Galaxy J5, Samsung Galaxy J7, Samsung Galaxy Tab S3, and Samsung Galaxy Tab S2 that were made, sold, offered for sale, used, or imported into the United States since February 26, 2018 (“’609 Accused Devices”). Samsung further has and continues to indirectly infringe one or more claims of the ’609 Patent by knowingly and intentionally inducing others, including Samsung customers, to include the ’609 Accused Products within their own downstream products that they make, use, sell, or offer for sale in the United States or import into the United States, for example, including but not limited to, the Google Pixel 7 Pro smartphone, and Motorola Moto G Stylus 5G smartphone.

(c) ’886 Patent

HID is currently aware that Defendants have and continue to directly infringe the ’886 Patent, either literally or under the doctrine of equivalents, without authority and in violation of 35 U.S.C. § 271, by making, using, offering to sell, selling, and/or importing into the United States products that satisfy each and every limitation of one or more claims of the ’886 Patent. Such products include each device made, used, offered for sale, sold, and/or imported into the United States containing the SKY58083 Front End Module or other components made by the same or a similar process including, but not limited to, the Samsung Galaxy S22 Ultra Smartphone.

2. Claim Charts

Claim charts identifying every element of every asserted claim of the HID Patents within the Accused Products are attached hereto as Appendices A, B, C, and D. HID believes that the Accused Products cited in the claim charts are representative of all versions of the Accused Products, however, should discovery yield documents or information demonstrating that Defendants sell other infringing products which are not represented by the claim charts, HID reserves the right to amend these claim charts, as well as other information contained in this document and the Appendices attached hereto, to incorporate new information learned during the

course of discovery including, but not limited to, information that is not publicly available or readily discernible without discovery. HID further reserves the right to amend these claim charts, as well as other information contained in this document and the exhibits attached hereto, pursuant to Local Patent Rules 3-1(g) and 3-6.

C. LITERAL INFRINGEMENT AND DOCTRINE OF EQUIVALENTS

HID asserts that, under the proper construction of the asserted claims and their claim terms, the limitations of the asserted claims of the HID Patents are literally present in the Accused Products as set forth in the claim charts attached hereto as Appendices A, B, C, and D.

HID contends that any and all elements found not to be literally infringed are infringed under the doctrine of equivalents because the differences between the claimed inventions and the Accused Products, if any, are insubstantial.

HID contends that Defendants directly infringe the asserted claims by making, using, offering for sale, selling, and importing into the United States the Accused Products. HID also contends that Defendants indirectly infringe by contributing to and/or inducing others (*e.g.*, Defendants' service providers or partners, suppliers, Defendants' customers or its customers' customers) to directly infringe those claims by making or using the Accused Products. In addition, HID contends that Defendants directly infringe to the extent that activities of third parties may be legally attributable to Defendants.

HID contends that Defendants induce infringement of the HID Patents by others (manufacturers and distributors Accused Products, end-users of Accused Products, and Defendants' customers) by inducing others to make or use the Accused Products with the knowledge that making or using directly infringes the HID Patents or, in the alternative, with the belief that there was a high probability that others infringe the HID Patents, but while remaining willfully blind to the infringement.

Pursuant to Local Patent Rule 3-6(a)(1), HID reserves the right to amend its Infringement Contentions as to literal infringement or infringement under the doctrine of equivalents in light of the Court's claim construction.

D. PRIORITY DATES

Each asserted claim of the '826 Patent is entitled to at least the priority date of its earliest application, U.S. Provisional Patent Application No. 61/776,063, with a filing date of March 11, 2013.

Each asserted claim of the '673 Patent is entitled to at least its filing date of March 16, 2007.

Each asserted claim of the '609 Patent is entitled to at least the priority date of its earliest application, U.S. Provisional Patent Application No. 61/545,003, with a filing date October 7, 2011.

Each asserted claim of the '886 Patent is entitled to at least the priority date of its earliest application, U.S. Provisional Patent Application No. 61/007,035, with a filing date December 16, 2007.

HID makes this disclosure without prejudice to its right to prove an earlier date of invention.

II. PRODUCTION OF DOCUMENTS PURSUANT TO LOCAL PATENT RULE 3-2

HID is producing or making available for inspection documents that are in HID's possession, custody, or control as set forth in Local Patent Rule 3-2. A Production Index identifying these documents is attached hereto.

This preliminary identification of documents is for convenience and is not an admission that each document falls within any exemplary categories in the Local Patent Rules, or that any

document qualifies as prior art. Thus, HID reserves its right to add to, delete from, or otherwise modify its disclosures in this section as its investigation proceeds.
