About IEEE Standards Online Subscriptions

Welcome to IEEE Standards Online--a growing library of IEEE-approved, industry-renowned standards. A prepaid annual subscription gives you continuous access to some of the most popular technical standards--on the Web. Each subscription has a collection of topically related standards. New standards will be added to a subscription, at no extra charge during your subscription period.

Features

- No installation needed
- No technical support required
- Get new, approved standards at no additional cost
- Get automatically notified when new standards or revised are added to the collection
- Standards in PDF file formats
- Access anywhere, anytime... at work, at home, in a hotel or at a conference
- Fast, flexible searching capability by topic or subject, titles, keywords, or designations.
- Multi-user licenses, allowing you to grant access to several colleagues or to your entire organization.

Benefits

- Increased effectiveness
- Increased efficiency and market acceptance of products in global markets
- Dedicated Account Manager
- Customized and tailored customer service to maximize value from your service

Software Requirements

Our subscription service requires only your internet connection, a web browser (Netscape 2.02 or higher, Internet Explorer 3.0 or higher), and a PDF reader (Adobe Acrobat Reader 3.0 or higher). That's all it takes for you to fully search browse, download and print the standards in your subscription plan.

Note: The Adobe Acrobat Reader is freely available for downloading by clicking on the "Get Acrobat Reader" icon.

How it Works

When your prepaid subscription is received, IEEE will provide you with an access code via an email message. Using this code, you register online and begin your online use for one year to the comprehensive set of standards in a particular subscription(s). Prior to your subscription anniversary date IEEE will notify you of your renewal process. When you renew, you continue your access to the current library of standards.

Demo a standard at no charge

Experience our service with the following sample standards.

- [IEEE 802-2001](#)

What we offer

We provide different levels of online subscription service designed to meet your business needs.

- **All-inclusive Standards Subscription**--the entire portfolio of IEEE standards offering.
- **Industry subscriptions**--a subsection of the portfolio that focuses on the Power and Energy, Information Technology, Telecommunications and Transportation Industries.
- **Ancillary Technical Subscriptions**--a grouping of standards according to technical interests and application.

Visit <http://standards.ieee.org/catalog/olis/subscription.html> to place an order and to view our entire Subscription Portfolio.
