Hi Girish,

attached the revised screen flow with feedback from Hans-Bernd.

As also discussed, for interactivity settings add a button in the chart creation pane with text "Interactivity settings" with a check box list for options a user can select from.

You can proceed to implement.

Best,
Seymour

Put „meta-data“ between
tabs and actual table??

The screenshot displays the iCharts software interface. At the top, there are tabs for 'Column Chart', 'Data Sheet', and 'Preview iChart'. The 'Data Sheet' tab is active, showing a table with the following data:

Below the table, there is a large empty area. To the right of the table, there is a 'Description' field. Above the table, there is a text area with the following content:
