Three-dimensional design diagram

Product

Portable black box

Description of the design

1. The material is a synthetic resin material and glass material.

2. The design of the present application relates to a video recording device which is convenient to carry and used by a user who enjoys outdoor activities, in particular, sports activities. Such a device is also known as a black view sports cam or action cam, and may be used with various holders to record and store videos.

Creative concept of the design

A portable black box design of the present application has a body portion in a rectangular shape with rounded corners, has a plurality of LEDs, etc. formed on a front surface portion thereof, has a circular lens portion protruded from one side thereof, has various manipulable buttons neatly positioned on an outer edge of the body, and has a maximized sense of three-dimensionality and stability, and is thus characterized by a combination of a form and a shape that is conceived to create a novel sense of esthetics.
