Subject: How are you?

Hi Gautam, hi Dipesh,

I hope the week with exams went well and I hope you could relax a bit this weekend.

My nephew has been working on the the following accounts and finished them according to y-axis and source settings: icf_11, icf_55, icf_66 and icf_666

As you had already been finished: cf_22, icf_dipesh, icf_gd and icf_44 (was it complete? or were the last 20 missing) we still have to do:

icf_33, icf_77, icf_777, icf_88, icf_99, icf_dg, icf_publichealth, icf_gautam.

If you have a chance to work on that this week please do. It is absolut crucial that we get the y-axis and sources correct and it turned out that it is really some work. Please leave out the comments for the moment as we have to select anyway a handfull of charts for the launch which will be hand treated.

Last not least you could help a lot if you can find about 20 data sources of absolute hammering concurrent data: e.g. Georgia War, Bejing Olympics, something else going to happen just now and of course about Techcrunch50. Some data about Techcrunch40 from last year filling 1 chart might also be nice. I expect these 20 sources to be sources of 1-2 charts only per source and it is possible that one has to type the data if needed by hand as we need that most actual stuff !!!!!

Best regards and please get in contact with me
Hans-Bernd
