Subject: New versions of portal with new UI and studio: things to be careful of during demo

Hi Seymour,

The portal with new UI (3 pages) is up: <http://dev.icharts.net/ichartsNewUI/> **DO NOT FORGET “/” at end.**

The old UI version is running parallel at: <http://dev.icharts.net/ichartPortal/>

The new version of studio is integrated into both.

Following are some issues which you need to be careful about during demo:

1. When you come from edit chart, and go to data sheet tab, you do not see toolbar to edit data sheet.

=> You can first go to “create new data sheet” and then come back to edit this sheet.

2. When uploading audio comment, do not try to play the comment in the same popup window where you uploaded. It will give error.

=> You can close the popup window and open it again to play. Or you can go to preview and play.

3. The close button in portal -> studio does not close.

4. Existing pie chart preset in Seymour’s account gives error.

5. After uploading audio comment, when saving chart, you get 2 confirmation messages : 1 for chart and 1 for audio comment.

6. In the portal there seems to be problem of session being shared between users. So all of us please refrain from accessing portal while Seymour is demoing.

Regards,
Girish
