Attachment: 20080612_About iCharts.ppt

Hallo Tyron,

Wir haben Stage freigegeben, wird morgen auf Pilot hochgeladen.

Du müsstest jetzt noch die HTML-Seiten aufsetzen. Anbei die finale About Seite, auf der zweiten Seite die Profile sowie Help-Seite.

Das Video schaut soweit ok aus. Problem ist: Läuft auf den Rechnern von Valerie und mir. Hans-Bernd hat Probleme mit der letzten Sequenz (siehe eMail von Hans-Bernd). Girish konnte gar nicht starten.

Gruss,
Seymour

Help

Here are four little tutorials that will help you get started. If you have specific questions refer to the FAQ section below.

- 1 **How to upload data to iCharts** 
- 2 **How to create a Chart** 
- 3 **How to publish a Chart** 
- 4 **How to embed an interactive Chart into a PDF document (COMING SOON)**

FAQ

Which data sources can be used to upload data to iCharts

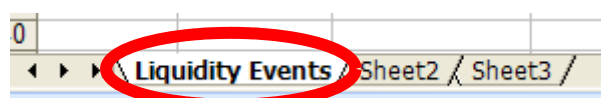

At present iCharts supports upload of Excel spreadsheets. In future you will be able to upload data using CSV files and Google spreadsheets. You also will be able to directly enter data.

How do I need to set up my Excel spreadsheet so iCharts can upload it?

Your data needs to be located in the top left corner of the Excel sheet. The columns of the first row need to contain header labels for your data. Example:

	A	B	C	D	E	F	G	H
1	Quarter/Year	Total M&A Deals	M&A Deals with disclosed values	Total Disclosed M&A Value (\$M)	Average M&A Deal Size (\$M)	Number of IPOs	Total Offer Amount	Average IPO Offer Amount
2	2005-1	81	46	4.364,90	94,9	10	720,7	72,1
3	2005-2	80	36	4.791,00	133,1	10	714,1	71,4
4	2005-3	98	47	4.374,80	93,1	19	1.458,10	76,7
5	2005-4	87	39	2.563,70	65,7	17	1.568,10	92,2
6	2006-1	104	49	5.446,40	111,2	10	540,8	54,1
7	2006-2	104	39	3.935,60	100,9	19	2.011,00	105,8

You only should use the first sheet of your Excel book. The remaining sheets won't be uploaded.

Header labels cannot contain numeric values. Year labels (e.g. 1999,2000,2001,...) need to be inserted as text (by adding a ' before the date, e.g. '1999).

The Excel sheet cannot contain any formula.

Otherwise you should be fine. If you still have a problem, simply notify us via the "Help" link in iCharts Studio and we'll be there to help you.

[To see how to upload a data sheet you can also have a look at our tutorial.](#)

How do I create a new iChart from a data sheet?

To create a new iChart from a data sheet, select "New iChart" from the iCharts Gallery and select your data sheet from the list in the tab "Data Sheets" on the right side of the Charting Pane. If you haven't uploaded your data sheet yet, you need upload it first using the button "Upload data sheet" on the bottom of the "Data Sheet" tab. [See our tutorial to see how it works.](#)

Can I make more than one iCharts from one data sheet?

Yes, you can make as many iCharts as you like from one data sheet

Once a data sheet is uploaded, can I change the data sheet online?

Not yet, soon we will have the "Edit data sheet" function available.

Does iCharts support CSV files

Not yet, soon you will be able to upload CSV files

About iCharts

iCharts is about making interactive charting simple.

We at iCharts want to enable everyone with interesting facts & figures to easily create, share and embed interactive charts with the click of a mouse.

Why only view a chart if you can do more with it? Interactivity in charts provides a whole new dimension for consuming and understanding data.

You can embed your own iChart or any public iChart anywhere online on the web or even offline into PDF documents and Powerpoint presentations, retaining their full interactivity.

Company Info

We are operating in a highly distributed way, our locations are in Sunnyvale (Silicon Valley), in Munich (Germany) and in Pune (India).

iCharts was founded by Seymour Duncker, Tyron Montgomery and Rajesh Setty. [Click to see profiles](#).

PROFILES

Seymour Duncker (founder & CEO) is a seasoned entrepreneur with over 15 years of experience in pioneering new markets. Before launching iCharts, Seymour set up his own advisory firm. Earlier on he was partner in building a leading German CRM company. He worked for major companies, such as Compaq and SAP. At SAP he was responsible for building up a portfolio management approach for optimizing the SAP R&D budget of 1,3bn US\$. With Asera, the company that introduced the SaaS concept, and with TPS, the CRM company, Seymour was involved in the early stages of two major new software markets.

Tyron Montgomery (founder & CTO) is a well-established specialist for visual communication, running a full-service media agency in Munich. Tyron won more than 40 international awards, including an Oscar for his first animated short film, and produced the world's first all-digital stop-motion film in cinema resolution. Today, with over 20 years of programming & design experience, Tyron focuses on database-driven online applications and product ergonomics.

Raj Setty (co-founder and Chief Catalyst) is a serial entrepreneur and an angel investor. Raj founded CIGNEX, an open source solutions company, in 2000 and served as CEO until 2005. He was instrumental in growing CIGNEX at 250% year over year. Raj serves on the boards of several companies.
