Precise parameter manipulation tasks typically require adjustment of the scale of manipulation in addition to the parameter itself. We introduces the notion of Zoom Sliding (Zliding) for fluid integrated manipulation of scale via pressure input while parameter manipulation within that scale is achieved via x-y cursor movement. We also present the Zlider, a widget that instatiates the Zliding concept.

Yes! That is the way to go! Using a pen as an Interface is so elegant and natural. Then just add your fingers to this kind of app and you have the perfect 3d manipulating tool!

@vagos090 15 years ago

Nice work
