SELP 18200 lens hood question

Aug 22, 2015

I own the SELP 18200 lens but would like to get a different hood for it. As you may know, it comes with a 67mm rectangular video-type lens hood which is a bit wide for easy storage in a bag. Given the design of the lens' body (protruding motor), what is a good alternate hood that will fit that lens?

(using this lens with an a6000)

Thank you.

Hi there,

I'm planning to buy the same lens and would also be interested in a rather flower-like/round lens hood (maybe invertable). So did you find a suitable hood - any recommendations?

Thanks!

ALC-SH109 is the 67mm petal-type hood that they include with the SEL18200, but does your model have the normal twist-click mount for hoods?

Even if it does work, it is hard to find as Sony sells lens hoods as replacement parts (\$\$\$) and not accessories. I had to watch ebay for a few months to wait for someone to sell one. There is one that is listed on Amazon, but it is not OEM and doesn't seem to have the correct fit or uses filter threading, not the OEM twist/click.

There is one that is listed on Amazon, but it is not OEM and doesn't seem to have the correct fit or uses filter threading, not the OEM twist/click.

Unfortunately I've not found the ALC-SH109 for a reasonable price. There is one website selling it for \$109 which is much too much, in my opinion, for a hood. It hasn't been available on Amazon for a very long time, and even on eBay it doesn't show-up too often.

I felt that pain for months. Set an ebay alert and forget about it, one day you will get an email and snatch it up. To be honest, those months without it, I shot in sunny environments on many occasions and never had a case of flaring. I didn't have the sun directly in the frame, but to me I was never sorely missing it. That said, I am still glad to have it now.

But the rectangular hood gives that lens such a classy look! It and the lens sure look like a big package, though.
