

Exhibit 2026

UNITED STATES PATENT AND TRADEMARK OFFICE

BEFORE THE PATENT TRIAL AND APPEAL BOARD

HANWHA SOLUTIONS CORPORATION,
Petitioner

v.

MAXEON SOLAR PTE, LTD.,
Patent Owner

Case IPR2024-01203
U.S. Patent No. 8,222,516

DECLARATION OF MARY K. BOLIN

DECLARATION OF DR. MARY K. BOLIN

I, Mary K. Bolin, declare as follows:

1. I am Emeritus Professor at the University of Nebraska, Lincoln Libraries. I have held the following positions: Professor and Catalog and Metadata Librarian, Digital Initiatives and Special Collections Department, University of Nebraska—Lincoln Libraries (2015–2020); Professor and Chair, Discovery and Resource Management and Coordinator of Collection Development, University of Nebraska, Lincoln Libraries (2004–2015); Lecturer, San José State University School of Information: Lecturer, (2008–present); Head of the Technical Services Department, University of Idaho Library (1993–2003; promoted to Professor in 1999); Head of the Cataloging Department, University of Idaho Library (1986–1993; promoted to Associate Professor and tenured in 1991); Head of Records Maintenance Section, Cataloging Department, University of Georgia Libraries (1981–1986).

2. Over the course of my work as a librarian, professor, researcher, student research supervisor, and author of numerous scholarly papers and other publications, I have had extensive experience with cataloging records and online library management systems built around Machine-Readable Cataloging (MARC) standards. I also have substantial experience in authenticating printed documents and establishing the date when they were accessible to ordinarily skilled researchers.

3. Attachment A is my full resume.

4. I have been retained by counsel for Maxeon Solar PTE. LTD. (“Patent Owner”) to evaluate, authenticate, and establish the dates of public availability of certain documents in the above-captioned cases. For my time performing this service, I am being paid my usual hourly fee. I have no financial interest in this litigation, or affiliation with Patent Owner. My compensation is

not dependent upon the outcome of, or my testimony in, this litigation or any other proceeding, including before the U.S. Patent Office.

A. Documents of Interest

5. The documents that are the subject of this declaration are the following:

Document 1. Gan, Jon-Yiew. *Polysilicon emitters for silicon concentrator solar cells*. Stanford University, 1990. Methodology – Ex. 2003

6. I searched each of these documents in the OCLC database, Google Scholar, and one or more subscription databases such as IEEE Xplore and ACM Digital Library. I also searched the library catalogs of institutions such as the University of Nebraska—Lincoln and other large research libraries. My goal was to find a record in one of these databases that contained a date indicating when the document was available to the public.

7. *Use of MARC Records.* The “Machine Readable Cataloging” standard, also known as “MARC,” is an industry-wide standard method of organizing library catalog information. The Library of Congress first developed MARC in the 1960s. A MARC-compatible library is one that has a catalog consisting of individual MARC records for each of its works. Today, MARC is the primary communication protocol for the transfer and storage of bibliographic metadata in libraries.

8. OCLC is a database of MARC records used by libraries worldwide. When an OCLC-participating institution acquires a work, it creates a MARC record for this work in its computer catalog system, and OCLC automatically supplies the date of creation. The MARC record creation date reflects the date on which (or shortly after) the item was first acquired and catalogued. Once the MARC record is created by a cataloger at an OCLC-participating member institution, it is instantaneously available to any OCLC-participating members, and, therefore available to the public.

9. A MARC record comprises several fields, each of which contains specific data about the work. Each field is identified by a standardized, unique, three-digit code corresponding to the type of data that follows. For example, a work's title is recorded in field 245, the primary author of the work is recorded in field 100, an item's International Standard Book Number ("ISBN") is recorded in field 020, an item's Library of Congress call number is recorded in field 050, and the publication date is recorded in field 260 or 264 under the subfield "c." If a work is a periodical, then its publication frequency is recorded in field 310, and the publication dates (*e.g.*, the first and last publication) are recorded in field 362, which is also referred to as the enumeration/chronology field. The library that created the record is recorded in field 040 in subfield "a" with a unique library code. When viewing the MARC record online via OCLC's Worldshare Record Manager database, hovering over this code with the mouse reveals the name of the library. I used this method of "mousing over" the library codes in the OCLC database to identify the originating library for all of the MARC records in this declaration, as well as the "display holdings" command to see a list of libraries that own the item. In the MARC records in the OCLC Worldshare Record Manager database, MARC field 040 contains the OCLC symbols of institutions transcribing, creating, and modifying the record.

10. OCLC was created "to establish, maintain and operate a computerized library network and to promote the evolution of library use, of libraries themselves, and of librarianship, and to provide processes and products for the benefit of library users and libraries, including such objectives as increasing availability of library resources to individual library patrons and reducing the rate of rise of library per-unit costs, all for the fundamental public purpose of furthering ease of access to and use of the ever-expanding body of worldwide scientific, literary and educational

knowledge and information.”¹ Among other services, OCLC and its members are responsible for maintaining the WorldCat database (<http://www.worldcat.org/>), which is used by independent and institutional libraries throughout the world. OCLC is the international cooperative to which libraries catalog records and others pay to access MARC records. The MARC records referenced in this declaration, extracted from the OCLC database, were generated in the ordinary course of business. Further, I personally located and downloaded each of these records associated with the documents on which my declaration focuses.

11. OCLC provides its members online access to MARC records through its OCLC Worldshare Record Manager database. When an OCLC member institution acquires a work, it creates a MARC record for this work in its computer catalog system in the ordinary course of its business. MARC records created at the Library of Congress are batch-loaded into the OCLC database through a subscription to MARC Distribution Services daily or weekly. Once the MARC record is created by a cataloger at an OCLC member institution or is tape-loaded from the Library of Congress, it is then made available to any other OCLC members online, and, therefore, made available to the public.

12. When an OCLC member institution creates a new record, OCLC automatically supplies the date of creation for that record. The MARC record creation date reflects the date on which, or shortly after which, the item was first acquired or cataloged.

13. The date of creation for the MARC record appears in the fixed field (008), characters 00 through 05. Field 005 is a 16 digit field that records the Date characters yyyymmdd including 4 for the year, 2 for the month, and 2 for the day. The Date entered on file never changes.

¹ Third Article, Amended Articles of Incorporation of OCLC Online Computer Library Center, Incorporated (available at <http://www.oclc.org/en-US/membership/councils.html>).

These dates are automatically supplied by the OCLC system and cannot be changed by the user. When the MARC record is created in OCLC, it is available throughout the world to other libraries and in WorldCat, the public version of OCLC Connexion. Thus, the date of creation of the MARC record by a cataloger at an OCLC member institution reflects when the underlying item is accessible to the public.

14. For each of Documents 1-??, I included a search of OCLC, www.oclc.org, which is a large shared database used by libraries around the world to create and exchange cataloging data, using MARC format, which is a universal communications format for that data.

15. For those documents for which there is a record in OCLC, I determined when the record was created and which libraries own the item. I then visited the website of the library or libraries that own the item, searched their library catalog, and determined when the item was added to the library's collection.

16. I am familiar with many online catalogs, databases, and search engines. In preparing for this declaration, I used authoritative information systems such as the above-mentioned WorldCat (<https://www.worldcat.org>), the online catalog of the Library of Congress (<https://catalog.loc.gov>), shared research databases such as ResearchGate and CiteSeerX, the online catalog of a number of large research libraries such as the University of Nebraska—Lincoln, IEEEExplore, and Google Scholar search for records. These records are identified and discussed in this declaration.

B. Document 1

17. The following are my opinions with respect to the authenticity and public availability of Document 1

1. Authentication of Document 1

18. Document 1 Gan, Jon-Yiew. *Polysilicon emitters for silicon concentrator solar cells*. Stanford University, 1990.

19. There is a MARC record in OCLC Document 1 with a creation date of April 10, 1991.

20. There is a MARC record in the catalog of the Stanford University library with a creation date of April 10, 1991.

21. Attachment B is a PDF of the MARC record for Document 1 from OCLC.

22. Attachment C is a PDF of the MARC record for Document 1 from the Stanford of University libraries catalog.

2. Public Availability of Document 1

23. Based on the facts that a MARC record for Document 1 is found in OCLC with a creation date of April 10, 1991, and in the catalog of the Stanford University libraries with a creation date of April 10, 1991, it is my opinion that Document 1 was available in April 1991 and could have been located by a skilled researcher.

* * *

I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements are made with the knowledge that willful false statements and the like are punishable by fine, imprisonment, or both, under Section 1001 of Title 18 of the U.S. Code. I state under penalty of perjury under the laws of the United States of America that the foregoing is true and correct.

Executed this March 25, 2025, in Lincoln, Nebraska.

A handwritten signature in cursive script, reading "Mary K. Bolin". The signature is written in black ink on a light-colored, slightly textured background.
