'968 Claim 1	Exemplary Apple Infringement
1[PRE]: A receiving apparatus configured to receive digital moving image contents from a provider of the digital moving image contents, the provider being commutatively connected to the receiving apparatus, the receiving apparatus comprising:	Apple products, including Apple TVs (when used with a display), iPads, iPhones, laptops, MacBooks, and iMacs / Macs and third-party devices using the Apple TV+ app (“Apple Accused Products”) comprise a receiving apparatus configured to receive digital moving image contents from a provider of the digital moving image contents, the provider being commutatively connected to the receiving apparatus. For example, Apple Accused Products include a receiving apparatus configured to receive from Apple’s servers video content via the Apple TV+ app, which is commutatively connected to the receiving apparatus. In addition, Apple induces infringement by customers who use Apple TV+ to stream content on non-Apple TVs, tablets, and other mobile devices in the same manner as the Apple Accused Products described here. Apple also contributorily infringes this claim by providing within the United States the Apple TV+ app, which includes functionality that automatically plays the next episode in a series. 	 The screenshot shows a webpage titled "Which desktop is right for you?" with a link "Compare all Mac models >". Below the title are three product images: an iMac (labeled "New iMac"), a Mac mini, and a Mac Studio. Each product has a small colored dot below it. The iMac dot is multi-colored, while the Mac mini and Mac Studio dots are grey. iMac / Macs https://www.apple.com/imac/
1[A]: a processor executing instructions to designate a part of the digital moving image contents in the provider automatically or in response to a manual operation;	The Apple Accused Products include a processor executing instructions to designate a part of the digital moving image contents in the provider automatically or in response to a manual operation. For example, when a user selects an episode from a TV series in the Apple TV+ app (a manual operation), a processor in the Apple Accused Products executes instructions that designate a part (e.g., an episode) of the digital moving image contents (e.g., a TV series or a single episode) in response to the user's manual operation.

1[D]: a receiver of the designated succeeding part of the digital moving image contents in response to the designation by the processor; and	The Apple Accused Products include a receiver of the designated succeeding part of the digital moving image contents in response to the designation by the processor. For example, when the next episode is queued for playback, the Apple Accused Products have hardware or software that receives the episode from Apple's servers for streaming. <i>See</i> limitations [1B]-[1C] above.
1[E]: a display configured to display the succeeding part of the digital moving image contents received by the receiver.	The Apple Accused Products include a display configured to display the succeeding part of the digital moving image contents received by the receiver. For example, the next episode is displayed on the screen of the Apple Accused Products. <i>See</i> limitations 1[PRE]-[1C] above.
