Hi Dan-

This looks good to me. Uri had one comment:

do you think it makes sense to add additional claims, like "the method of claim X, where the barcodes are random-sequence polynucleotides" or something to that effect?

Hi Greg,
Please see the attached claims for Uri's application. Please let us know your comments.
Thanks
Dan

Greg,
Attached is an updated version of the above-mentioned application for you to review. I will forward you a revised set of claims for Uri's application later today. In the meantime, could you send me a document containing the final figures for Uri's application.

Thanks

Dan
