A BETTER BELT SYSTEM

Committed to responding to every industry need, we recently transformed our transfer belt system to create a truly unique system that transports sand quickly with zero dust creation.

1/4

Called The Prop Tower, our newest piece of equipment uses a bucket elevator to move 6 to 8 tons of sand per minute and a telescopic boom to create double the reach of our competition. With 130 foot reach and a 300-degree working radius, the Prop Tower is the best transfer belt system on the market today.
