

UNITED STATES PATENT AND TRADEMARK OFFICE

BEFORE THE PATENT TRIAL AND APPEAL BOARD

ARNOLD & RICHTER CINE TECHNIK GMBH & CO. BETRIEBS KG,

Petitioner,

v.

ROTOLIGHT LIMITED,

Patent Owner.

**DECLARATION OF MARTIN PALMER
REGARDING SHOWLINE SL PAR 155 ZOOM
RGBW LED LUMINAIRE USER'S MANUAL**

I, Martin Palmer, hereby declare:

1. My name is Martin Palmer. I am an employee of STRAND Lighting LLC (Subsidiary of Signify Holdings). I am over the age of eighteen and otherwise competent to make this declaration. I have personal knowledge of the facts herein, and, if called as a witness, can competently testify to these facts.

2. I am the Vari-Lite and Strand Luminaires Product Manager at Signify. I have been employed in this role since April 2013. I was first hired in this role by Royal Philips Lighting, but the employer I work for has changed several times, due to various acquisitions of the group I work for.

3. As further background, Vari-Lite Inc. was incorporated in the 1980s and was one of the first companies to manufacture moving lights for entertainment lighting effects. Around 2002, the Vari-Lite luminaire manufacturing and sales divisions were sold to Genlyte Group. Separately, Strand was formed in 1914 in London, United Kingdom, and was acquired by various companies over the years, before Genlyte Group also acquired Strand on or around July 11, 2006. Genlyte Group was thereafter acquired by Royal Philips Lighting around 2008. The lighting division of Royal Philips Lighting was spun off around 2016. In 2018, Royal Philips Lighting renamed as Signify. “Vari-Lite” and “Strand Lighting” and their legacy product ranges of Showline and Selecon luminaires are now run as independent brands within the Signify parent group.

4. Through my role as Product Manager, I have personal knowledge about the Vari-Lite and Strand Lighting luminaires and their documentation, including (a) past and current production lighting products, including the Showline SL PAR 155 ZOOM RGBW LED Luminaire (the “**SL PAR 155**”) and (b) the preparation and provision of user documentation, both in physical paper and digital or online formats, including to customers who purchase such products. In particular, I have personal knowledge regarding the SL PAR 155 “QuickStart Guide” bearing a date of 23 October 2013, attached as Exhibit A (the “**SL PAR 155 Quick Start Guide**”), and the SL PAR 155 “Installation and User’s Manual” bearing a date of 10 December 2013, attached as Exhibit B (the “**SL PAR 155 Manual**”).

5. Vari-Lite’s documentation, like the SL PAR 155 Quick Start Guide and SL PAR 155 Manual, are written by a technical writer for the Vari-Lite and Strand brands, based on technical specification data provided by the engineering group and product manager. They then go through a rigorous checking procedure from the technical support team and are ultimately approved by me, in my role as Product Manager. I was personally involved in the preparation, and provisioning to customers and others, of the SL PAR 155 Quick Start Guide and SL PAR 155 Manual. This includes the final approval on the documentation and the release of the documentation in the Quick Start Guide, included in the box with SL PAR 155

luminaires shipped to a purchaser or distributor. The same documentation is also released via our marketing, communication, and digital services team, including publishing of the full user manual to our website.

6. As mentioned, Vari-Lite includes a “Quick Start Guide” in the box of the products it sells. The Quick Start Guide contains safety instructions and basic usage and specifications. It also includes an Internet link and a QR code that leads to a Philips Showline webpage, where the full User’s Manual, like the SL PAR 155 Manual, can be viewed, printed, and downloaded. *See Exhibit A at 2.* Information describing the full operation and features of products, including the SL PAR 155, is only provided in the full User’s Manual (not the Quick Start Guide), with the User Manual being readily accessible on the website and clear guidance provided in the Quick Start Guide for users to download such User Manual. For environmental reasons, however, Vari-Lite does not print and include a physical copy of the full User’s Manual in the box of each product.

7. The SL PAR 155 was an update on a prior product, the SL PAR 150. The SL PAR 155 is a professional-grade lighting luminaire providing users with the ability to generate many lighting patterns and effects, and is often used in entertainment lighting and to provide special lighting effects in video and studio filming environments. Vari-Lite began transitioning from the SL PAR 150 and selling the SL PAR 155 to U.S. customers around late 2013, through distributors.

At that time, Vari-Lite sold the SL PAR 155 in the U.S. through multiple distributors, including the following companies: Barbizon lighting, 4Wall, B&H Photo, Production Resources Group, The Lighting design group, Century Lighting Services, Batts AV, Bulbtronics and Clair Solutions. Sales on the SL PAR 155 started immediately after launch, as it was a transition from the SL PAR 150 already on the market as a direct replacement product. The first sales of the SL PAR 155 were in December 2013 to dealers, and these dealers started shipping to end user customers in January 2014, with more than 1,800 SL PAR 155 units being sold within the United States from its launch around October of 2013 through the end of 2014. Around an additional 900 SL PAR 155 units were sold globally in this time period. To date, more than 10,000 SL PAR155 luminaires have been sold globally, and it can be found in all most countries around the world where Vari-Lite is represented.

8. The SL PAR 155 product ships with a “Quick Start Guide” to ensure that users can operate the luminaire via its correct DMX control map structure, and this SL PAR 155 Quick Start Guide directs users to download the full SL PAR 155 User Manual from the product website page. The SL PAR 155 User Manual includes not only important safety and care information, but also includes the full DMX data structure map and its specific functions required to control the luminaire from any lighting control console. The full SL PAR 155 User Manual

further provides details regarding function and control of the SL PAR 155 luminaire through the Display and Menu System having an interface for user input on the back of the SL PAR 155 product.

9. The SL PAR 155 Quick Start Guide bears a publication date of 23 October 2013, and the SL PAR 155 Manual bears a publication date of 10 December 2013. Based on my personal knowledge, the SL PAR 155 Quick Start Guide (attached as Exhibit A) and the SL PAR 155 Manual (attached as Exhibit B) are true and correct copies of what Vari-Lite has distributed to distributors, retailers, and customers in the United States from 2013.

10. The attached SL PAR 155 Quick Start Guide (Exhibit A) was included in the boxes of SL PAR 155s sold, directly or indirectly, from Vari-Lite to distributors, retailers, and end-user customers since around late 2013. As mentioned above, from late 2013 until the end of 2014, around 1,800 SL PAR units were sold to in the United States to over 300 customers, and each of these customers received a copy of this Quick Start Guide with the purchase of their SL PAR 155. These same customers were also provided with a copy of the SL PAR 155 Manual (Exhibit B) through the link and QR code on page 2 of the SL PAR 155 Quick Start Guide. Providing our customers with easy access to the full SL PAR 155 Manual in this way was important; this enabled our customers to get

information required for the operation of the SL PAR 155, which was not included in the SL PAR 155 Quick Start Guide itself.

11. Since late 2013, persons interested in the SL PAR 155, including customers and other interested parties, could also obtain information about the SL PAR 155 and copies of the SL PAR 155 Manual from our website. In 2013, this website was www.philips.com/showline. Such can be seen on page two of the SL PAR 155 Manual. This same manual still remains available via www.philips.com/showline, which now redirects to our current website at www.vari-lite.com. Beginning in 2019, as part of the restructuring of the four product Philips lines—Vari-Lite, Strand Lighting, Selecon & Showline—into two brands, the legacy Showline and Selecon websites are redirected to the Vari-Lite and Strand website pages.

12. Vari-Lite posted the attached SL PAR 155 Manual to its website for customers and the public in general to view, access, and download in late 2013, after the product was launched (as noted above). Our website in 2013 (and still now) has a section titled “Products,” which includes the SL PAR 155. The SL PAR 155 product page then (and now) has various sub-sections, including product descriptions, features, related product information, and datasheets, along with a section titled “Downloads.” The “Downloads” section in turn has links to various documentation on the SL PAR 155, including the SL PAR 155 Manual (labeled

“User Manual”). This web page, and the downloadable version of the SL PAR 155 User Manual thereon, were available to the public following the release of the product in late 2013.

13. I declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true and, further, that these statements were made with the knowledge that willful false statements and the like are punishable by fine, imprisonment, or both, under the laws of the United States, including Section 1001 of Title 18 of the U.S. Code.

// Signature Page Follows //

Executed on 9 August 2021

A handwritten signature in black ink, appearing to read 'Martin Palmer', is written over a horizontal line.

Special Product Information

In addition to the information contained in "Warnings and Notices" on page 2, please read the special product information below.

Note: Products described in and covered by this manual use Light Emitting Diodes (LEDs) as their light source. The Blue LED and objects with high color temperature used in these products have been classified to and compliant with EN 62471-2008 in risk group 2 (RG 2) at a distance of 200mm and are classified under Blue light hazard assessment according to IEC/TR 62778. Yellow and red LEDs can be classified in exempt group (RG 0).

CAUTION: Possible hazardous optical radiation may be emitted from the products described herein. Do not stare directly into light sources. May be harmful to the eyes.

Note: The light source contained in this luminaire shall only be replaced by the manufacturer, authorized service center or similar qualified person.

About Quickstart Guide

This Quickstart Guide is intended for a knowledgeable user to unpack, install, and use the SL PAR 155 ZOOM RGBW LED Luminaire in a short time period. For the complete manual in PDF format, please visit our web site at: www.philips.com/showline and click the user manual download link on the product page. The complete manual provides you all information related to accessories, menu structures, DMX channel mapping/modes, and care for your new luminaire.

Use your smartphone to connect directly to the SL PAR 155 ZOOM RGBW LED Luminaire product page to download the product manual and additional product information.

Included Items

Each SL PAR 155 ZOOM RGBW LED Luminaire includes the following items:

Figure 1-1: Included Items

Warnings and Notices

When using electrical equipment, basic safety precautions should always be followed including the following:

- **READ AND FOLLOW ALL SAFETY INSTRUCTIONS.**
- Do not use outdoors.
- Do not mount near gas or electric heaters.
- Equipment should be mounted in locations and at heights where it will not readily be subjected to tampering by unauthorized personnel.
- The use of accessory equipment not recommended by the manufacturer may cause an unsafe condition.
- Do not use this equipment for other than intended use.
- Refer service to qualified personnel.

SAVE THIS DOCUMENT FOR FUTURE REFERENCE! READ COMPLETELY BEFORE INSTALLING AND USING PRODUCT!

WARNING: You must have access to a main circuit breaker or other power disconnect device before installing any wiring. Be sure that power is disconnected by removing fuses or turning the main circuit breaker off before installation. Installing the device with power on may expose you to dangerous voltages and damage the device. A qualified electrician must perform this installation.

WARNING: Refer to National Electrical Code® and local codes for cable specifications. Failure to use proper cable can result in damage to equipment or danger to personnel.

WARNING: This equipment is intended for installation in accordance with the National Electric Code® and local regulations. It is also intended for installation in indoor applications only. Before any electrical work is performed, disconnect power at the circuit breaker or remove the fuse to avoid shock or damage to the control. It is recommended that a qualified electrician perform this installation.

Service and Maintenance

For all service and maintenance issues, please contact your local Showline office or an Authorized Service Center.

Power Requirements

The SL PAR 155 ZOOM RGBW LED Luminaire operates on AC input voltages from 100 to 240 VAC.

WARNING: This unit does not contain an ON/OFF switch. Always disconnect power input cable to completely remove power from unit when not in use.

AC Power Operation

When connected to an AC source, the unit operates on 100 to 240 volts AC (+/- 10%, auto-ranging). The luminaire contains an auto-ranging power supply. Each luminaire can draw up to 150 Watts.

WARNING: Maximum amount of units that may be daisy-chained is (A) 13 units 100VAC (20 Amps) or (B) 32 units 240VAC (20 Amps). Refer to Table 1-1 for detailed information at various voltages.

Note: For wiring of AC input connector, refer to Connecting a SL PAR 155 ZOOM RGBW LED Luminaire to AC Power.

Table 1-1: SL PAR 155 ZOOM RGBW LED Luminaire Voltage vs. Current

Voltage (AC)	Total Current (A)	Maximum number of units that can be linked together*	Voltage (AC)	Total Current (A)	Maximum number of units that can be linked together*
100	1.50	13	180	0.83	24
110	1.36	14	190	0.79	25
120	1.25	16	200	0.75	26
130	1.15	17	210	0.70	28
140	1.07	18	220	0.68	29
150	1.00	20	230	0.65	30
160	0.94	21	240	0.63	32
170	0.88	22			

WARNING: *These figures are based on the Maximum Allowable Input Current of 20 Amps (and the maximum power supply limit of 150 Watts). Do not overload circuits!

IMPORTANT AC POWER CONNECTION NOTES:

- When using the daisy-chain connection method, ONLY connect SL PAR 155 ZOOM RGBW LED Luminaire(s) to AC Output Connection of a SL PAR 155 ZOOM RGBW LED Luminaire. DO NOT CONNECT OTHER TYPES OF LUMINAIRES OR DEVICES!
- Use only use approved cable types.
- Do not overload circuits!
- Do not connect SL PAR 155 ZOOM RGBW LED Luminaires to dimmed circuits.
- The MAXIMUM allowable number of SL PAR 155 ZOOM RGBW LED Luminaires which can be 'daisy chained' on one 20A power feed are listed in Table 1-1. DO NOT EXCEED!

Connecting Power

Units can be powered in one of two ways:

- Direct connection to a AC power source using an AC input cable. For wiring of AC input connector, refer to Connecting a SL PAR 155 ZOOM RGBW LED Luminaire to AC Power.
- Connection from the AC output of another SL PAR 155 ZOOM RGBW LED Luminaire. When using this method, it is very important not to connect any other type of equipment.

WARNING: Only connect other SL PAR 155 ZOOM RGBW LED Luminaires to the AC Output (Thru) connector of a SL PAR 155 ZOOM RGBW LED Luminaire.

Connecting a SL PAR 155 ZOOM RGBW LED Luminaire to AC Power

Table 1-2, AC Input Connections describes how to connect power to your SL PAR 155 ZOOM RGBW LED Luminaire. Field wiring of the SL PAR 155 ZOOM RGBW LED Luminaire is straight forward. A total of 3 wires/conductors is supplied to the unit.

Table 1-2: AC Input Connections

AC Input Connections - EU Standard		AC Input Connections - US/CAS Standard	
Wire Color	Purpose	Wire Color	Purpose
Brown	Main / Line (100 to 240VAC)	Black	Main / Line (100 to 240VAC)
Blue	Neutral	White	Neutral
Green/Yellow	Ground (Earth)	Green/Yellow	Ground (Earth)

AC Input and Output Connections

Figure 1-2: AC Input & Output Connections

Connecting to the DMX Network

Basic DMX512 installation consists of connecting multiple SL PAR 155 ZOOM RGBW LED Luminaires together (up to 32 luminaires) in "daisy-chain" fashion. A cable runs from the control console (or DMX512 control source) to the DMX connector on the first SL PAR 155 ZOOM RGBW LED Luminaire. Another cable runs from the other DMX connector on the first unit to a DMX connector on the next SL PAR 155 ZOOM RGBW LED Luminaire (or DMX512 device to be controlled).

Table 1-3: DMX512 Connections

DMX512 Signal	XLR Pin
Common (Drain)	1
DMX512 -	2
DMX512 +	3

Note: Remaining pins on each connector are not used.

Mounting Luminaire

The SL PAR 155 ZOOM RGBW LED Luminaire is provided with the ability to hang via truss hooks, clamps, etc. (sold separately). Simply attach hook, clamp, etc. to the SL PAR 155 ZOOM RGBW LED Luminaire yoke assembly in the provided M12 holes. It is recommended (and may be required by local and national safety codes) to use and install a safety cable (sold separately). When hanging the fixture, be sure to leave enough space around the luminaire to allow proper, uninterrupted airflow for cooling.

Floor Mounting

The SL PAR 155 ZOOM RGBW LED Luminaire is designed to sit directly on its yoke assembly in a floor installation application. When used in this type of application, using the provided 5 mm Allen wrench, loosen the locking allen-head screw securing the inner portion of the yoke assembly and pivot out (as shown below). Retighten the allen-head screw to secure in place. Be sure to leave enough space around the luminaire to allow proper, uninterrupted airflow for cooling.

Figure 1-3: Mounting Luminaire

Setting / Adjusting Zoom

The SL PAR 155 ZOOM RGBW LED Luminaire has a user-adjustable, manual zoom. The zoom is easily changed by loosening both the zoom adjustment knobs on each side of the luminaire head and sliding the zoom mechanism backwards or forwards as desired. Once desired zoom is set, simply hand-tighten the two zoom knobs. *Do not over tighten or tighten with a tool!*

Figure 1-4: Zoom Adjustment

Note: The zoom range for this luminaire is 15 to 70 degrees. The movement of the zoom mechanism is a very short travel distance. The narrow output is when the adjustment knobs are closest to the yoke and the widest is when they are closest to the front of the unit.

LCD Display and Menu System

The SL PAR 155 ZOOM RGBW LED Luminaire's LCD Display and Menu System provides local control for accessing the following fixture's settings:

- Presets (Standard and User Defined)
- Color Filters
- Effects (Chases - preloaded and user defined)
- Strobe / Timing
- Fixture Settings
- Fixture Lockout (to prevent changes)
- Password Setting
- Current Fixture Operational Status
- Setting the DMX512 Address

Note: If there are multiple luminaires in a system, changes would need to be made at each LCD Menu as desired.

Upon power up, the LCD will display the main screen showing the product name. If DMX is enabled, the programmed address will appear after power up.

Figure 1-5: LCD Display and Menu System

Note: Menu rotates with orientation of Luminaire and menu buttons are always in the same position (with rotation of menu)

LCD Display and Menu System Operation

The LCD Display Menu system consists of several categories. Use the Menu Buttons to access and make changes to the menu items. When the desired menu item is reached, press the desired Menu Button to display the menu options and to navigate and configure the menu options as required.

To navigate and access menu settings/selections:

- Step 1. Make sure unit is powered and turned on.
- Step 2. Press the desired button (as shown in Figure 1-5) to access menu categories.
- Step 3. Use UP | DOWN | LEFT | RIGHT arrow buttons to navigate through the various options and settings.
- Step 4. Make changes as desired.
- Step 5. Press CHECK MARK (OK) button to accept changes.

QuickStart Guide

Quick Selection Buttons

When in Manual Mode, the SL PAR 155 ZOOM RGBW LED Luminaire's features can be accessed via the on-board LCD menu system or via three quick select buttons:

- Edit a Preset Button
- Edit a Chase Button
- DMX Address Button

Edit a Preset Button

To edit and save a preset:

- Step 1. Press Edit a Preset button. Current preset will be shown.
- Step 2. Use LEFT and RIGHT arrow buttons to scroll through all presets.
- Step 3. Once at desired preset, use UP and DOWN arrows to access (highlight) preset parameters. Once in desired parameter, use LEFT and RIGHT arrow buttons to adjust parameter value as desired.
- Step 4. Once all values are adjusted as desired, press OK (Check Mark) button.
- Step 5. Save preset menu option will appear. Use LEFT and RIGHT arrow buttons to select preset number.
- Step 6. If saving preset, press OK (Check Mark) button. Confirm choice.
- Step 7. Preset is now saved.

Edit a Preset

Edit a Chase Button

To edit and save a chase:

- Step 1. Press Edit a Chase button. Current chase will be shown.
- Step 2. Use LEFT and RIGHT arrow buttons to scroll through all chases (Built In and User Chases).

Note: For Built In Chases, only the Speed and Fade parameters may be changed and saved. For User Chases, Chase Number, Total Steps, Speed, and Fade Parameters may be changed and saved.

- Step 3. Once at desired chase, use UP and DOWN arrows to access (highlight) chase parameters. Once in desired parameter, use LEFT and RIGHT arrow buttons to adjust parameter value as desired.
- Step 4. Once all values are adjusted as desired, press OK (Check Mark) button.
- Step 5. Save chase menu option will appear. Use LEFT and RIGHT arrow buttons to select chase number.
- Step 6. If saving chase, press OK (Check Mark) button. Confirm choice.
- Step 7. Chase is now saved.

Edit a Chase

DMX Address Button

To edit and save a DMX address:

- Step 1. Press DMX Address button. Current DMX Address will be shown.
- Step 2. Press OK (Check Mark) button to highlight a digit in the DMX address.
- Step 3. Use LEFT and RIGHT arrow buttons to scroll through all digits.
- Step 4. Once at desired digit, use UP and DOWN arrows to change highlighted digit. Once digit is set, use LEFT and RIGHT arrow buttons to set other digits in DMX address.
- Step 5. Once all digits are set in DMX address, press OK (Check Mark) button.
- Step 6. DMX will display and is saved.

DMX Address

Note: Refer to "8-Bit Modes" on page 7 for DMX mapping information for this product. Additional DMX mapping information is also available in the product user's manual which is available on the Showline web site.

8-Bit Modes

The SL PAR 155 ZOOM RGBW LED Luminaire offers two 8-bit DMX control modes. Below is a summary of each mode:

- **Enhanced 8-Bit Mode:** Table 1-4 provides DMX channel mapping of all DMX512 control values when the SL PAR 155 ZOOM RGBW LED Luminaire is in *Enhanced 8-bit DMX512 Mode* (as set by the luminaire's menu system).
- **Simple 8-Bit Mode:** Table 1-5 on page 9 provides DMX channel mapping of all DMX512 control values when the SL PAR 155 ZOOM RGBW LED Luminaire is in *Simple 8-bit DMX512 Mode* (as set by the luminaire's menu system).

Note: For all other DMX Modes, refer to the luminaire's user manual available for download on the Showline web site.

Enhanced 8-Bit Mode

Table 1-4: SL PAR 155 ZOOM RGBW LED Luminaire DMX Channel Mapping (Enhanced 8-Bit Mode)

DMX Channel	Parameter	Range DMX	Range%	Default - recommended console default values	Description
1	Master Intensity	0 - 255	0 - 100%	0	8-bit control for Intensity of LED settings. <i>Select presets, variable color filters or chases as follows:</i> Channel OFF (disabled) DMX 0 - 4 Preset 0 (OFF) DMX 5 - 6 Preset 1 DMX 7 - 8 Preset 2 DMX 9 - 10 Preset 3 DMX 11 - 12 Preset 4 DMX 13 - 14 Preset 5 DMX 15 - 16 Preset 6 DMX 17 - 18 Preset 7 DMX 19 - 20 Preset 8 DMX 21 - 22 Preset 9 DMX 23 - 24 Preset 10 DMX 25 - 26 Preset 11 DMX 27 - 28 Preset 12 DMX 29 - 30 Preset 13 DMX 31 - 32 Preset 14 DMX 33 - 34 Preset 15 DMX 35 - 36 Preset 16 DMX 37 - 38 Preset 17 DMX 39 - 40 Preset 18 DMX 41 - 42 Preset 19 DMX 43 - 44 Preset 20 DMX 45 - 46 Preset 21 DMX 47 - 48 Preset 22 DMX 49 - 50 Preset 23 DMX 51 - 52 Preset 24 DMX 53 - 54 Preset 25 DMX 55 - 56 Preset 26 DMX 57 - 58 Preset 27 DMX 59 - 60 Preset 28 DMX 61 - 62 Preset 29 DMX 63 - 64 Preset 30 DMX 65 - 66 Preset 31 DMX 67 - 68 CF_0_Color OFF DMX 69 - 70 CF_1_White 10000K DMX 71 - 72 CF_2_White 8000K DMX 73 - 74 CF_3_White 6500K DMX 75 - 76 CF_4_White 5600K DMX 77 - 78 CF_5_White 5000K DMX 79 - 80 CF_6_White 4500K DMX 81 - 82 CF_7_White 4000K DMX 83 - 84 CF_8_White 3200K DMX 85 - 86 CF_9_White 3000K DMX 87 - 88 CF_10_White 2700K DMX 89 - 90 CF_11_Moroccan Pink DMX 91 - 92 CF_12_Pink DMX 93 - 94 CF_13_Flesh Pink DMX 95 - 96 CF_14_Bright Rose DMX 97 - 98 CF_15_Follies Pink DMX 99 - 100 CF_16_Fuchsia Pink DMX 101 - 102 CF_17_Surprise Pink DMX 103 - 104 CONTINUED NEXT PAGE

IMPORTANT INFORMATION

Warnings and Notices

When using electrical equipment, basic safety precautions should always be followed including the following:

- a. **READ AND FOLLOW ALL SAFETY INSTRUCTIONS.**
- b. Do not use outdoors.
- c. Do not mount near gas or electric heaters.
- d. Equipment should be mounted in locations and at heights where it will not readily be subjected to tampering by unauthorized personnel.
- e. The use of accessory equipment not recommended by the manufacturer may cause an unsafe condition.
- f. Do not use this equipment for other than intended use.
- g. Refer service to qualified personnel.

SAVE THESE INSTRUCTIONS.

WARNING: You must have access to a main circuit breaker or other power disconnect device before installing any wiring. Be sure that power is disconnected by removing fuses or turning the main circuit breaker off before installation. Installing the device with power on may expose you to dangerous voltages and damage the device. A qualified electrician must perform this installation.

WARNING: Refer to National Electrical Code® and local codes for cable specifications. Failure to use proper cable can result in damage to equipment or danger to personnel.

WARNING: This equipment is intended for installation in accordance with the National Electric Code® and local regulations. It is also intended for installation in indoor applications only. Before any electrical work is performed, disconnect power at the circuit breaker or remove the fuse to avoid shock or damage to the control. It is recommended that a qualified electrician perform this installation.

Additional Resources for DMX512

For more information on installing DMX512 control systems, the following publication is available for purchase from the United States Institute for Theatre Technology (USITT), "Recommended Practice for DMX512: A Guide for Users and Installers, 2nd edition" (ISBN: 9780955703522). PREFACE

1. About this Manual

The document provides installation and operation instructions for the following products:

- SL PAR 155 ZOOM RGBW LED Luminaire

Please read all instructions before installing or using this product. *Retain this manual for future reference.* Additional product information and descriptions may be found on the product specification sheet.

Note: The SL PAR 155 ZOOM RGBW LED Luminaires are universal voltage 100 to 240 VAC (auto-ranging).

2. Included Items

Each SL PAR 155 ZOOM RGBW LED Luminaire includes the following items:

Figure 1: Included Items

3. Accessories

Contact your Authorized Showline Dealer for price and availability of all accessories for SL PAR 155 ZOOM RGBW LED Luminaires.

SL PAR 155 ZOOM RGBW LED Luminaire Power Input Cables (North American Models Only)

Part Number	Description
PC1BE	SL PAR 155 ZOOM RGBW LED Luminaire AC Power Input Cable (39 inches / 1 meter), Powercon with Bare End* (*Note, user supplies and installs own AC input connector)
PC1GP	SL PAR 155 ZOOM RGBW LED Luminaire AC Power Input Cable (39 inches / 1 meter), Powercon with Stagepin Connector
PC1GTL	SL PAR 155 ZOOM RGBW LED Luminaire AC Power Input Cable (39 inches / 1 meter), Powercon with Twistlock Connector
PC1GR	SL PAR 155 ZOOM RGBW LED Luminaire AC Power Input Cable (39 inches / 1 meter), Powercon with Edison Connector
PC3BE	SL PAR 155 ZOOM RGBW LED Luminaire AC Power Input Cable (9.8 Feet / 3 meter), Powercon with Bare End* (*Note, user supplies and installs own AC input connector)
PC8BE	SL PAR 155 ZOOM RGBW LED Luminaire AC Power Input Cable (26 Feet / 8 meter), Powercon with Bare End* (*Note, user supplies and installs own AC input connector)
PC8GR	SL PAR 155 ZOOM RGBW LED Luminaire AC Power Input Cable (26 Feet / 8 meter), Powercon with Edison Connector

SL PAR 155 ZOOM RGBW LED Luminaire Accessories

Part Number	Description
MC	Mega Claw, Black, Anodized
SC	Molded Yoke C-Clamp
HC	Light Weight Half Coupler
82003	Safety Cable

SL PAR 155 ZOOM RGBW LED LUMINAIRE OVERVIEW

1. SL PAR 155 ZOOM RGBW LED Luminaire Components

Common Luminaire Components

* Truss hooks and clamps are sold separately.

Figure 2: SL PAR 155 ZOOM RGBW LED Luminaire Common Components

LCD Display / Menu System**Figure 3: LCD Display & Menu System**

Note: For Menu operation and programming details, refer to "LCD Display and Menu System Operation" on page 14.

INSTALLATION AND SET UP

1. Power Requirements

The SL PAR 155 ZOOM RGBW LED Luminaires operate on AC input voltages from 100 to 240 VAC.

WARNING! SL PAR 155 ZOOM RGBW LED Luminaires do not contain an ON/OFF switch. Always disconnect power input cable to completely remove power from the luminaire when not in use.

AC Power Operation

When connected to an AC source, the unit operates on 100 to 240 volts AC (+/- 10%, auto-ranging). The luminaire contains an auto-ranging power supply. Each luminaire can draw up to 150 Watts.

WARNING! Maximum amount of units that may be daisy-chained is (A) 16 units at 120VAC (20 Amps) or (B) 32 units at 240VAC (20 Amps). Refer to Table 1 for detailed information at various voltages.

Table 1: SL PAR 155 ZOOM RGBW LED Luminaire Voltage (VAC) vs. Current*

Voltage (AC)	Total Current (A)	Maximum number of units that can be linked together*	Voltage (AC)	Total Current (A)	Maximum number of units that can be linked together*
100	1.50	13	180	0.83	24
110	1.36	14	190	0.79	25
120	1.25	16	200	0.75	26
130	1.15	17	210	0.70	28
140	1.07	18	220	0.68	29
150	1.00	20	230	0.65	30
160	0.94	21	240	0.63	32
170	0.88	22			

WARNING! *These figures are based on the Maximum Allowable Input Current of 20 Amps (and the maximum power supply limit of 150 Watts). Do not overload circuits!

Note: For wiring of AC input connector, refer to "Connecting SL PAR 155 ZOOM RGBW LED Luminaires to AC Power" on page 9.

2. Connecting Power

Units can be powered in one of two ways:

- Direct connection to a AC power source using an AC input cable. AC input cable accessories are described in "SL PAR 155 ZOOM RGBW LED Luminaire Power Input Cables (North American Models Only)" on page 5. For wiring of AC input connector, refer to "Connecting SL PAR 155 ZOOM RGBW LED Luminaires to AC Power" on page 9.
- Connection from the AC output of another SL PAR 155 ZOOM RGBW LED Luminaire. When using this method, it is very important not to connect any other type of equipment device.

WARNING! Only connect other SL PAR 155 ZOOM RGBW LED Luminaires to the AC Output (Thru) connector of a SL PAR 155 ZOOM RGBW LED Luminaire.

Connecting SL PAR 155 ZOOM RGBW LED Luminaires to AC Power

If you did not order an AC input cable accessory with your unit, Table 2 describes how to connect power to your SL PAR 155 ZOOM RGBW LED Luminaire. Field wiring of the SL PAR 155 ZOOM RGBW LED Luminaire is straight forward. A total of 3 wires/conductors need to be brought to the unit. The following wiring scheme is required:

Table 2: SL PAR 155 ZOOM RGBW LED Luminaire AC Input Connections

Wire Color	Purpose
Brown	Main / Line (100 to 240VAC)
Blue	Neutral
Green/Yellow	Ground (Earth)

Figure 4: SL PAR 155 ZOOM RGBW LED Luminaire AC Input & Output Connections

CAUTION: In the event the AC input cable of this luminaire is damaged, it must be replaced, by the user, with an approved cable through an Authorized Showline Dealer or Service Center.

3. Connecting to the DMX512 Network

Basic DMX512 installation consists of connecting multiple SL PAR 155 ZOOM RGBW LED Luminaires together (up to 32 luminaires) in "daisy-chain" fashion. A cable runs from the control console (or DMX512 control source) to the DMX connector on the first SL PAR 155 ZOOM RGBW LED Luminaire. Another cable runs from the other DMX connector on the first unit to a DMX connector on the next SL PAR 155 ZOOM RGBW LED Luminaire (or DMX512 device to be controlled).

Figure 5: SL PAR 155 ZOOM RGBW LED Luminaire DMX512 Input / Output Connections

Note: For more information on DMX512 networking and systems, refer to "Additional Resources for DMX512" on page 1. For SL PAR 155 ZOOM RGBW LED Luminaire DMX Mapping, refer to "DMX CONTROL" on page 24.

DMX512 Connections	
DMX512 Signal	XLR Pin
Common (Drain)	1
DMX512 -	2
DMX512 +	3

Note: Remaining pins on each connector are not used.

Figure 6: SL PAR 155 ZOOM RGBW LED Luminaire - DMX512 Connections

4. Mounting Luminaire

Truss / Hanging Applications

The SL PAR 155 ZOOM RGBW LED Luminaire is provided with the ability to hang via truss hooks, clamps, etc. (sold separately). Simply attach hook, clamp, etc. to the SL PAR 155 ZOOM RGBW LED Luminaire enclosure assembly in the provided M13 holes. It is recommended (and may be required by local and national safety codes) to use and install a safety cable (sold separately) as illustrated in Figure 7. When hanging the fixture, be sure to leave enough space around the luminaire to allow proper, uninterrupted airflow for cooling and positioning. refer to "Luminaire Dimensions" on page 43 for spacing (dimensional) requirements.

Note: Mounting hooks, clamps, safety cables, etc. are sold separately or by others. For mounting accessories available for this product, refer to "Accessories" on page 5.

Figure 7: Luminaire and Yoke Components

Figure 8: Mounting the Fixture - Hanging Applications

Floor Mounting

The SL PAR 155 ZOOM RGBW LED Luminaire is designed to sit directly on its yoke assembly in a floor installation application. When used in this type of application, using the provided 5 mm Allen wrench, loosen the locking allen-head screw securing the inner portion of the yoke assembly and pivot out (as shown in Figure 9). Retighten the allen-head screw to secure in place. Be sure to leave enough space around the luminaire to allow proper, uninterrupted airflow for cooling.

Figure 9: Floor Mounting

Setting / Adjusting Zoom

The SL PAR 155 ZOOM RGBW LED Luminaire has a user-adjustable, manual zoom. The zoom is easily changed by loosening both the zoom adjustment knobs on each side of the luminaire head and sliding the zoom mechanism backwards or forwards as desired. Once desired zoom is set, simply hand-tighten the two zoom knobs. *Do not over tighten or tighten with a tool!*

Figure 10: Zoom Adjustment

Note: The zoom range for this luminaire is 8 to 40 degrees. The movement of the zoom mechanism is a very short travel distance. The narrow output is when the adjustment knobs are closest to the yoke and the widest is when they are closest to the front of the unit.

OPERATION AND PROGRAMMING

1. LCD Display and Menu System

The SL PAR 155 ZOOM RGBW LED Luminaire's LCD Display and Menu System provides local control for accessing the following fixture's settings:

- Presets (Standard and User Defined)
- Color Filters
- Effects (Chases - preloaded and user defined)
- Strobe / Timing
- Fixture Settings
- Fixture Lockout (to prevent changes)
- Password Setting
- Current Fixture Operational Status
- Setting the DMX512 Address

Note: If there are multiple luminaires in a system, changes would need to be made at each LCD Menu as desired. For SL PAR 155 ZOOM RGBW LED Luminaire menu structure, see "SL PAR 155 ZOOM RGBW LED Luminaire Main Menu Options" on page 15.

Upon power up, the LCD will display the main screen showing the product type/name. If DMX is enabled, the programmed address will appear after power up.

2. LCD Display and Menu System Operation

The LCD Display Menu system consists of several categories. Use the Menu Buttons to access and make changes to the menu items. When the desired menu item is reached, press the desired Menu Button to display the menu options and to navigate and configure the menu options as required.

To navigate and access menu settings/selections:

- Step 1. Make sure unit is powered and turned on.
- Step 2. Press the desired button (as shown in **Figure 11 on page 15**) to access menu categories.
- Step 3. Use UP | DOWN | LEFT | RIGHT arrow buttons to navigate through the various options and settings.
- Step 4. Make changes as desired.
- Step 5. Press CHECK MARK (OK) button to accept changes.

Figure 11: LCD Display and Menu System

3. SL PAR 155 ZOOM RGBW LED Luminaire Main Menu Options

Presets

Presets are stored values of the luminaire's LED settings that can be recalled via the menu system or DMX. You can customize up to 31 presets via the menu system.

Recalling or Editing Presets

To recall or edit a preset:

- Step 1. Select Preset from the main menu or from the Preset shortcut key.
- Step 2. The top left field indicates the current preset or Off, when this field is selected (highlighted in blue), use the left and right buttons to scroll through all presets
- Step 3. If you wish to edit the preset, use the Up and Down keys to scroll through the parameters. Once a parameter is selected, use the left and right arrow buttons to make adjustments.

Notes:

- If security features are enabled, the Up and Down arrows will have no effect. See "Settings/Security" on page 17.
 - Depending on the DMX map set assigned the DMX menu, different either RGBW or HSIC parameters will be available.
- Step 4. Once all values are adjusted as desired, press the Check Mark button to save the preset.
 - Step 5. The Save Preset Menu option will appear. Use the left and right arrow buttons to select the preset number to save to.

Note: This function allows you to save your current edits to a different preset number than you began editing. This is helpful to create copies of existing presets.

Step 6. Press the Check Mark button to save the preset. You will be asked to confirm your saving operation.

Step 7. The preset is now saved and can be recalled via the menu or DMX.

Color Filter

Color filters are 43 factory made colors that utilize the Harmonize Color Calibration system (refer to "Harmonize Color Calibration" on page 21 for more information). They can be recalled via the menu system or DMX.

To recall a color filter from the menu:

Step 1. Select Color Filter from the main menu

Step 2. The top indicates the current color filter or Off, when this field is selected (highlighted in blue), use the left and right buttons to scroll through all color filters.

Step 3. Use the Up and Down arrow keys to toggle to the Master Intensity field. Use the Left and Right arrow keys to adjust the Master Intensity.

Step 4. The menu will display a graphical indication of the color along with the color name.

Note: The color filter will remain ON until you select a preset, chase, other color filter or send the unit DMX.

Effects

Effects are chases stored values of the luminaire's LED settings that can be recalled via the menu system or DMX. There are 10 factory defined chases and eight user adjustable chases. You can adjust the master intensity, speed, and fade values for any of the 18 chases.

Use the Up and Down buttons to select parameters and the Left and Right buttons to assign the different general fixture settings. When finished, press the Check button to exit the menu level. The adjustable parameters are described in Table 3.

Table 3: Effects Parameters

Parameter	Description
User Chase / Built-in Chase	Select from the 18 different chases.
Master Intensity	Adjust the master intensity for ALL chases.
Total Steps	Displays the total steps used by the chase. This field is not editable.
Speed	The total time each step of the chase will be recalled.
Fade	The percentage of the time assigned by the speed that is crossfaded between steps.

Editing User Chases

Eight User chases can be further customized to create different effects on the fixture. To edit a User Chase, first use the up and down arrows to scroll to the Edit User Chase field and then press the Check Mark button. The Edit User Chase window will be displayed:

Use the Up and Down buttons to select parameters and the Left and Right buttons to assign the different general fixture settings. When finished, press the Check Mark button to exit the menu level.

Edit a Chase

To edit and save a Step:

- Step 1. Select Edit Step or New Step from the Edit User Chase menu.
- Step 2. The top left field indicates the preset or color filter to be used for the step. When set to OFF no preset or color filter is to be used. Use the left and right buttons to scroll through all presets and color filters.
- Step 3. Use the Up and Down keys to scroll through the output parameters. Once a parameter is selected, use the left and right arrow buttons to make adjustments.

Notes:

- If security features are enabled, the Up and Down arrows will have no effect. See "Settings/Security" on page 17.
- Depending on the DMX map set assigned the DMX menu, different either RGBW or HSIC parameters will be available.

Step 4. Once all values are adjusted as desired, press the Check Mark button to return to the Edit User Chase screen.

Step 5. Continue editing steps as needed. When complete, press the Return to Main Menu button or up one level (*as shown to the right*), to exit the Edit User Chase window.

Step 6. The user chase is now saved and can be recalled via the menu or DMX.

Return to Main Menu button

Strobe/Timing

The Strobe/Timing menu allows you to assign strobe and timing values from the menu system. These settings are instantly applied to any active Preset, Color filter, or chase.

Use the Up and Down buttons to select parameters and the Left and Right buttons to adjust the currently selected parameter. The adjustable parameters are described in Table 3.

Table 4: Strobe / Timing Parameters

Parameter	Description
Master Intensity	Overall fixture output intensity level.
Strobe: X	Strobe mode and rate value settings following DMX map (see SL PAR 155 ZOOM RGBW LED Luminaire DMX Mapping for details).
Duration	The time each strobe flash remains ON.
Intensity Timing	The time used to change intensity values when running a chase.
Color Timing	The time used to change color values when running a chase.

Settings/Security

All Showline fixtures have a multiple level locking feature. This allows you to configure the fixture and allow different menu access to multiple users. The menu system can be locked instantly or assigned to power on to a particular lock level. You can assign three different 4-digit PIN (personal identification number) codes to each unlock specific levels of functionality within the menu system.

Anytime the fixture is locked, each PIN code will unlock all functions except the pertaining features assigned via the security level.

Note: The Level 3 PIN will always unlock all functions.

Table 5: Security Lock Levels

Lock Level	Menu Functions Affected
Level 1	Edit Presets, Edit Chases, and Settings Menu
Level 2	Settings Menu
Level 3	All

Use the Up and Down buttons to select security PIN codes. Press the Check button and then use Left and Right and Up Down buttons to assign the pin code. Press the Check button to save the new PIN code.

The Power-Up Level parameter assigns a lock level to the fixture when power is applied. Use the Up and Down buttons to select the Power-Up Level, and then use the Left and Right buttons to select the Power-up Level option.

Table 6: PIN Level Parameters

Parameter	Description
Enter Pass PIN	Enter a PIN code matching the level codes assigned in the Settings/Security menu to toggle the current security level.
Level 1 PIN	Edit the PIN code used to toggle the Level 1 security.
Level 2 PIN	Edit the PIN code used to toggle the Level 2 security.
Level 3 PIN	Edit the PIN code used to toggle the Level 3 security.
Power-up Level	Select the security level to default to when the fixture is powered ON. • Disable PIN will disable all security functions. • Locked will lock all functions.

Settings/General

Use the Up and Down buttons to select parameters and the Left and Right buttons to assign the different general fixture settings. When finished, press the Check button to exit the menu level. The adjustable parameters are described in Table 7.

Table 7: General Level Parameters

Parameter	Description
Power-Up	Select the action of the fixture when the unit is powered ON. You can select from Off, Last Set, Color filters, presets, and chases.
Mode	Select either Master/Slave (see <i>Master / Slave Operational Mode</i> for more information).
Dim Response	Select Normal, Incandescent, or Reduced dimming response. • Normal: Fixture LEDs dim with a normal response. • Incandescent: Fixture LED's dim with an incandescent emulation response. The response to dimming commands will be slightly delayed at lower intensities. • Reduced: The response to dimming commands will be calculated with a smaller algorithm to provide emulation with other manufacturer's products.
Dimming Curve	Select one of four dimming curve choices (see <i>Dimming Curve Selection</i> for more information).
Calibration	Toggle Harmonize Color Calibration on or off (see <i>Harmonize Color Calibration</i> for more information).
Fan Control	Select Auto or Off fan operation (see <i>DMX Control Channel Settings</i> for more information).

Settings/Factory Default

Factory default menu settings can be recalled through this menu option. You can select if you wish to overwrite the user edited preset and chases.

Use the Up and Down buttons to select parameters and the Left and Right buttons to assign the different settings. When finished, press the Check button to exit the menu level. The adjustable parameters are described in Table 8.

Table 8: Factory Default Parameters

Parameter	Description
Protected	- No - all menu items are able to be restored to factory defaults. - Preset & Chase - user edited Presets and Chases are not able to be restored to factory defaults.
Load Factory	- No - no action. - Yes - restore to factory default menu settings.

Settings/DMX

DMX configuration options are available in the DMX menu.

Use the Up and Down buttons to select parameters and the Left and Right buttons to assign the fixture's DMX settings. When finished, press the Check button to exit the menu level. The adjustable parameters are described in Table 9.

Table 9: DMX Setting Parameters

Parameter	Description
DMX Enable	- Enable - Fixture will respond to DMX commands/signals. - Disable - Fixture will ignore DMX commands/signals.
Address	Assigns the fixture's DMX start address.
Map	Selects the DMX map for the fixture to use (see DMX CONTROL section for more information).
When no DMX	Selects the action of the fixture when the unit is powered ON and not receiving DMX. - Off - Turn off all LED output. - Last Action - restore the last menu action. - Power-up - follow the power-up value in the settings menu. - Hold - continue with the last DMX values received.

Settings/Display

Options of the fixture's LCD display can be adjusted in the Display menu.

Use the Up and Down buttons to select parameters and the Left and Right buttons to assign the fixture's DMX settings. When finished, press the Check button to exit the menu level. The adjustable parameters are described in Table 10.

Table 10: LCD Display Parameters

Parameter	Description
Flip Display	- Yes - The display will be inverted. - No - The display will not be inverted. - Auto - The display will automatically invert depending upon fixture orientation.
Off Time	Assign a time for the display to automatically turn off after the last button press. A value of ON will leave the display on indifferently.
Language Select	English is the only language currently supported.

Lock Fixture

You can lock all fixture functions, requiring a PIN code to access the menu functions. When you select this menu item, you are asked to confirm that you wish to lock the fixture. Once locked, all menu items can only be accessed by entering one of the three PIN codes assigned in the Settings/Security menu. (see "Settings/Security" on page 17 for more information). The PIN code used to unlock the fixture will only unlock the functionality assigned to that particular PIN code.

Note: When the fixture is powered off, the Lock Fixture function will be disabled. To assign fixture power-up security refer to (see "Settings/Security" on page 17 for more information).

Password (PassPIN)

The Password menu item will display an Enter PassPIN dialog box. Use the Up Down Left Right buttons to enter a PIN code matching the codes assigned in the Settings/Security menu to toggle the current security level.

Status

The Status screen displays the current value of the master intensity and LED intensities for each pixel control of a fixture. The number of pixels will vary depending upon fixture type. Use the Up Down Left Right arrows to scroll through the different pixels and view their levels.

- The last Status item displayed shows the RDM UID and current Firmware Version.
- Press the Check Mark button to exit the Status screen.

Quick Selection Buttons

The Showline menu system includes four quick selection buttons on the top of the menu. These keys provide direct access to common functions and act as shortcuts to main menu items as described in Table 10.

Table 11: Quick Select Buttons

Quick Select Button	Description
	Main Menu Refer to Settings/General for more information.
	Edit a Preset Refer to Recalling or Editing Presets for more information.
	Effects / Edit a Chase Refer to Effects and Editing User Chases for more information.
	DMX Start Address Refer to DMX Address for more information.
	Return to Main Menu / Return Up a Menu Item

DMX Address

You can display and edit the current DMX start address for the fixture by pressing the Quick Select button on the top of the menu system (as shown right). The current DMX start address will be display in large digits.

To edit the DMX start address:

- Step 1. Press the Check Mark button to begin the DMX start address editing. The last digit will change to a blue color.
- Step 2. Use the UP and Down arrows to change the value of the currently selected digit.
- Step 3. Use the Left and Right arrows to select another digit to adjust.
- Step 4. Press the Check Mark button to save the new DMX Start Address.

4. Harmonize Color Calibration

Harmonize is a proprietary, advanced LED color matching system, consisting of 3 correction modules: RGB, RGBW and Cool White/Warm White. Every Showline fixture undergoes rigorous testing to provide you with consistent control of color and intensity as well as output of the highest quality.

When enabled either via DMX or the fixture's menu, the Harmonize technology will ensure that colors match from fixture-to-fixture and pixel-to-pixel. As the Harmonize system matches Showline products, they will all operate in the same color space. Use the Harmonize system when perfect color matching is an essential requirement.

Note: When attempting to achieve the most saturated colors possible, disable the Harmonize color calibration.

5. Dimming Curve Selection

Through the menu, you are able to select one of four dimming curves:

- Linear Curve
- PL_Curve
- S_Curve
- Square Curve

Figure 12: SL PAR 155 ZOOM RGBW LED Luminaire Dimmer Curves

6. Master / Slave Operational Mode

The Master / Slave Operational Mode allows one SL PAR 155 ZOOM RGBW LED Luminaire to act as the "Master" unit and all other connected units are controlled by this unit. When a unit is set to "Slave" mode, it will only listen to and follow any commands sent from a "Master" unit. Only one "Master" unit is allowed in this type of operation.

To setup a master / slave network:

- Step 1. Set the first device in the DMX512 chain to **Master Mode** through the unit's menu system.
- Step 2. Set all other connected units to **Slave Mode**.
- Step 3. The master unit can be controlled via DMX512, RDM or through standalone operation (self-contained network utilizing on-board effects). The slave units will mimic the master unit's operation in all cases. All user programmed presets and chases recalled on the master will automatically play on the slaves without having to program the slaves.

Note: For more information on DMX512 networking and systems, refer to "Additional Resources for DMX512" on page 1. For SL PAR 155 ZOOM RGBW LED Luminaire DMX Mapping, refer to "DMX CONTROL" on page 24.

Figure 13: SL PAR 155 ZOOM RGBW LED Luminaire - Master / Slave Configuration

DMX CONTROL

This section contains information for operating the luminaire using DMX control in 16-bit, 8-Bit, or HSIC (Hue, Saturation, Intensity and Color Correction) modes. For Menu options and detailed information, see "LCD Display and Menu System" on page 14.

Note: These tables assume a DMX start address of 1. When a different starting address is used, this address becomes channel 1 function and other functions follow in sequence.

1. SL PAR 155 ZOOM RGBW LED Luminaire DMX Mapping

16-Bit Mode

Table 12 provides DMX channel mapping of all DMX512 control values when the SL PAR 155 ZOOM RGBW LED Luminaire is in 16-bit DMX512 mode (as set by the luminaire's menu system).

Table 12: SL PAR 155 ZOOM RGBW LED Luminaire DMX Channel Mapping (16-Bit Mode)

DMX Channel	Parameter	Range DMX	Range%	Default - recommended console default values	Description
1	Master Intensity - High	0 - 65535	0 - 100%	0	16-bit control for Intensity of LED settings.
2	Master Intensity - Low				
3	Color Presets	0 - 255	0 - 100%	0	Select presets, variable color filters or chases as follows: Channel OFF (disabled) DMX 0 - 4 Preset 0 (OFF) DMX 5 - 6 Preset 1 DMX 7 - 8 Preset 2 DMX 9 - 10 Preset 3 DMX 11 - 12 Preset 4 DMX 13 - 14 Preset 5 DMX 15 - 16 Preset 6 DMX 17 - 18 Preset 7 DMX 19 - 20 Preset 8 DMX 21 - 22 Preset 9 DMX 23 - 24 Preset 10 DMX 25 - 26 Preset 11 DMX 27 - 28 Preset 12 DMX 29 - 30 Preset 13 DMX 31 - 32 Preset 14 DMX 33 - 34 Preset 15 DMX 35 - 36 Preset 16 DMX 37 - 38 Preset 17 DMX 39 - 40 Preset 18 DMX 41 - 42 Preset 19 DMX 43 - 44 Preset 20 DMX 45 - 46 Preset 21 DMX 47 - 48 Preset 22 DMX 49 - 50 Preset 23 DMX 51 - 52 Preset 24 DMX 53 - 54 Preset 25 DMX 55 - 56 Preset 26 DMX 57 - 58 Preset 27 DMX 59 - 60 Preset 28 DMX 61 - 62 Preset 29 DMX 63 - 64 Preset 30 DMX 65 - 66 Preset 31 DMX 67 - 68

8-Bit Modes

The SL PAR 155 ZOOM RGBW LED Luminaire offers two 8-bit DMX control modes. Below is a summary of each mode:

- **Enhanced 8-Bit Mode:** Table 13 on page 27 provides DMX channel mapping of all DMX512 control values when the SL PAR 155 ZOOM RGBW LED Luminaire is in **Enhanced 8-bit DMX512 Mode** (as set by the luminaire's menu system).
- **Simple 8-Bit Mode:** Table 14 on page 29 provides DMX channel mapping of all DMX512 control values when the SL PAR 155 ZOOM RGBW LED Luminaire is in **Simple 8-Bit DMX512 Mode** (as set by the luminaire's menu system).

Enhanced 8-Bit Mode

Table 13: SL PAR 155 ZOOM RGBW LED Luminaire DMX Channel Mapping (Enhanced 8-Bit Mode)

DMX Channel	Parameter	Range DMX	Range%	Default - recommended console default values	Description

Simple 8-Bit Mode**Table 14: SL PAR 155 ZOOM RGBW LED Luminaire DMX Channel Mapping (Simple 8-Bit Mode)**

DMX Channel	Parameter	Range DMX	Range%	Default - recommended console default values	Description
1	Master Intensity	0 - 255	0 - 100%	0	8-bit control for intensity of LED settings.
2	Strobe	0 - 255	0 - 100%	0	Controls strobe operations as follows: Open = DMX 0 - 2 Closed = DMX 3 - 5 Slow Rand = DMX 6 - 7 Med Rand = DMX 8 - 10 Fast Rand = DMX 11 - 12 Strobe Range = DMX 13 - 127 (fastest) Pulse + Slow Rand = DMX 128 - 129 Pulse + Med Rand = DMX 130 - 131 Pulse + Fast Rand = DMX 132 - 133 Pulse + Range = DMX 134 - 191 Pulse - Slow Rand = DMX 192 - 193 Pulse - Med Rand = DMX 194 - 195 Pulse - Fast Rand = DMX 196 - 197 Pulse - Range = DMX 198 - 255
3	Red	0 - 255	0 - 100%	0	8 bit control of Red LEDs from 0 to full.
4	Green	0 - 255	0 - 100%	0	8 bit control of Green LEDs from 0 to full.
5	Blue	0 - 255	0 - 100%	0	8 bit control of Blue LEDs from 0 to full.
6	White	0 - 255	0 - 100%	0	8 bit control of White LEDs from 0 to full.

HSIC Mode

Table 15 provides DMX channel mapping of all DMX512 control values when the SL PAR 155 ZOOM RGBW LED Luminaire is in HSIC (Hue, Saturation, Intensity, and Color Correction) DMX512 mode (as set by the luminaire's menu system).

Table 15: SL PAR 155 ZOOM RGBW LED Luminaire DMX Channel Mapping (HSIC Mode)

DMX Channel	Parameter	Range DMX	Range%	Default - recommended console default values	Description
1	Master Intensity	0 - 255	0 - 100%	0	8-bit control for intensity of LED settings.
2	Strobe	0 - 255	0 - 100%	0	Controls strobe operations as follows: Open = DMX 0 - 2 Closed = DMX 3 - 5 Slow Rand = DMX 6 - 7 Med Rand = DMX 8 - 10 Fast Rand = DMX 11 - 12 Strobe Range = DMX 13 - 127 (fastest) Pulse + Slow Rand = DMX 128 - 129 Pulse + Med Rand = DMX 130 - 131 Pulse + Fast Rand = DMX 132 - 133 Pulse + Range = DMX 134 - 191 Pulse - Slow Rand = DMX 192 - 193 Pulse - Med Rand = DMX 194 - 195 Pulse - Fast Rand = DMX 196 - 197 Pulse - Range = DMX 198 - 255
3	Duration	0 - 255	0 - 100%	0	Strobe Duration is 0 - 85 0 = DMX 0 1 = DMX 1 - 3 $x = (DMX\ Value - 1) / 3 + 1$ 85 = DMX 253-255
4	Timing	0 - 255	0 - 100%	255	Allows for timing control of intensity and color parameters. Channel should default to 255 for smoothest actions using console and/or manual fades.

Table 15: SL PAR 155 ZOOM RGBW LED Luminaire DMX Channel Mapping (HSIC Mode)

5	Control	0 - 255	0 - 100%	0	Control Channel functions of the SL Series products. Set control channel value from 0 then turn to desired action. Hold value for at least 5 seconds. Then restore control channel value to 0 without any scaling. Default Setting on Console = DMX 0-4 DIM Response_Normal = DMX 5 - 9 DIM Response_Incandescent = DMX 10 - 14 Dimming Curve_Linear = DMX 30 - 34 Dimming Curve_Square = DMX 35 - 39 Dimming Curve_S-Curve = DMX 40 - 44 Dimming Curve_PL-Curve = DMX 45 - 49 Calibration_OFF = DMX 70 - 74 Calibration_ON = DMX 75 - 79 Fan_Auto = DMX 80 - 84 Fan_Off = DMX 85 - 89 Reserved (Future use) = DMX 90 - 250
6	Hue - High Byte	0 - 65535	0 - 100%	0	16-Bit control of Hue 0 - 359 Degrees
7	Hue - Low Byte				
8	Saturation	0 - 255	0 - 100%	0	8-bit control for Saturation.
9	Intensity	0 - 255	0 - 100%	0	8-bit control for Intensity.
10	CCT	0 - 255	0 - 100%	0	Variable control of correlated color temperature (CCT) from: Channel OFF (disabled) DMX 0 - 5 2700K - 6500K. DMX 6 - 255

2. DMX Control Channel Settings

Table 10 provides details regarding control channel operation and settings. The information is applicable to each of the DMX modes: 16-bit, Enhanced 8-bit, and HSIC.

Table 16: DMX Control Channel Settings

Parameter	Description
Dim Response Normal	Fixture LEDs dim with a normal response.
Dim Response Incandescent	Fixture LED's dim with an incandescent emulation response. The response to dimming commands will be slightly delayed at lower intensities.
Dimming Curve Linear	Applies a linear control of the output of the fixture based on the DMX values on the Intensity Control Channels. See Dimming Curve Selection for additional information.
Dimming Curve Square	Applies a square law control of the output of the fixture based on the DMX values on the Intensity Control Channels. See Dimming Curve Selection for additional information.
Dimming Curve S-Curve	Applies S-Curve control of the output of the fixture based on the DMX values on the Intensity Control Channels. See Dimming Curve Selection for additional information.
Dimming Curve PL-Curve	Applies a dimming curve that follows the Vari-Lite Selecon PL series LED Luminaires control of the output of the fixture based on the DMX values on the Intensity Control Channels. See Dimming Curve Selection for additional information.
Calibration OFF	Toggle Harmonize Color Calibration off. See Harmonize Color Calibration for additional information.
Calibration ON	Toggle Harmonize Color Calibration on. See Harmonize Color Calibration for additional information.
Fan Auto	Fixture fans come on as needed and will still vary in speed, but will not exceed the factory set minimal noise limit.
Fan Off	Fixture fans will remain off in all circumstances and the fixture will automatically reduce LED output levels if LED temperatures rise above factory settings.

3. DMX Timing Channel Detail

Timing channel control improves the timed moves of certain groups of parameters. The SL PAR 155 ZOOM RGBW LED Luminaire provides timing channels in 16-bit mode (one for intensity time and one for color time) and one timing channel in 8-bit (color and intensity timing combined). The luminaire uses its timing channel value to calculate a smooth continuous operation for a given time and transition.

Guidelines:

- Timing channels support time values from zero to 60 minutes.

- To use a timing channel instead of console timing, it is recommended to set the timing channel to the desired value and set cue and/or console cue fade time to zero. A combination of time controls can produce unexpected results.
- The default value setting in the profile should be 255 (proportional control) to allow smooth operation when using console timing.
- A zero value will give the fastest operation, however, without any smoothing. Long console crossfades may appear "steppy".

Refer to "DMX Timing Channel Detail" for more information.

CLEANING AND CARE

WARNING! All cleaning should be performed with power completely removed from the luminaire. Never remove protective covers when luminaire is powered. Wear appropriate protective eye wear and gloves when cleaning the fixture. All service and maintenance, other than described herein, should be performed by a qualified technician or Authorized Service Center.

1. Special Cleaning and Care Instructions

Being a solid-state fixture, and unlike most fixtures, the SL PAR 155 ZOOM RGBW LED Luminaire requires very little routine maintenance by the user.

The SL PAR 155 ZOOM RGBW LED Luminaire special care when it comes to cleaning front lens assembly. Additional care needs to be taken with the plastic components because they are much easier to scratch or damage than glass.

The following is a list of cleaning materials required to care for your SL PAR 155 ZOOM RGBW LED Luminaire:

- Lint free lens tissue
- Lint or powder free gloves
- Reagent grade isopropyl alcohol*
- A mild soap solution.

Note: *Reagent grade isopropyl alcohol is good to use on the SL PAR 155 ZOOM RGBW LED Luminaire plastic optics.

If the lens is still dirty after using isopropyl alcohol, for instance if fingerprints or oil is just redistributed and not cleaned off the optic, then a mild soap and water solution can be used to gently wash the lens. Repeat the cleaning with isopropyl alcohol to eliminate streaks and soap residue.

WARNING! Under no circumstances should ammonia-based cleaners, acetone, or other harsh solvents be used on or near the SL PAR 155 ZOOM RGBW LED Luminaire. These types of cleaners or solvents can permanently damage the optics or housings of the fixture.

If you have any questions regarding the use or care of your SL PAR 155 ZOOM RGBW LED Luminaire, please contact Showline technical support or your local Authorized Dealer.

2. Front Lens Cleaning

To clean the front lens:

- Step 1. Turn off luminaire and allow to cool completely.
- Step 2. Apply a small amount of reagent grade isopropyl alcohol to lint-free lens tissue.
- Step 3. Wipe all debris, dirt, fingerprints, etc. from lens.
- Step 4. Using a second lint-free lens tissue, wipe off any alcohol residue.

3. Service and Maintenance

For all other service and maintenance issues, please contact your local Showline office or an Authorized Service Center.

WARNING! Disassembly (other than as described herein), alterations, unauthorized service, etc. will void the product warranty. Contact your local Showline office or an Authorized Service Center for technical support and service.

4. Accessories

Only Showline approved accessories should be used with your SL PAR 155 ZOOM RGBW LED Luminaire. For a list of approved accessories, please see "Accessories" on page 5. For questions regarding accessories, please contact your local Authorized Showline Dealer or Showline office.
