Needs some better sports tracking. But Apneu detection is pretty impressive

Very, very nice ring. Fits perfect and hardly noticable that you wear it. Incredible that all this technology including battery and Bluetooth antenna fits in this small ring. 12 days of battery life is perfect. I think measurements are done better than with a smartwatch, as the sensors are always positioned perfect in respect to skin etc. Sleep data seems very accurate as well as all sensor data. The first week I noticed a few scratches, but they vanished by themselves some how. Showering is no problem, you can wear it 24/7 if you want. Really love the ring, as it is also a very nice peace to see.
