Subject: Heads Up - Meeting in Europe Next Week

Folks,

It does look like our channel partner and we will be meeting with [REDACTED] in Europe next week. Showcase system software will be Visual Multitasking (wpc) and App Manager. The showcase applications will be phone, email, browser, calendar.

We need to do all we can to ensure these work well both for the handset and the Smartpad. Max mode and the ability to switch between multitasking and single app mode will be apparent.

We now have landscape wpc working so all apps should be optimized and verified to work well in this mode. It is really cool and could be the preferred mode of operation on the Smartpad.

Leaving Tuesday morning for Wednesday meetings.

It's gonna be fun. It is a complete DELIGHT to showcase the handset now!
