

Every Samsung Galaxy Watch ever: From 2018 to now

How the range has evolved over the years

Ali Pardiwala Last Updated on Sep 15, 2024 2 mins read

Mainstream smartwatches, largely with the current form and function that you see on devices even today, came to be in 2015. However, the definition of a smartwatch is quite wide, and the

segment today covers all kinds of devices that are considered smartwatches.

These range from the premium, fully connected devices that can function even without a paired smartphone, along with affordable devices which use Bluetooth connectivity to offer basic features such as notifications, health tracking, and the ability to take calls on your wrist.

Samsung has been in the business of [smartwatches](#) for just about as long as smartwatches have been a thing. While the early products featured 'Gear' branding, Samsung went with the popular 'Galaxy Watch' nomenclature in 2018, which represents the current smartwatch lineup from the brand. Here are all the Samsung Galaxy Watch smartwatches that have been launched since 2018.

All Samsung Galaxy Watch smartwatches launched from 2018 to 2024

1. Samsung Galaxy Watch (2018)
2. Samsung Galaxy Watch Active (2019)
3. Samsung Galaxy Watch Active2 (2019)
4. Samsung Galaxy Watch3 (2020)
5. Samsung Galaxy Watch4 and Watch4 Classic (2021)
6. Samsung Galaxy Watch5 and Watch5 Pro (2022)
7. Samsung Galaxy Watch6 and Watch6 Classic (2023)
8. Samsung Galaxy Watch7 (2024)
9. Samsung Galaxy Watch Ultra (2024)
10. Samsung Galaxy Watch FE (2024)

1. Samsung Galaxy Watch

The first Samsung Galaxy Watch was launched in 2018 and came in two sizes with Bluetooth and LTE connectivity options. The devices ran on Samsung's Tizen platform for wearables, carried over from the earlier Gear series.

2. Samsung Galaxy Watch Active

The Galaxy Watch Active was launched the following year and didn't come with the rotating bezel feature or cellular connectivity, thus pitched as a budget option.

3. Samsung Galaxy Watch Active2

In the same year, Samsung launched the Galaxy Watch Active2, with cellular connectivity and Bluetooth 5.0.

4. Samsung Galaxy Watch3

The Samsung Galaxy Watch3 was launched in 2020, and came with the One UI Watch 2.0 OS, based on Tizen.

5. Samsung Galaxy Watch4 and Watch4 Classic

Alongside the Galaxy Watch4, Samsung also introduced the [Galaxy Watch4 Classic](#), which features a premium design and a rotating bezel system for navigation. The Watch4 series also switched the Galaxy Watch lineup to the WearOS platform, albeit with Samsung's One UI on top.
