Subject: ooVoo conference on general status quo

Hi guys,

Yesterday and today, we are having different project meetings at my office, so I'm not available for calls before the evening.

Tomorrow (Wednesday) would be perfect for a conference call to check the general status of the portal, the studio and the integration of both. I have set up a meeting on ooVoo. Please attend and help making it a success.

Also to be discussed is whether we need to move iCharts to the US for performance reasons (the current server is in India). In that context, Ramesh, please take a look at the e-mail I sent you on May 8, to which I never received an answer. We must clarify the possible technical misunderstanding and then continue talking with Packet Exchange. If we must move to the US I guess NOW is the right time to sort out the details with them and make a provider decision.

Have a great day everyone,
Tyron
