Feel the difference

Coanda styling pioneered by Dyson.

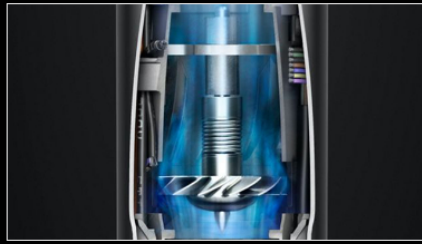

Re-engineered attachments with Enhanced Coanda airflow for increased control.

Intelligent heat control

Measures airflow temperature over 40 times a second, intelligently controlling the heating element to keep the temperature under 302°F. Preventing extreme heat damage.

Powered by the Dyson digital motor V9

The 13-blade impeller spins at up to 110,000rpm, generating 3.2kPa. Powerful enough to produce the air pressure needed to create the Coanda effect.

Refined usability

The multi-functional Coanda smoothing dryer has been re-engineered to harness Coanda in both directions to achieve a sleek and smooth finish. All barrels now allow you to easily switch curl direction as you style.

Hide flyaways¹

The Coanda smoothing dryer combines two functions into one tool for streamlined styling. Pre-dry hair, and also finish by dramatically reducing flyaways to create smooth, sleek finish.

Styled by you

Utilise airflow in both directions with one barrel for ease and speed. Choose from a range of barrel sizes to create loose waves, voluminous curls or tight ringlets.

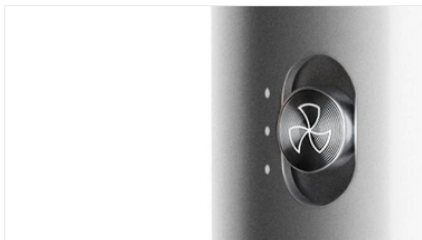

Quick and easy blow-dries

Enhanced Coanda gives increased styling control with every brush stroke.² Achieve volume from the roots, shape the hair and align each strand to create a smooth finish.

Key controls

Select the best airflow speed and heat settings for your hair type and style.

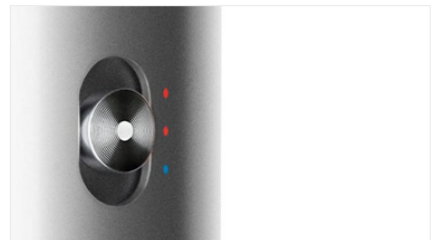

Airflow speed

Three precise airflow speeds to suit your styling.

Cold shot

Immediately deactivates the heating element for cooler air to set your style.

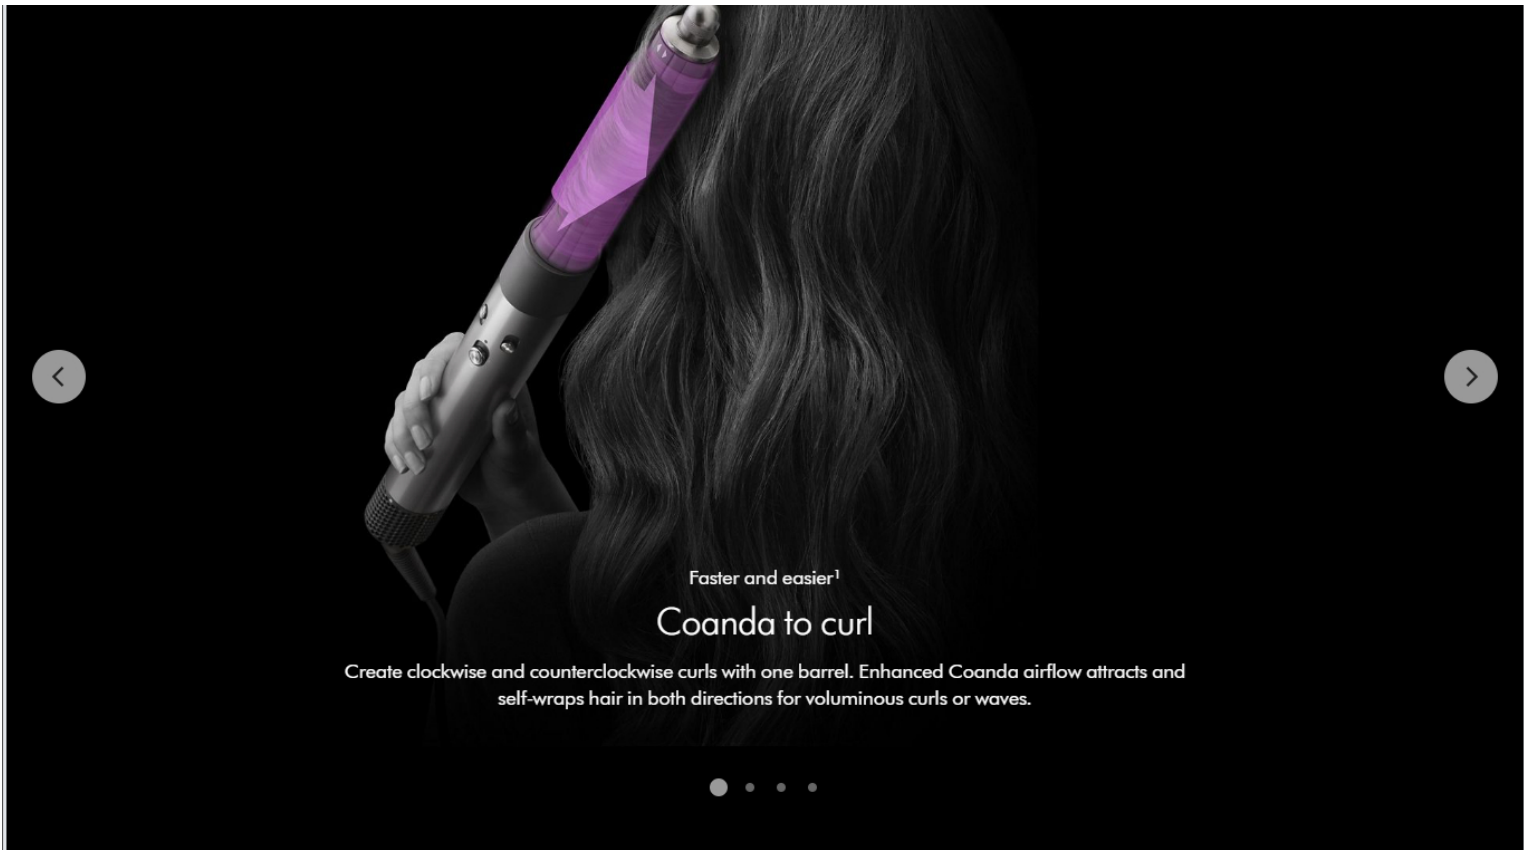

Temperature control

Three precise heat settings.

Specifications

1:35

Faster and easier¹

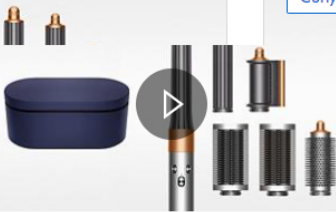

Coanda to curl

Create clockwise and counterclockwise curls with one barrel. Enhanced Coanda airflow attracts and self-wraps hair in both directions for voluminous curls or waves.
