Overview

This report covers the patent cases of the active judges in the Texas Eastern District Court as of April 2024 (the date of the most recent LegalMetric docket download for this court). Cases of inactive judges are not included.

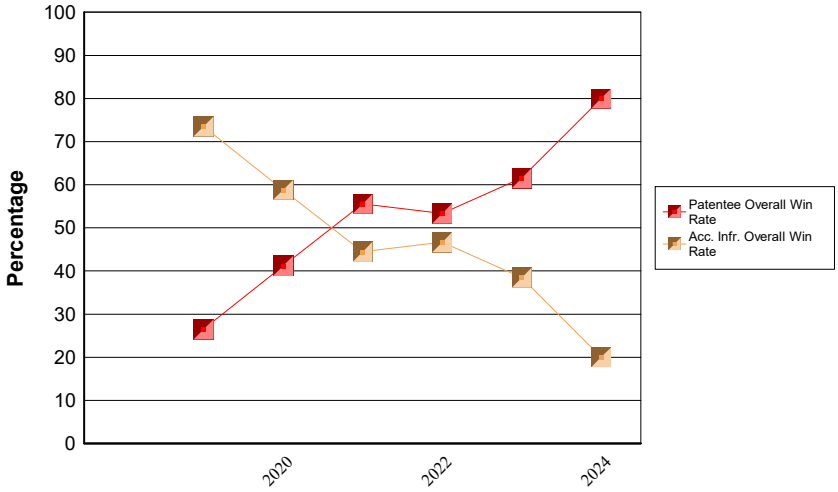

The number of cases, judgments, contested judgments, and trials for this court are shown below.

	Number
Total Cases	3026
Open Cases	727
Closed Cases	2299
Judgments	102
Contested Judgmnts	73
Trials	42
Bench	2
Jury	40

The overall win rate, contested win rate, and trial win rate for the patentee are shown to the right and the corresponding times to termination are shown below. Contested win rates do not include consent and default judgments.

	Months
All Cases	12.0
Judgments	25.1

Home Field Advantage?

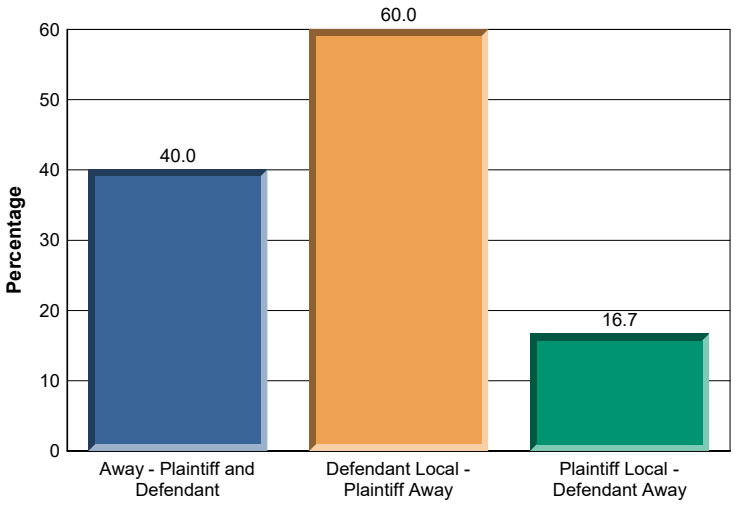

The plaintiff and defendant contested win rates in Texas Eastern District Court are shown below, broken out by party location:

> (Away - Plaintiff and Defendant (neither side located in the forum), Defendant Local - Plaintiff Away (only defendant located in the forum), Local - Plaintiff and Defendant (both sides located in the forum) and Plaintiff Local - Defendant Away (plaintiff local - defendant not).

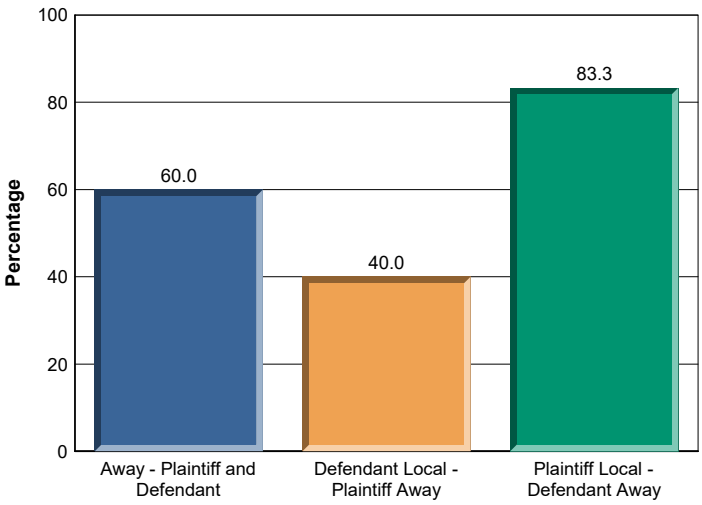

Not all courts fit the expected pattern of favoring local plaintiffs. Many courts in fact show a distinct preference for non-local plaintiffs.

The win rate charts are followed by a chart illustrating the fractions of contested judgment cases (cases in which a judgment is entered in favor of a party, but excluding consent and default judgments) for each category (all local plaintiffs, etc.). Many well-known patent venues tend to have a large segment of cases in the "Away - Plaintiff and Defendant" category.

What are the Odds: Termination by Judgment

The percentage of closed patent cases terminated by judgment are shown in the chart to the right. Terminations by judgments include terminations resulting from trials, from dispositive summary judgment motions, from involuntary dismissals, from consent judgments, and from default judgments.

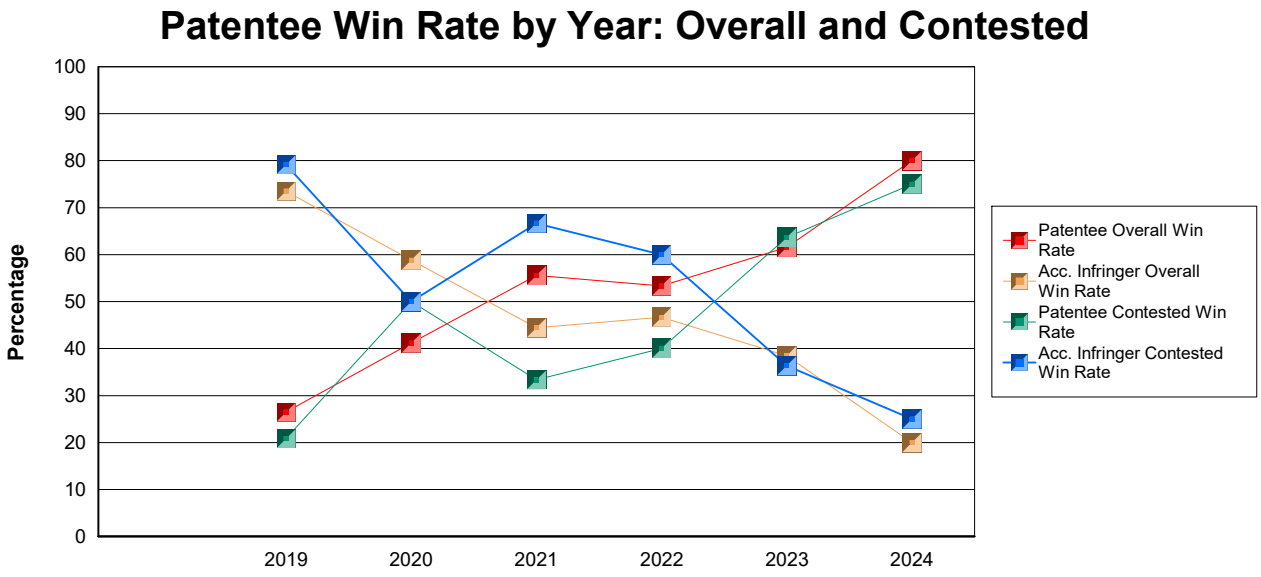

The number of judgments by each outcome, the overall patentee win rate, the contested patentee win rate, and the trial win rate for each outcome are shown below. Note that the overall win rate includes consent and default judgments, whereas the contested win rate does not include consent and default judgments. The figures given are for "patentees", rather than "plaintiffs". These figures take into account those declaratory judgment cases where the plaintiff is not the patentee.

	Number of Judgments	Overall Win Rate	Contested Win Rate	Trial Win Rate
Bench Trial	2	50.0	50.0	50.0
Consent Judgment	20	40.0		
Default Judgment	9	100.0

Win Rates by Year

The following chart shows the patentee overall win rate and contested win rate for the active judges in the Texas Eastern District Court by year. The overall patentee win rate should be compared with the nationwide overall win rate of 54.9%, and the contested patentee win rate should be compared with the nationwide patentee contested win rate of 21.4%. A chart with a considerable amount of "jitter" reflects relatively few data points. Note that the contested patentee win rates are usually much lower than the overall win rates since they exclude consent and default judgments.

The total number of terminations by judgment per year by the currently active judges during the same period in the Texas Eastern District Court is shown in the following chart:

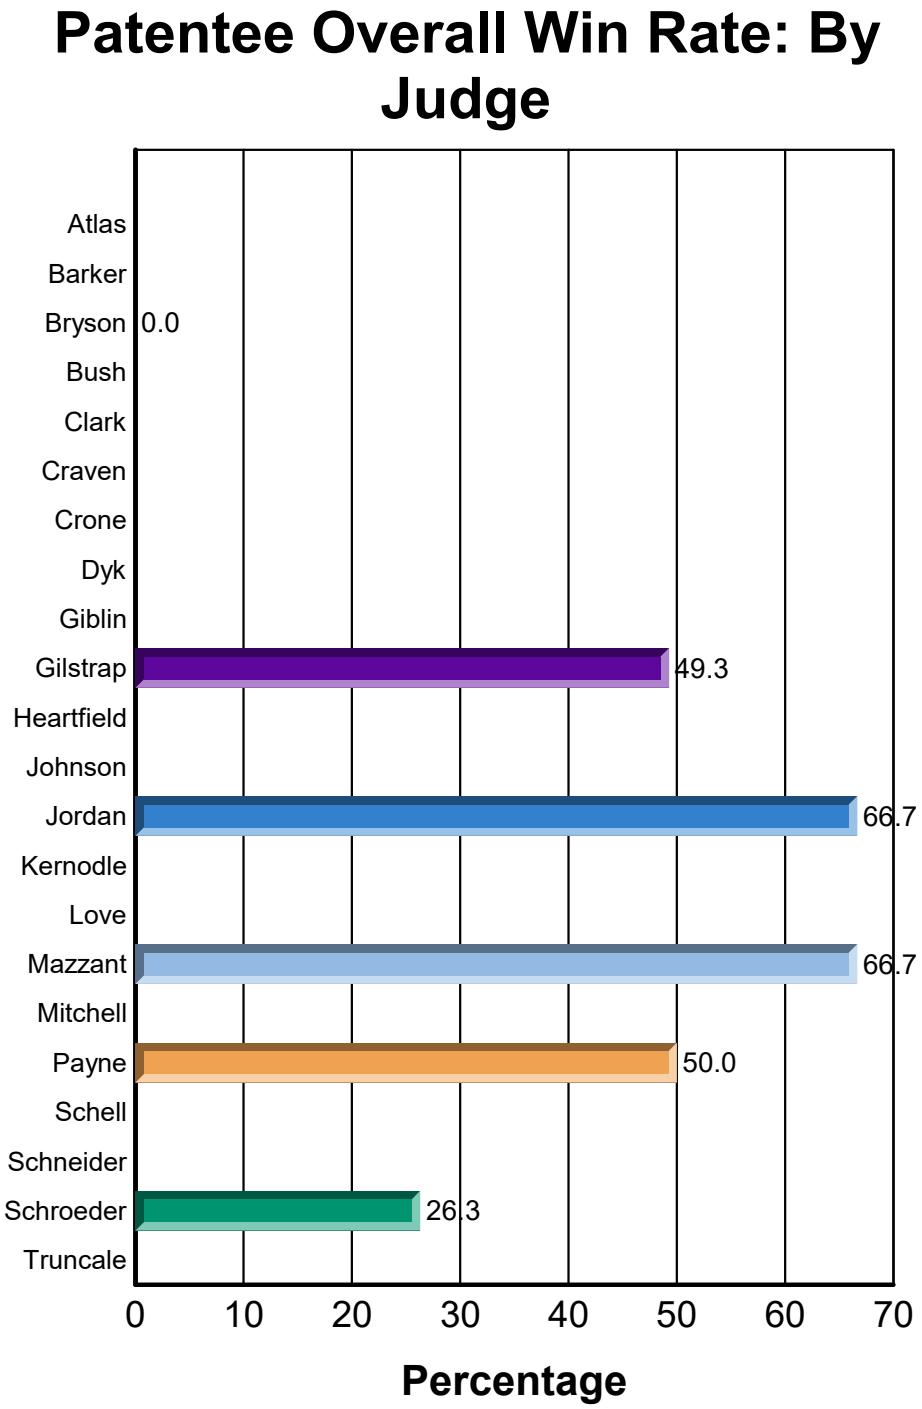

The actual number of judgments, number of patentee "wins", and the corresponding win rates are shown below. In this report, a judgment entered in favor of both the plaintiff and the defendant on their respective patent infringement claims is counted as "1/2" a win for each party. This could happen, for example, where the plaintiff files a patent infringement action, the defendant files a patent infringement counterclaim on its own patents, and both prevail on their respective claims.

	Patentee Wins	Total Decisions	Patentee Win Rate	Acc. Infr. Win Rate
2019	9	34	26	74
2020	7	17	41	59
2021	10	18	56	44
2022	8	15	53	47
2023	8	13	62	38
2024	4	5	80	20

Patentee Overall and Contested Win Rates: By Judge

The overall patentee win rate varies significantly from judge to judge over the period covered by this report. The chart below illustrates these win rates for these judges. The win rate for judges with no terminations by judgment is left blank.

The patentee contested win rate for these judges is shown below. Note that contested win rates do not include consent and default judgments. The win rate for judges with no contested judgments is left blank.

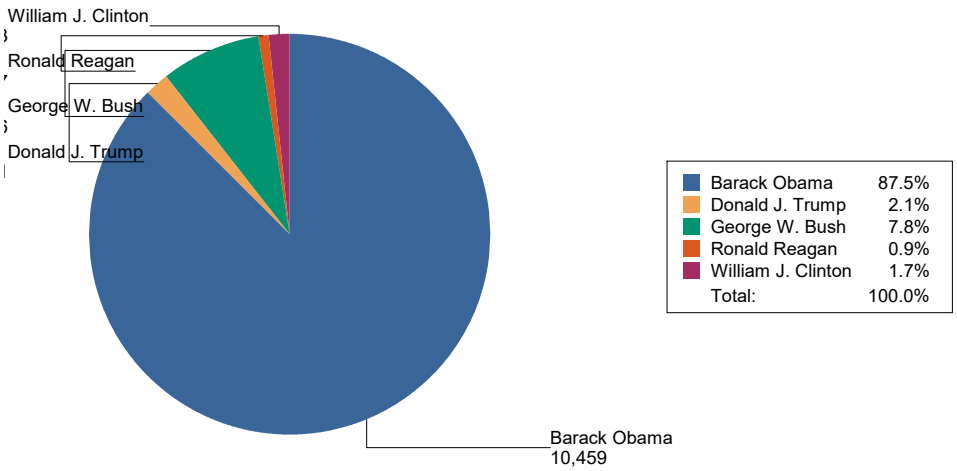

The table below includes the patentee overall and contested win rates for each active judge, along with the number of terminations by judgment and by contested judgment by that judge in patent cases during the period covered by this report. Judges with no judgments are not included.

The average time from case filing to termination for all closed cases by year, for all cases terminated by judgment, for all cases terminated by contested judgment, and for all cases terminated by trial covered by this report are shown below.

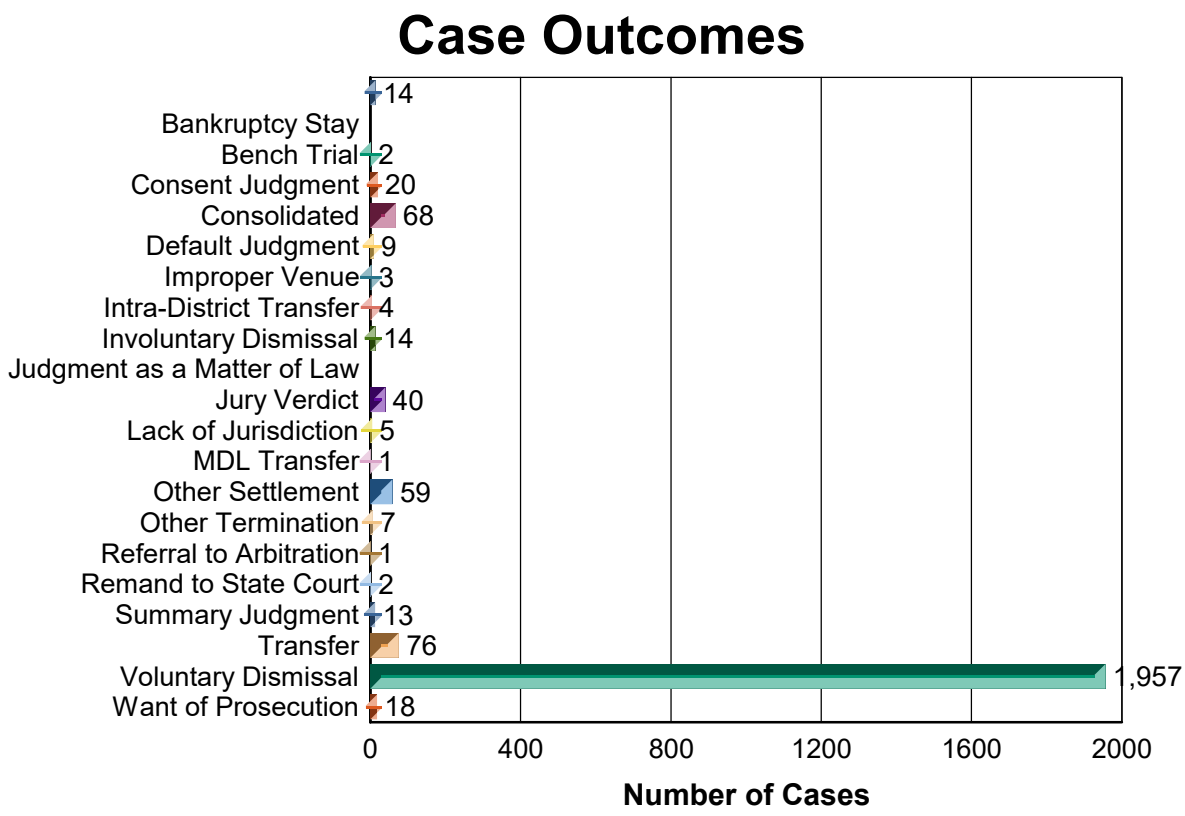

Time to Contested Judgment: By Judge

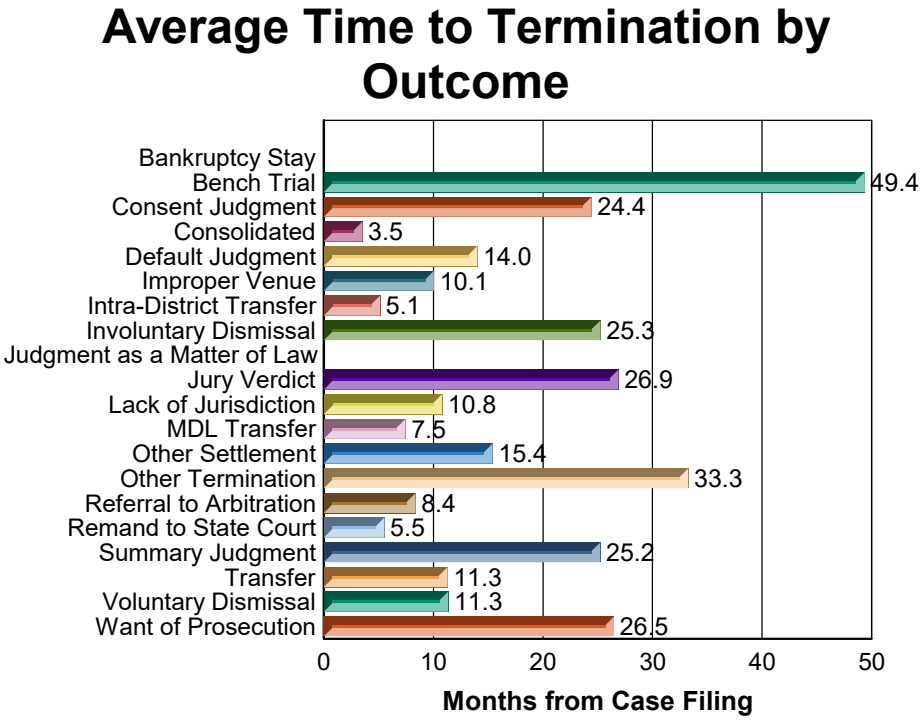

The average time from case filing to contested judgment for the active judges in this district is shown in the chart below.

Average Time to Termination by Case Outcomes

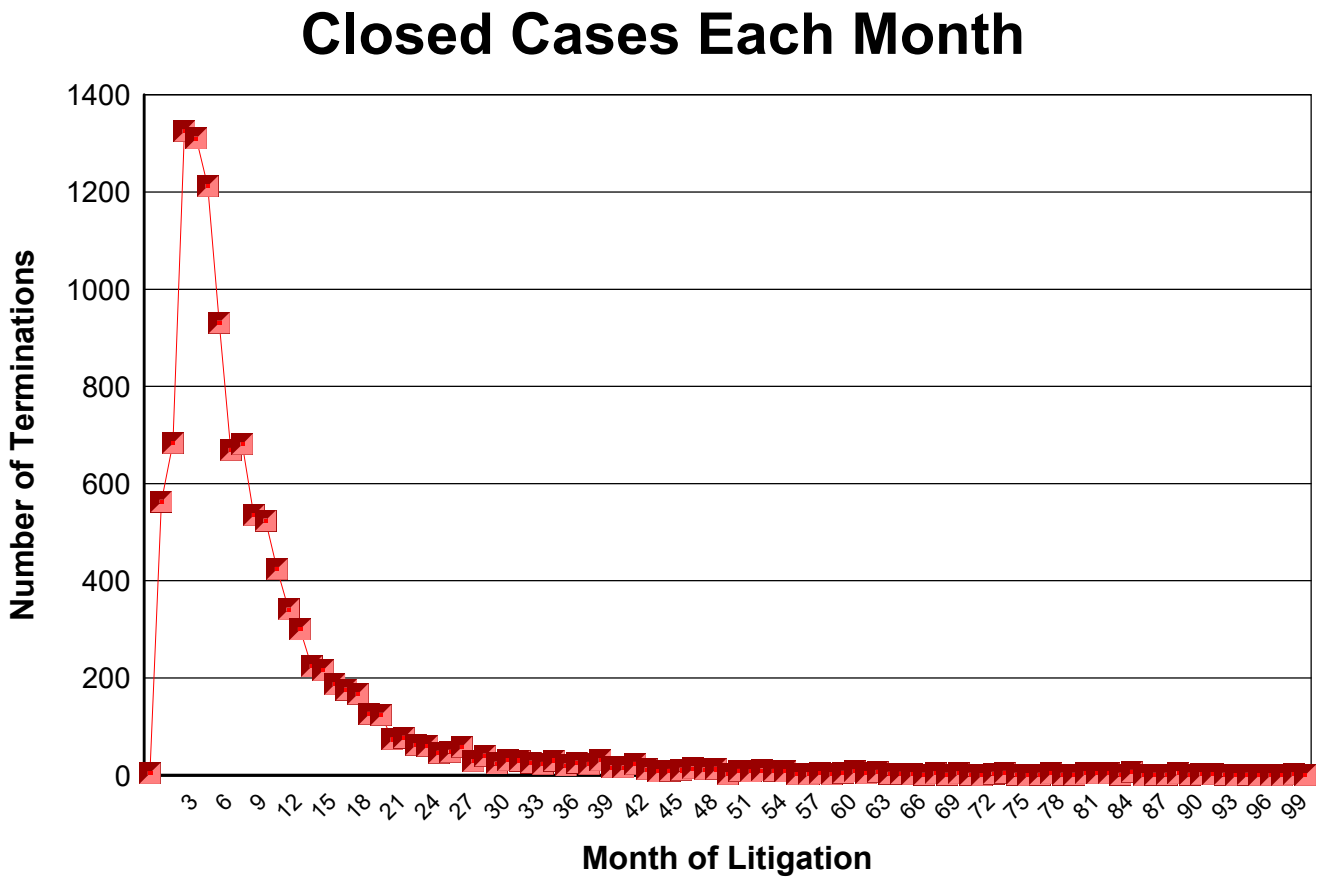

The number of cases terminated by each outcome for the active judges in this district is shown in the chart below, and the average time to termination for each outcome is shown in the second chart below.

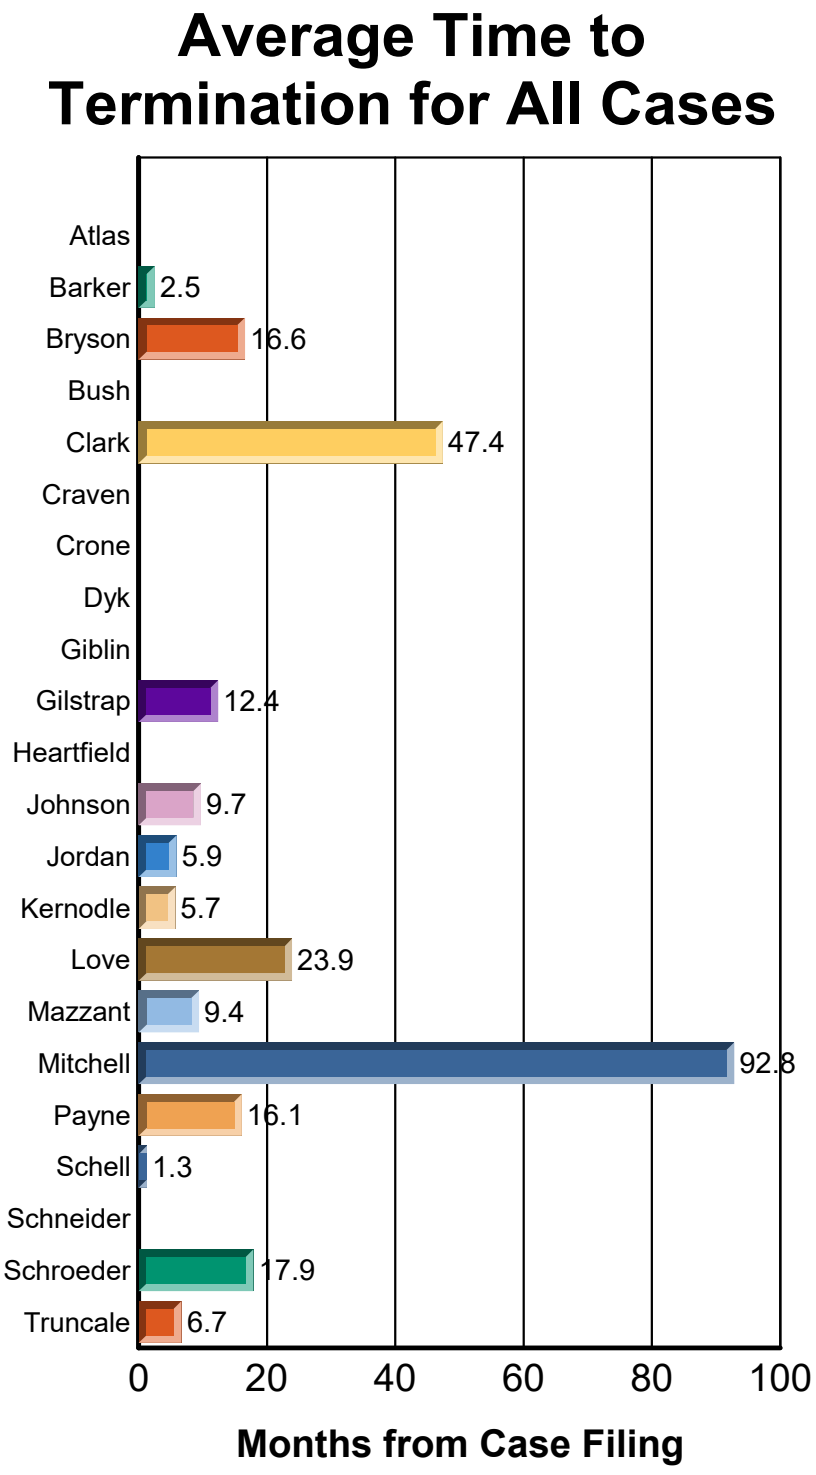

Termination by Month of Litigation

An overview of when terminations typically occur is found in the following chart, which shows the number of patent cases in the Texas Eastern District Court that were terminated each month of litigation. The first month of litigation is labeled "1", etc. Months with no case terminations are omitted from the chart.

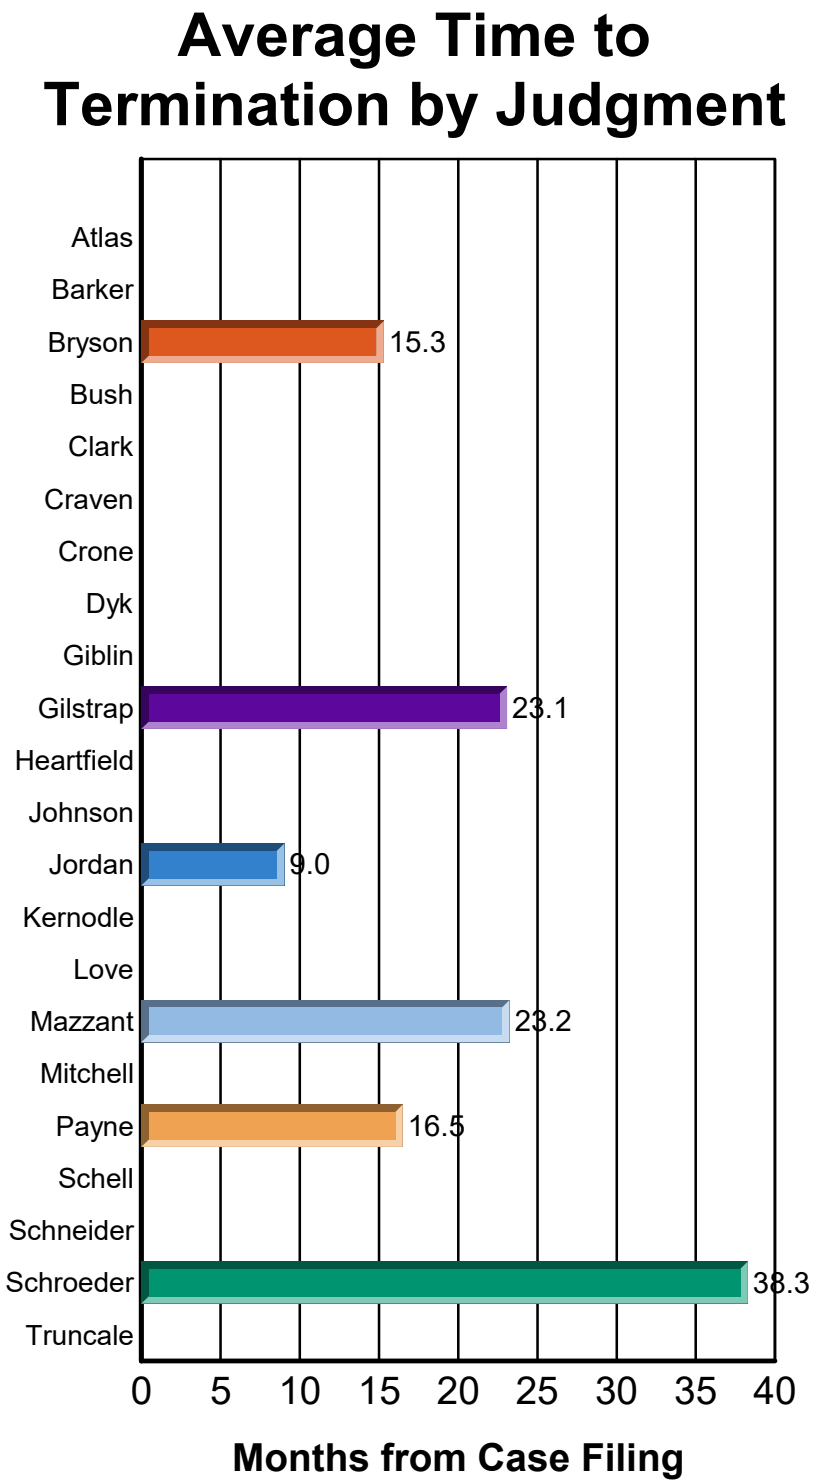

Average Pendency for All Cases: By Judge

The variation in pendency for all closed cases is shown below.

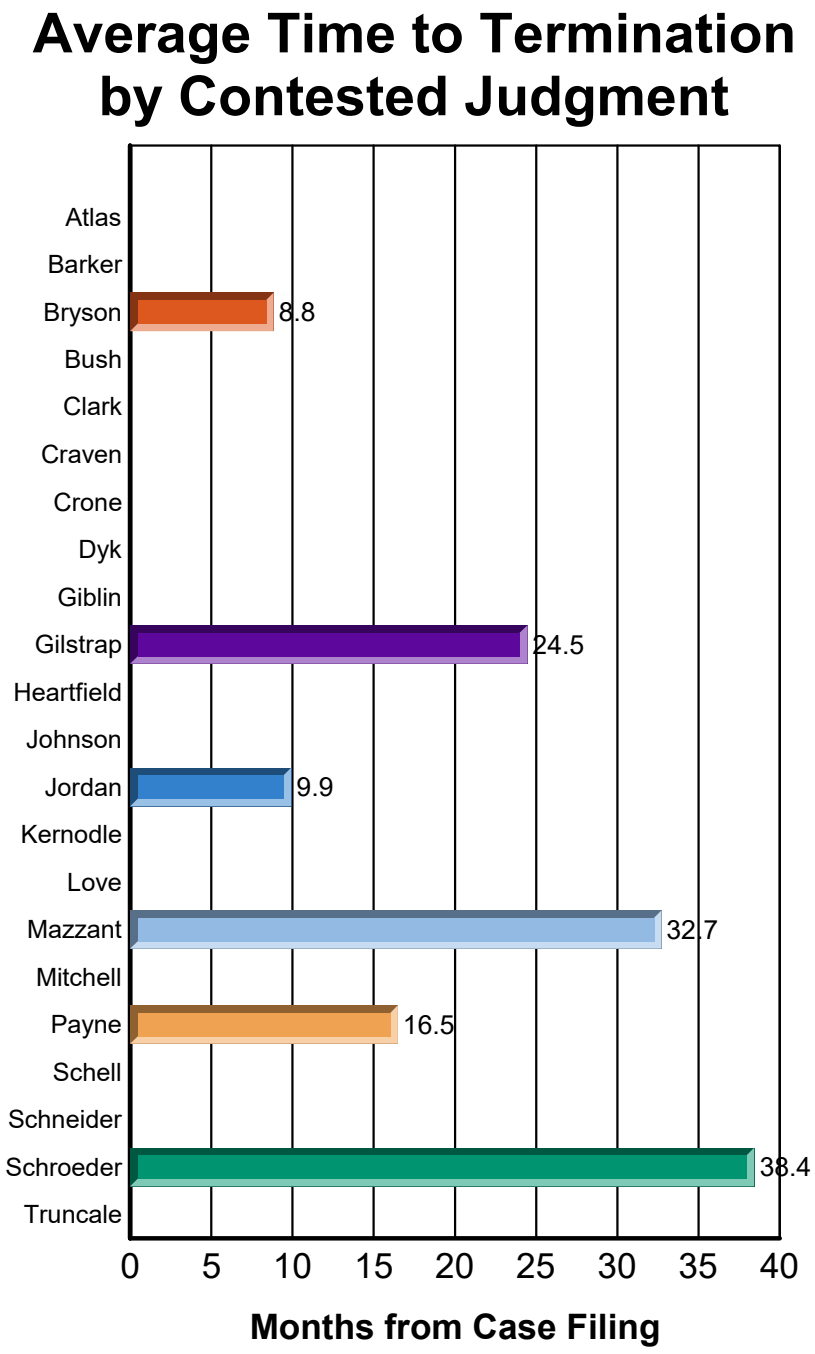

Average Pendency for Cases Terminated by Judgment: By Judge

The variation in pendency for all cases terminated by judgment is shown below.

Average Pendency for Cases Terminated by Contested Judgment: By Judge

The variation in pendency for all cases terminated by contested judgment is shown below.

Case and Judgment Outcomes

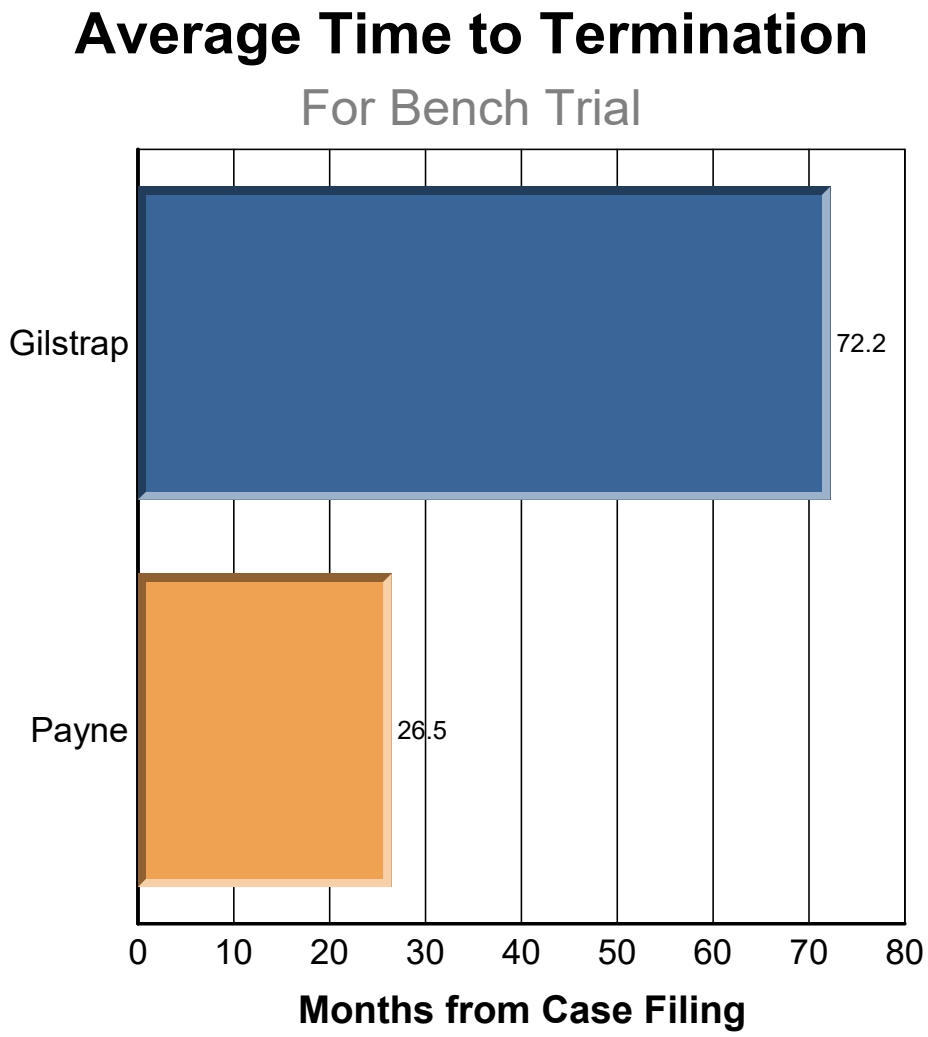

The number of outcomes by judgment, the patentee win rate for those outcomes, and the average time to termination for those outcomes for this court are shown below, broken out by type of outcome.

	Number of Judgments	Pat. Win Rate	Average Time to Termination

Awards and Settlement Amounts - What Will it Cost: The damages portion of litigation expense is heavily fact dependent, but there are norms one can use to ensure the reasonableness of predicted damage awards and total cost in a particular case. The chart and table below show the average and median amounts for the selected court. Award amounts not entered into the records of the federal courts or otherwise not brought to the attention of LegalMetric are not included in this report.

Studies have shown that attorney fees and related expenses can run from 33% to 100% of the damage awards. The total cost for various outcomes can be estimated by multiplying the average or median awards by 1.33 (for a low figure) or 2.0 (for a high figure). These total cost estimates are shown in the table below.
