Mechanical Science & Engineering Article Databases

- ASME Digital Library

Provides abstracts and full-text access to regularly published journals, conference proceedings, and e-books from The American Society of Mechanical Engineers.

- ASTM Digital Library

The Library covers a broad range of engineering disciplines, including aerospace, biomedical, chemical, civil, environmental, geological, health and safety, industrial, materials science, mechanical, nuclear, petroleum, soil science, and solar engineering.

- CINDAS Aerospace Structural Metals Database (ASMD)

The Aerospace Structural Metals Database (ASMD) contains approximately 80,000 data curves on over 200 alloys used in the aerospace and other industries.

- ENGnetBASE

A collection of best-selling engineering handbooks and reference titles. Includes access to sub-collections:

CivilENGINEERINGnetBASE,

ElectricalENGINEERINGnetBASE,

GeneralENGINEERINGnetBASE,

IndustrialENGINEERINGnetBASE,

MechanicalENGINEERINGnetBASE,

MiningENGINEERINGnetBASE.

- SAE Digital Library

The SAE Digital Library is a repository of technical content for all forms of vehicle

technical content for all forms of vehicle

technology. All types of land, sea, air and space vehicles are covered by the literature.

The database contains full text technical

Subscription Standards & Technical Reports

Standards are rules, techniques, and conditions for engineering design, industrial practices, units of measurement, terminology, etc. Standards can be mandatory or voluntary. Think of standards as rules for uniformity, size, quality, performance, shape, definition and testing methodology of manufactured products.

University of Illinois at Urbana-Champaign students can access standards purchased by the library through a few online outlets. Print standards can be found on the west wing on the second floor of the Grainger Engineering Library. See Grainger Engineering Library's page on [Standards and Technical Reports](#) for more information, or contact a reference librarian for assistance.

- **ANSI Standards**
Print only; no online access. Located at the Grainger Engineering Library. Please ask the Reference Desk if you need assistance locating an ANSI standard.
- **[ASTM Standards](#)**
Provides online access to ASTM standards purchased by the University Library.
- **[IEEE Standards](#)**
Standards from IEEE and their affiliates.
- **[SAE Standards](#)**
SAE standards are only available in print and microfiche; no online access. They are located at the Grainger Engineering Library. Please ask the Reference Desk if you need help locating an SAE standard. SAE often

[Engineering](#)

Includes information about materials and structures that can impact information about their environment to an observer or monitoring device.

- Fuel Cell Technology Handbook

Technical and commercial aspects of high and low temperature fuel cells, fuel cell systems, fuel cell catalysis, and fuel generation.

- Handbook of Lubrication and Tribology: Application and Maintenance

Provides facts, figures, and equations as well as the latest technology related to application and maintenance procedures.

- Handbook of Mechanical Engineering Calculations

Compendium of calculation methods.

- Handbook of Micro/Nano Tribology

Basic information, as well as design, construction, and applications to magnetic storage devices and MEMS.

- Harris' Shock and Vibration Handbook

Includes theory, measurement, testing, design, and control methodologies, and practical applications.

- Marks' Standard Handbook for Mechanical Engineers

Intended to help solve analytical, design, and application-related mechanical engineering problems.

- Mechanical Design Engineering Handbook

Covers areas of bearings, shafts, gears, seals, belts and chains, clutches and brakes, springs, fasteners, pneumatics and

springs, fasteners, pneumatics and

hydraulics, amongst other core mechanical elements, and principles, data, and calculations.

- Mechanical Systems Design Handbook

Focuses specifically on needs of designers and engineers in industrial settings, and provides a practical overview of basic issues associated with design and control of mechanical systems.

- MEMS Materials and Processes Handbook

Provides a comprehensive catalog of various MEMS processes, each with a brief introduction to the technology, as well as examples of common uses.

- Standard Handbook of Machine Design

Design handbook for mechanical engineers, product designers, project engineers, design engineers, and manufacturing engineers.

- Structural Alloys Handbook (SAH)

Information on selecting metals and alloys.
Produced by CINDAS.

Engineering E-Books by Publisher

- [Access Engineering](#)

Engineering reference tool for professionals, academics, and students that provides seamless access to the world's best-known, most-used collection of authoritative, regularly updated engineering reference information.

- [CHEMnetBASE](#)

Electronic versions of several CRC reference sources, including the Handbook of Chemistry and Physics.

- [ENGnetBASE](#)

Includes electronic versions of CRC Press engineering handbooks.

- [Grainger Engineering Library's Handbook Page](#)

A list of online handbooks available by subject area.

- [Springer Materials The Landolt-Bornstein Database](#)

A systematic and comprehensive evaluation of selected and critically evaluated data in all areas of physical sciences & engineering.

Dissertations & Theses

As part of the requirements for graduate level degrees, students must complete a thesis for a Master's degree and/or dissertation for a Ph.D. Dissertations and theses are submitted to the academic department and the Graduate College and are made available through the University Library. Since 2010, all theses and dissertations are electronically deposited into IDEALS, the Illinois Digital Environment for Access to Learning and Scholarship, the University's open repository of scholarly content.

ProQuest Dissertations is a comprehensive collection of citations to dissertations and theses worldwide from 1861 to the present day. Full text PDFs are available for many Ph.D. dissertations added since 1997 and some older graduate works.

- [IDEALS \(UIUC Institutional Repository\)](#).
Digital copies of theses, data sets, and publications by University of Illinois at Urbana-Champaign faculty and students.
- [ProQuest Dissertations and Theses](#)
PDF copies of dissertations and theses from U.S. universities.

Dissertations & Theses Search Interface](#)

Print Dissertations & Theses

Prior to 2010, print format dissertations and theses were bound and cataloged separately for the Grainger Engineering Library. Prior to 1983, each thesis was shelved by a call number assigned by subject headings. To locate them, search the online catalog for the author's last name, title word(s) if known, and "theses" and the year granted as subject term(s).

Mechanical Science and Engineering dissertations and theses granted from 1985 to 1999 were assigned Q.629.1Ta, followed by the 2-number year, followed by starting letters from the author's last name. (Example: A 1991 thesis by M. Doyle would be Q.629.1Ta91D). Dissertations and theses granted from 2000 to present were assigned Q.629.1Tb, followed by the 2-number year, followed by starting letters from the author's last name. (Example: A 2006 thesis by H. Dewey would be Q.629.1Tb06De).
