Hi Jeremy,

Please see the attached preliminary concept. There are areas of design that we continue to explore such as portability and areas where covers and other items could be incorporated. We continue to work on ideas for the loading spout and are on track with some solid options. There may need to be alterations to the inlets on the silos but that is something Anchor is capable of performing if necessary.

Please review the concept and let me know what you think. If this is something you feel we should pursue, let's setup a meeting between you, Anchor and our partners for next week.

Thanks,

Mike Stanton
