LEDVANCE POWER THROUGH LIGHT

POWER THROUGH LIGHT WHO WE ARE AND WHAT THIS MEANS FOR OUR STAKEHOLDERS

Our customers benefit from the transformation of light into real savings through intelligent energy solutions, solar technology, and improved working and living environments with our lighting systems.

We are committed to contributing to a greener planet by reducing CO₂ emissions and waste through sustainable products, solutions and processes.

Ultimately, we put the power of light into the hands of our employees and stakeholders to contribute to a better quality of life on a greener planet.

OUR BRAND STORY

LEDVANCE was introduced to the world in 2016 as a spin off from the lighting pioneers OSRAM. As a new brand with over 100 years of experience, we are proud of our manufacturing excellence, innovative spirit and passion for lighting. Since then, we have developed an extensive luminaires portfolio, received several awards for our human centric lighting (HCL) solutions and emerged as one of the top players in the global lighting market.

Today, as the world faces groundbreaking challenges and transformations from a cost of living and energy crisis to climate breakdown and environmental destruction the story of LEDVANCE also must adapt and evolve. We want to stay true to our roots as industry innovators and push forward, find imaginative solutions to our customers' challenges and develop into a broader company that goes beyond just lighting.

True to our new mantra "Power Through Light", we want to empower our customers to harness the power of light like never before both as a tool for illumination as well as for power generation. Our intelligent energy solutions, solar technology, and advanced lighting systems for improved working and living environments mean that our customers benefit from this transformation with real savings in energy costs. At the same time, we are committed to contributing to a greener planet by reducing CO₂ emissions and waste through sustainable products, solutions and processes.

Times are truly challenging, but we have a chance to both improve people's quality of life with smart and simply powerful products and to conserve the planet's resources by finding the right solutions together with our customers. We have the courage and experience to accelerate converting all these opportunities into reality. Because what matters most is leaving a world where future generations can thrive. Together, we make change happen.

OUR BRAND ARCHITECTURE STRONG BRANDS FOR SUCCESS IN VARIOUS

LEDVANCE is one of the world's leading companies in the lighting industry and is expanding into the renewable energy solution business. To reflect our broad range of products and solutions, we offer a variety of brands under our LEDVANCE corporate umbrella. Under the LEDVANCE product brand, we sell an extensive line of products for residential, commercial and industrial applications. In agreement with OSRAM, we also sell a large selection of products under the OSRAM and SYLVANIA product brands. In addition to this, we have a plethora of brands for our owned technologies and features, like our light management system VIVARES, PHASE EV™ charging infrastructure as well as our BIOLUX Human Centric Lighting system.

We are proud of our powerful organization. Our people take responsibility and are willing to go the extra mile to deliver on our promises with clear ambitions in mind. Because good is not good enough if better is possible. Only then can we achieve sustainable success.

We are engaged, agile and courageous. We leave the beaten track and take calculated risks to explore new paths. We see the rapid transformation of our industry as an opportunity for new products, new markets and new thinking. That is why we welcome lateral thinkers and reward inventiveness.

We trust each other. And we talk to each other across hierarchies, divisions and departments – openly and directly. We listen, give feedback and learn from each other. We pride ourselves on our teamwork and cooperation – both within the company and with our customers. This is how we build long-term, trusted relationships.

After spinning off from OSRAM in 2016, the company is now owned by Chinese lighting enterprise MLS Co., LTD. With offices in more than 50 countries and business activities in more than 140 countries, LEDVANCE possesses outstanding access to the global market based on trusted, long-standing customer relationships and a powerful distribution network. With our in-depth understanding of the lighting market, trending technologies and changing needs, we deliver solutions to the specific and individual demands of both direct and indirect customers. Beyond lighting, LEDVANCE offers vertically-integrated, renewable energy solutions for the building sector. Together, the lighting division and the renewable energy division form a comprehensive ecosystem for residential, commercial and industrial buildings.
