healthy Hair Awards we've divided the winners by hair type so you can B-line it for whichever category your strands fit into best to find the shampoos, stylers, tools, and accessories that will make your hair the best version of itself.

Each winner was hand selected by our panel of hair experts (meet them below) alongside the *WH* beauty team, and are their all-time favorites for the category. Ahead, find out which products made the cut and get ready to achieve your strongest, healthiest, (and best-looking) hair ever.

"This is great for textured hair folks who enjoy wearing their hair natural and want to stretch out wash days without the white powder and dry feeling most dry shampoos leave. It's perfect for wavy, curly, and kinky curly hair for a quick and easy waterless shampoo. Because it's foam rather than a dry spray or paste, it leaves curls much more hydrated than typical dry shampoos, and it also assists in detangling. It's weightless enough for even the finest of hair, but works for all hair densities. Straight-haired people and aerosol dry shampoo addicts won't like this product as much, but if traditional dry shampoo has never worked for you, give this foam a try." —*Sabrina Yamani Yamga*
