in a never-ending meeting. Try this selection of popular games for something entertaining:

- ♦ **PocketChess:** If a challenging chess game is your cup of tea, you may want to try PocketChess, from Scott Ludwig. It provides eight levels of play, an Undo Move command, and much more. For details, visit www.eskimo.com/~scottlu/.
- ♦ **Pocket Mahjong:** This Palm-size Mahjong application, developed by Harrison Leong, features a customizable rules set enabling you to use Hong Kong rules, Japanese rules, and mainland China rules. You can download Pocket Mahjong from the Pilot Gear H.Q. Web site, www.palmgear.com/.
- ♦ **Solitaire Bundle:** If you're a solitaire fan, you'll find lots to like in this bundle of 24 different solitaire games for the Palm device. Check out the smallware Web site (www.smallware.com/solitaire.html) for more information.
- ♦ **Backgammon:** Backgammon lovers will find this Palm version a welcome addition to their toy chest. Backgammon offers game statistics, a doubling cube, and a computer opponent with four skill levels and is available from Stand Alone, Inc. (www.standalone.com/).

Graphics

As amazing as it may seem, the Palm device has the capability to create, display, and manipulate graphics. The following graphics applications provide the tools you need to work with graphics on your Palm device:

- ♦ **Image Viewer III:** For viewing grayscale images on your Palm IIIx, Palm IIIe, or Palm V device, Image Viewer III is an excellent choice. It enables you to scroll images, compress images, and even attach notes. Visit the Hexcode Software Web site, at palm.dahm.com/viewer.html, for more information.
- ♦ **SketchPad:** Create everything from simple drawings to animations with this handy graphics application. You can even export your creations to Windows BMP format with the SketchPad Desktop Viewer. For more information, stop by the Arcosoft Web site, www.arcosoft.com/.
- ♦ **TealPoint:** This powerful graphics program from [TealPoint](http://www.tealpoint.com/) Software enables you to sketch, magnify, import, export, and even encrypt images. In addition, it provides a screen-capture feature. More information is available at the [TealPoint](http://www.tealpoint.com/) Web site, www.tealpoint.com/.

Internet

Whether it's for e-mail, research, shopping, or just plain surfing for fun, Palm users, like other computer users, want to get connected to the Internet. Fortunately, you can. All you need is a modem, an Internet connection, and some Internet-related software on your Palm device. The following list provides some Internet tools to get you on your way:

- ♦ **HandWeb:** This Web browser from Smartcode Software enables you to surf the Internet from your Palm device as long as you're connected via a modem. Just like its counterpart on the PC, HandWeb offers bookmarks as well as cache and history features. Visit the Smartcode Software Web site, www.smartcodesoft.com/, for details.
- ♦ **MultiMail Pro:** MultiMail Pro provides access to Internet e-mail directly from your Palm device. The program supports the POP3 and IMAP4 protocols for e-mail retrieval as well as SMTP for sending. You can find more information at the Actual Software Corporation Web site, www.actuallsoft.com/.
- ♦ **HandMail:** If you have a modem and an Internet e-mail account or an AOL e-mail account, you can send and receive e-mail from your Palm III or Palm V with HandMail, from Smartcode Software. For more information, check out the Smartcode Software Web site, www.smartcodesoft.com/.
- ♦ **One Touch Mail:** This Platinum-certified e-mail application runs on the Palm III, Palm IIIx, and Palm V as well as on the IBM WorkPad. In addition to supporting standard Internet e-mail protocols, it updates your address book automatically and allows you to apply filters and set rules. See the JP Systems Web site (www.jpssystem.com/) for details.
- ♦ **ProxiWeb:** This full-featured Web browser supports frames, secure (SSL-encrypted) Web pages, and cookies. It also offers caching and history features. You can find out more about ProxiWeb, which is available from ProxiNet (recently merged with Puma Technology), by visiting www.proxinet.com/.

Replacements for standard Palm applications

- ♦ **TealPhone:** This replacement for the Palm Address Book provides a great deal of functionality and quite a few search and customization options for improved contact management. TealPhone has enhanced search capabilities, a quick-peek index bar, a clone feature that lets you duplicate existing records, and a ton of customization options. This shareware application is available from [TealPoint Software \(www.tealpoint.com/\)](http://www.tealpoint.com/).

Instant Answers to Your Palm Computing Questions

Fun, Fast
& Cheap!®

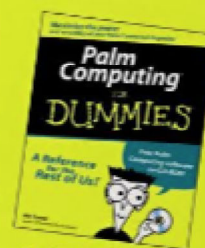

A Quick Reference for the Rest of Us!

Get in and get right out with just the information you need — without reading tons of extra material! Inside, you'll find clear-cut, plain English explanations for using all the great features of any Palm Computing device.

- Utilize all the Palm Computing functions — Date Book, Address Book, To Do List, e-mail program, desktop computer HotSynch capabilities, and more — with ease!
- Navigate the Palm OS like a pro — and connect to different operating systems
- Transfer data quickly and easily to and from your desktop computer
- Review the features of all Palm models to decide which model best suits your needs
- Take advantage of features most people miss — including passwords and shortcuts
- Plus special tips for using Graffiti and adding new programs
