Subject: iCharts Milestone & Requirements in the WIKI

Hi,

here a few points on milestone planning & requirements.

Milestones

I have set up the following milestones in the wiki:

iCharts pre-Beta

- * effectively the release we have right now

iCharts private Beta (restricted release for pilot users) - June 20

- * contains resizing plus tons of other great new features

iCharts public Beta (non-commercial) - Sep 1

- * effectively our release for the TechCrunch event
- * integrated studio/portal
- * corresponds to requirements formulated in the page "[iCharts Studio 0.3 \(Beta\)](#)" + Portal Beta Mock-Up

Requirements Pages

My proposal is that we should only have one requirements page per milestone covering both Studio and Portal. We could have separate detail pages for topics that require more detail description.

This would mean we would change/simplify the current structure in the wiki from portal requirements / studio requirements into one requirements section only. A second section could cover those detail topics.

Best,
Seymour
