'615 Claim 1	**Exemplary Amazon Infringement**
1[PRE]: A television set system comprising:	Amazon's Fire TV, Fire Stick (used with a display), and Fire tablets ("Amazon Accused Products") are television set systems. In addition, Amazon induces infringement by customers who use Prime Video to stream content on non-Amazon TVs, tablets, and other devices in the same way the Amazon devices are described here. Amazon also induces infringement by customers who use Prime Video to stream content with the Fire Stick attached to a display.  https://www.amazon.com/b?ie=UTF8&node=8521791011

	 https://www.amazon.com/Amazon-Fire-Tablet-Family/b?ie=UTF8&node=6669703011
[1A]: a television function unit;	The Amazon Accused Products include a television function unit. For example, the Amazon devices include hardware and software related to a television function, such as sharing streaming content from the Prime Video app with others via Watch Party.
[1B]: a display arranged to display a broadcast program in accordance with the television function unit;	The Amazon Accused Products include a display arranged to display a broadcast program in accordance with the television function unit. For example, the Amazon devices include a display (e.g., the screen on a Fire tablet) arranged to display a broadcast program in accordance with the television function unit.
[1C]: a receiver arranged to receive, without request or acknowledgement, information of one definite broadcast program which can be displayed on the display	The Amazon Accused Products include a receiver arranged to receive, without request or acknowledgement, information of one definite broadcast program which can be displayed on the display and is identified by a channel selection of another television set in another place. For example, using Watch Party, a software feature that works with a receiver in an Amazon device (the "Receiving Device") to receive, without request or acknowledgement, information of one definite broadcast program which can

and is identified by a channel selection of another television set in another place; and	be displayed on the display of the Receiving Device and is identified by a channel selection of another television set in another place (the "Sharing Device").
[1D]: a manual controller arranged to change the display in response to a predetermined same manual operation from own motive of a viewer of the display on the basis of the information received by the receiver, the predetermined same manual operation from own motive having no influence on the channel selection of the another television set, but having influence solely on the change in the display of the own television set into the one definite broadcast program identified by the channel selection of the another television set with the information received by the receiver,	The Amazon Accused Products include a manual controller arranged to change the display in response to a predetermined same manual operation from own motive of a viewer of the display on the basis of the information received by the receiver, the predetermined same manual operation from own motive having no influence on the channel selection of the another television set, but having influence solely on the change in the display of the own television set into the one definite broadcast program identified by the channel selection of the another television set with the information received by the receiver. For example, the Amazon devices include a manual controller (e.g., the interface with which the user of an Amazon device manually interacts to control the device). The manual controller of the Amazon devices is arranged to change the display in response to a predetermined same manual operation from own motive of a viewer of the display on the basis of the information received by the receiver. For example, a user of the manual controller of an Amazon device can choose to change what is displayed by opening a Watch Party invitation. The Amazon devices use the predetermined same manual operation from own motive having no influence on the channel selection of the other television set. For example, a user of an Amazon device can choose to accept a Watch Party invitation, but whether or not the user of an Amazon device chooses to accept the Watch Party invitation, the Amazon device has no influence on the channel selection of the device which sent the Watch Party invitation. The Amazon devices have influence solely on the change in the display of their own television set into the one definite broadcast program identified by the channel selection of the other television set with the information received by the receiver. For example, a Receiving Device may receive a Watch Party invitation, which, when selected, will display a broadcast program on the Receiving Device. But whether or not the user of an Amazon device chooses to accept that Watch Party invitation, that Amazon device has no influence on the channel selection of the Sharing Device which sent the Watch Party invitation.

How Do I Join a Watch Party on Fire TV?

All Prime Video customers are able to join a Watch Party.

1. Open the link you received using a web browser on a mobile device. You'll be prompted to open the Prime Video app, where you'll be given a code.
2. If you aren't entitled to watch the content selected in the Watch Party, you'll be prompted to subscribe to Amazon Prime Video, or buy or rent the content, depending on the content you are trying to watch.
3. Open the Prime Video app on your Fire TV device. Go to **My Stuff** > **Join**. Enter the code that appears in the Prime Video app on your Android or iOS device. Select **Join** then confirm with **Join Watch Party** to join the Watch Party.
4. To join the Prime Video app on your Android or iOS device, enter your desired username under **Chat name**. Select **Join Watch Party** to join the chat room.

For content included with Prime, Amazon Prime members are eligible to join a Watch Party in their country. Non-Amazon Prime members trying to access eligible titles Included with Prime will be prompted to subscribe to Amazon Prime - with free 30-day trial available (if eligible). If the title is available for purchase or rent, you'll be prompted to purchase or rent, if you don't already have access to the title.

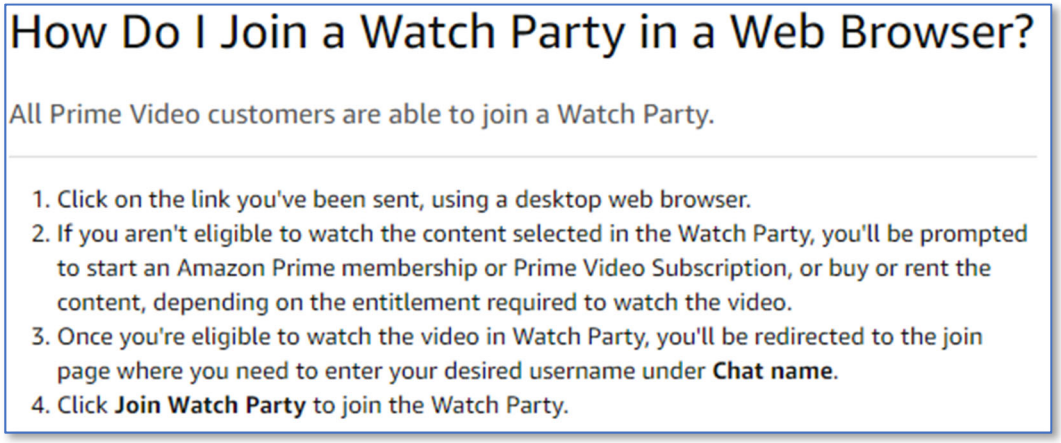

The participants must be from the same country as the host and the host must begin their Watch Party from their local Amazon website. The availability of content and titles may vary over time and by location.

Note: Watch Parties can be watched through the Prime Video app on supported Fire TV devices , the Prime Video app for selected connected devices, in addition to Android mobile phones, Android tablets, Fire tablets, iPhones, and iPads. You can also access Prime Video Watch Parties on desktop web browsers, except for Microsoft Internet Explorer and Apple's Safari.

How Do I Join a Prime Video Watch Party on Connected Devices?

All Prime Video customers are able to join a Watch Party.

1. Open the link that you received in a mobile web browser. You'll be prompted to open the Prime Video app.
2. If you aren't entitled to watch the content selected in the Watch Party, you'll be prompted to subscribe to Amazon Prime Video, or buy or rent the content, depending on the content you're trying to watch.
3. To join the Prime Video app on your Android or iOS device, enter your desired username under **Chat name**. Select **Join Watch Party** to join the chat room.
4. Open the Prime Video app on your connected device. Go to **My Stuff** > **Join Watch Party**. Enter the code that appears in the Prime Video app on your Android or iOS device. Select **Join** then confirm with **Join Watch Party** to join the Watch Party. Please note, if your app doesn't have a "My Stuff" section, or if it doesn't show an option to join a Watch Party on "My Stuff," please update the Prime Video app on your device. If the "Join Watch Party" option doesn't appear, then your device doesn't currently support the Watch Party feature.

Alternatively, if you have already joined a Watch Party on an iOS or Android device, then log into the Prime Video app on a connected device, you should see a notification asking you if you wish to join the same Watch Party on your connected device.
