Using the IF Function in Excel

IF is a very handy function -- it tests a condition and then returns one of two results depending on the outcome of the test.

Dependence Day

You shouldn't set task start dates in Project 2002 very often. That's because projects are fluid -- they change and grow faster than bad guys come at you in the average computer game. If you build in a timing logic, rather than assigning certain dates to tasks, Project can reflect changes by adjusting your project based on that logic.
