	Selected tab not scrolling into view In New Tab view, a blank page is displayed.	May already be logged in JIRA. Need to be confirmed. No indicated that showing most recent visited pages were descope. Recommend exploring that feature to align with current browsers.	Humaira/Christine UX Team				EAA-1030 EAA-1054
	Bookmarks Tab - the position of the + sign is not per designed Bookmarks Tab - the thumbnail size of the visited websites is not per designed	Log in JIRA that the positioning of the + sign needs to be tweaked. Refer to the Browser Visual Design Spec, sec. 4.1 Log in JIRA that the thumbnail size needs to be tweaked. Refer to the Browser Visual Design Spec, sec. 4.1	Humaira/Christine Humaira/Christine				EAA-1031 EAA-1035
	Bookmarks Tab - thumbnail view and list view. New user experience always display generic placeholders. Not visually appealing.	Thumbnail and list views should always be loaded and potentially refreshed. Need to talk to Paul regarding the value of pre-loading sites relative to cost from a user's perspective.	David				
	Bookmarks Tab - in list view, the logo and text are mis-aligned. Should be middle aligned.	Log in JIRA.	Humaira/Christine				EAA-1032
	Action bar shadow partially obscure the content in History and Bookmarks Tabs	Already logged. Need JIRA ticket number.	Humaira/Christine				EAA-979
	Bookmarks Tab - thumbnail view - labels should be centred relative to the thumbnail image	Log in JIRA. Font type and size are wrong. Alignment of label should be centred. Long labels should display an ellipsis instead of cutting off to the right edge of the thumbnail image. Refer to the Browser Visual Spec, sec. 4.1	Humaira/Christine				EAA-1033
	Bookmarks Tab - thumbnail view. Tweak the hit zone of the Plus sign. What's happening it that tapping below it will open the website into a new tab. Not as designed. Only when hitting the Plus sign will it open a new tab.	Close this out with Rod	Humaira/Christine			High	the issue exists not only in thumbnail view, but also in list view, in History and Most Visited tab. EAA-1036, EAA-1038, EAA-1040, EAA-1041
	Bookmarks Tab - there seems to be a latency between selecting a bookmark and the feedback cue that the page is loading. Seems to be working fine on the emulator, but need to confirm on the devboard and handset.	Close this out with Rod	Humaira/Christine			High	having tested with EV1. Disabled Wi-Fi and used Rogers 3G, the time between tapping bookmark and browser beginning to response was less than 2 second.
	Rubber banding is missing Search widget on rotation not behaving as design. Cannot be reproduced.	Close this out with Rod. Thundersoft needs to implement. Already in SDK.	Humaira/Christine			High	EAA-1051 EAA-1034

Issues	Next Step	Assigned To	Delivery Date	Current Status	Priority	Notes
Bookmark, History, Most Visited - split button implementation is required. The + sign is separate from clicking the icon+label.	Log in Jira	Humaira/Christine			High	EAA-1042
For input fields, the highlight colour should be blue.	Update the existing JIRA ticket to apply for input fields and for all links.	Humaira/Christine				EAA-998
Downloading behaviour - how to view the files?	Refer to Christine' email. For Mo to review and update the Browser Interaction Design spec	Mo				
Settings behaviour not well documented in the global design spec and the Browser spec	Refer to Christine' email. Compare against the Android base functionality	Mo				
Modals - review for consistency based on context.	Need to have an updated documentation on modal behaviour, such as adding a Close control	Mo		EAA-988		
In Portrait Dual view, the Browser More Menu should be launched on the screen that it was initiated from. Currently it is launching on the other scree.	Log in Jira	Humaira/Christine				EAA-155
In Dual View, with the Bookmarks Tab selected, the user selects a bookmark thumbnail. Keep the selection highlighted until the website loads in the right screen	Mo to explore how to display visual feedback that a process is happening	UX Team				Feedback from Rod during the 3rd Party App Review meeting EAA-1044
In Landscape Dual view, should hide the well and display the full browser	Log in Jira	Humaira/Christine				EAA-1052
Rubber banding is missing	Log in Jira	Humaira/Christine				EAA-1051
The mobile / web mode toggle icon need to show what mode the user is in	Alex to redesign icon	Alex				EAA-1048
While in full-screen view tap the Back button on the device. The view should change into single screen view.	Log in Jira	UX Team				EAA-1049
If there are web connection issues (e.g. not being able to connect to websites), there should be an indication that an activity is being processed.	Mo to explore visual feedback cues	UX Team				EAA-1050
