and expected HCO_3^- when needed and will then tell you whether there is a concomitant acid-base disorder. It will even calculate anion gap and delta-delta if necessary. Compiled into fast, efficient machine code using Quartus Forth.

Pertinent positives: free, quickly changes between units and validates with Henderson Hasselbach equation, output diagnosis with explanation using expected values.

Pertinent negative: time consuming if you already know how to interpret ABGs.

DOCUMENT VIEWER

TealDoc

Developer: [TealPoint](http://www.tealpoint.com) Software.

Website: <http://www.tealpoint.com/softdoc.htm>

Approximate price: \$16.95.

Description: TealDoc is a full-featured reader for standard Palm Pilot docs, with quality, intuitive interface, and affordability. Supports embedded TealPaint pictures, bookmarks, headers, and hyperlink buttons. Other features include changeable fonts, convenient forward and backward searches with advanced search options, adjustable display options, and multispeed forward and backward autoscroll.

Pertinent positives: hypertext and bookmarks to ease presentation, allows for graphics to be displayed.

Pertinent negative: cannot edit within the program.

SmartDoc

Developer: Cutting Edge Software, Inc.

Website: <http://www.cesinc.com/smartdoc/smartdoc.html>

Approximate price: \$19.95.

Description: SmartDoc is the text document editor and reader application available for Palm Computing handhelds. It allows you to work with text documents on your Palm organizer. SmartDoc can be used as a supercharged MemoPad or using one of the many third-party document converters available today, you can read and edit MS Word documents directly on your device. There are thousands of useful documents, books, and reference materials ready to download for free.

Pertinent positives: can create documents and edit existing ones.

Pertinent negative: no hypertext or bookmarks.

OTHER SOFTWARE

DateBk4

Developer: Pimlico Software, Inc.

Website: <http://www.pimlicosoftware.com/datebk4.htm>

Approximate price: \$24.95.

53

DIGITAL PERIPHERAL BRAINS

Description: replaces the built-in Datebook, Todo, and Memopad applications on all models of the Palm Organizer with a considerably more powerful, integrated program that maintains the general look and feel of the original applications. Runs on *all* models of the Palm Organizer from V-2.0 on up.

Pertinent positives: great for linking data between to-do lists, memo, and phone book; adds additional views to calendar function; adds icons to ease interpretation of schedule; color support; very similar to built in DateBook so there is no time wasted learning a new application.

Pertinent negative: none.

PalmPrint

Developer: Stevens Creek Software.

Website: <http://www.stevenscreek.com/palm/palmprint.shtml>

Approximate price: \$39.95.

Description: print from your PalmPilot to a wide variety of printers, using either IrDA or the serial port. PCL, Epson-compatible, and PostScript printers are supported. PalmPrint prints memos, to-do lists, and anything on the clipboard. It also supports printing from other applications. Modified versions of the standard Palm Address Book, which prints envelopes, and of the standard Palm Mail application, which prints e-mails, are distributed with PalmPrint. A free Satellite Forms extension (SFX) allows applications written in Satellite Forms to print using PalmPrint.

Pertinent positives: allows quick "beaming" to IR capable printers, no PC needed.

Pertinent negative: text formatting (eg, bold, italics, underline) and graphics not fully supported.

TealPhone

Developer: TealPoint Software.

Website: <http://www.tealpoint.com/softphon.htm>

Approximate price: \$17.95.

Description: TealPhone is a replacement for the standard system address/phonebook application. It offers an improved interface and many convenient enhancements over the standard Palm application, including a quick-see index bar, one-screen integrated display, sorting by first name, last name, or company, separate sorting options for each category, on-the-fly switching of sorting options, city and country history buffers, and powerful search features.

Pertinent positives: larger display than original address program, great search function, number pad to ease entry of phone numbers,

pop-up lists for frequently entered data (eg, city, state), can set up to beam multiple business cards.

Pertinent negative: can adversely affect other programs.

WordComplete

Developer: Communication Intelligence Corp.

Website: <http://www.shopcic.com/>

Approximate price: \$24.99.

Description: WordComplete supports the most popular text entry systems, including the Graffiti, Jot, and the pop-up keyboard. WordComplete is like shorthand for your Palm-connected organizer. This utility helps to speed text entry time and accuracy by offering a pop-up pick list of words once you have entered a few letters. To complete your word entry, just tap on the word that you want and it is automatically entered where your cursor is. WordComplete's dictionary provides a quick and easy way to check the spelling of a word and can be customized, so that frequently used words appear at the top of the pop-up list.

Pertinent positives: greatly reduces time of entering long medical words, supports pop-up lists and custom dictionaries.

Pertinent negative: conflicts with search capability on other programs.

IV. ACCESSORIES

There are numerous accessories for the personal digital assistants out in the market. Examples include the following.

CASES

These not only store your PDA but serve other functions as well. Some cases hold everything from pens and business cards to cash and credit cards. Other cases offer tough padding and are constructed of rubber to resist damage caused by dropping your digital investment. Still other cases offer the benefit of being waterproof to guard against splashes at the scrub sinks.

KEYBOARDS

For those people who find graffiti inefficient for lengthy text, there are keyboards available that make data entry easier and quicker. Some of the keyboards fold down to just slightly bigger than the PDA itself. Besides increased speed, keyboards also offer multiple shortcut keys to common applications on the PDA. The major disadvantage of using a keyboard is that it detracts from the simplicity and compactness of most PDAs.
