UNITED STATES DISTRICT COURT
SOUTHERN DISTRICT OF CALIFORNIA

SMITH INTERFACE TECHNOLOGIES, LLC,

Plaintiff,

v.

APPLE INC.,

Defendant.

Case No. 3:23-cv-1187-TWR-BJC

JOINT CLAIM CONSTRUCTION CHART, WORKSHEET, AND HEARING STATEMENT PURSUANT TO PATENT L.R. 4.2

Pursuant to this Court's Case Management Order Regulating Discovery and Other Pretrial Proceedings in a Patent Case (ECF No. 102) and Patent L.R. 4.2, Plaintiff Smith Interface Technologies, LLC ("Smith Interface") and Defendant Apple Inc. ("Apple") hereby file this Joint Claim Construction Chart, Worksheet, and Hearing Statement regarding the constructions of identified claim terms in U.S. Patent Nos. 10,642,413 (the "'413 Patent"); 10,649,578 (the "'578 Patent"); 10,649,580 (the "'580 Patent"); 10,656,754 (the "'754 Patent"); 10,656,755 (the "'755 Patent"); 10,656,758 (the "'758 Patent"); 10,671,212 (the "'212 Patent"); 10,725,581 (the "'581 Patent"); 10,936,114 (the "'114 Patent"); and 11,740,727 (the "'727 Patent") (collectively, the "Asserted Patents").

I. PARTIES' JOINT PRELIMINARY STATEMENT

The Parties would like to notify the Court that they have agreed to file an Amended Joint Claim Construction Chart, Worksheet, and Hearing Statement given that Smith Interface's October 18, 2024 "claim election of no more than 20 claim per patent and no more than 64 total claims" and November 28, 2024 "claim election of no more than ten claims per Asserted Patent and no more than 32 claims in total two weeks prior to claim construction hearing" (ECF No. 91) is expected to streamline and decrease the number of claim terms.

II. IDENTIFICATION OF MOST SIGNIFICANT TERMS

Pursuant to Patent L.R. 4.2(a), Smith Interface and Apple identify the following 10 terms as most significant to the resolution of the case (in no particular order):

1. "a reduction in a size [that is/so as to be] inversely related to the duration of the gesture" ('114 Patent, claims 27, 30, and 32);
2. "performing a [first/second/third] operation" ('413 Patent, claims 1 and 101) / "performing an operation [in connection with / on] the first application icon" ('758 Patent, claims 1 and 124) / "perform an operation" ('212 Patent, claims 1 and 16);

3. "adjacent" ('413 Patent, claim 7; '212 Patent, claim 57; '754 Patent claims 29, 193, 205, 206, 208);
4. "substantially fills" ('413 Patent, claim 9);
5. "action-option- display criteria" ('758 Patent, claims 1 and 124);
6. "movement criteria" ('758 Patent, claims 1 and 124);
7. "action options" ('758 Patent, claims 1 and 124);
8. "evaluating the first single-finger touch input against at least one of a plurality of criteria, including evaluating a duration of the first single-finger touch input against at least one of: one or more application-launch criteria, one or more action-option-display criteria, or one or more operation criteria, and further including evaluating a movement of the first single-finger touch input against one or more movement criteria"('758 Patent, claims 1, 27);
9. "when . . . the duration of the first contact is determined to be greater than the second user- configurable predefined duration . . . and the end of the first contact is not detected" ('581 Patent, claim 1);
10. "distance magnitude [of the gesture]" ('727 Patent, claims 1, 2; '754 Patent, claims 27, 32, 38, 75, 76-79, 83, 85, 86, 186, 208, 211, 218, 221).

A. Smith Interface's Statement

In agreeing to the above terms as the ten most significant, Smith Interface does not agree with Apple that eight of those terms, none of which Apple identified in its IPRs as indefinite, are indefinite. Rather, Smith Interface only agrees that a finding of indefiniteness would be dispositive of claims including those terms. Further, Smith Interface does not agree that the two remaining terms for which Apple apparently believes a construction would lead to noninfringement would, in fact, lead to noninfringement.

Smith Interface objects to Apple's identification of "a reduction in a size [that is/so as to be] inversely related to the duration of the gesture" as limited to Claims

27, 30, and 32 of the '114 Patent. Apple failed to explain during the meet and confer process why the similar language of Claim 1 of the '114 Patent ("a reduction in a size such that the size is inversely related to the magnitude of the duration of the gesture") would not be subject to the same construction.

B. Apple's Statement

Apple's position is that the four "criteria" terms in claims 1 and 124 of the '758 Patent (i.e., "application-launch criteria," "action-option-display criteria," "operation criteria," and "movement criteria") and the two "action option" terms in claims 1 and 124 of the '758 Patent (i.e., "action options" and "action option objects") should each be treated and briefed, respectively, as a single term for each group. The claim construction issues to be briefed and decided amongst these terms in each respective grouping are virtually identical to each other. The parties met and conferred on this position, but could not reach agreement. Therefore, for purposes of the top 10 terms above, Apple has selected representative terms from both the "criteria" and "action option" groups, but intends to brief and seek a claim construction ruling on each of the "criteria" and "action option" group terms.

In response to Smith's statement above with respect to the "a reduction in a size [that is/so as to be] inversely related to the duration of the gesture" term, Apple did explain during the meet and confer process why this construction is limited to Claims 27, 30, and 32 of the '114 Patent but, regardless, this Hearing Statement is not the proper filing for substantive arguments about the merits and applicability of proposed claim constructions.

III. JOINT CLAIM CONSTRUCTION CHART

Pursuant to Patent L.R. 4.2(b), Smith Interface's and Apple's proposed construction of each disputed claim term, along with each party's identification of supporting evidence, is attached as Exhibit A. For each disputed claim term, phrase, or clause, Exhibit A further includes each party's identification of the impact of the proposed constructions on the merits of the case.

IV. JOINT CLAIM CONSTRUCTION WORKSHEET

Pursuant to Patent L.R. 4.2(c), attached as Exhibit B is the Joint Claim Construction Worksheet, which includes Smith Interface's and Apple's disputed and agreed upon constructions.

V. ANTICIPATED LENGTH OF CLAIM CONSTRUCTION HEARING

Pursuant to Patent L.R. 4.2(d)(1), Smith Interface and Apple anticipate the length of time necessary for the Claim Construction hearing is approximately four (4) hours, and respectfully propose that each side be allocated approximately equal amounts of time to present their positions. If the Court requests a technology tutorial, the parties will meet and confer on the technology tutorial and its estimated length at that time.

VI. WITNESSES FOR CLAIM CONSTRUCTION HEARING

Pursuant to Patent L.R. 4.2(d)(2), Smith Interface and Apple do not expect to present live testimony of witnesses at the Claim Construction Hearing. The parties respectfully propose that expert testimony be submitted via declaration along with the claim construction briefing. Given that Smith Interface is expected to narrow its elected claims to no more than 20 per patent and 64 total claims by October 18, 2024, which Smith Interface believes will render moot the need for the parties to brief and the Court to construe certain disputed claim terms, the parties have agreed to the following schedule for exchange of expert declarations:

- October 22, 2024 – Apple serves Declaration of Dr. Bajaj
- October 29, 2024 – Smith Interface serves Responsive Declaration of Dr. Mahon

The parties will also jointly seek a ten day extension of the claim construction discovery deadline (from October 29, 2024 to November 8, 2024) in order to allow for depositions of Dr. Bajaj and Dr. Mahon, if necessary.

VII. ORDER OF PRESENTATION

Pursuant to Patent L.R. 4.2(d)(3), Smith Interface and Apple anticipate

presenting the claim-construction issues term by term.

Smith Interface and Apple propose that, on terms for which Apple contends are indefinite and on which Apple bears the burden of persuasion, that Apple present first followed by Smith Interface, or at the Court's discretion.

For all other terms, Apple proposes that the parties alternate who presents first, or at the Court's discretion, and Smith Interface proposes that for these terms the party to speak first will be at the Court's discretion.

Dated: October 1, 2024

Respectfully submitted,

/s/ *Daniel Leventhal*

one other object, is blurred, when the magnitude, including the **distance magnitude**, of the gesture detected on the touch screen is detected to increase above the distance threshold. 218. The apparatus of claim 2, wherein the apparatus is configured such that: the at least part of the gesture on the touch screen is detected when a home screen for choosing among a plurality of applications is displayed, the home screen including the at least one other object; the gesture includes a swipe gesture; the at least part of the gesture on the touch screen is detected at an edge of the touch screen; when the magnitude, including a **distance**

the multitasking interface is displayed in at least one first virtual display layer that appears above a second virtual display layer including the at least portion of the at least one other object that is blurred, and the multitasking interface remains displayed after the completion of the gesture. 221. The apparatus of claim 219, wherein the apparatus is configured such that at least a portion of the home screen, including the at least portion of the at least one other object, is blurred, when the magnitude, including the **distance magnitude**, of the gesture detected on the touch screen is detected to increase above the distance threshold.
