Subject: [JIRA] Moved: (SSA-920) Framework support for fullscreen mode

[<https://spe-jira.flextronics.com/browse/SSA-920?page=com.atlassian.jira.plugin.system.issuetabpanels:all-tabpanel>]

Paul Webber moved AA-4034 to SSA-920:

Project: Android System Services (was: Android Applications)
Key: SSA-920 (was: AA-4034)
Component/s: Multiple Display Support
(was: 00: SDK)

> Framework support for fullscreen mode

> -----
>
> Key: SSA-920
> URL: <https://spe-jira.flextronics.com/browse/SSA-920>
> Project: Android System Services
> Issue Type: Bug
> Components: Multiple Display Support
> Reporter: Mike Morgano
> Assignee: Paul Webber
> Priority: Blocker
>

> There are two issues which need support and/or a workaround for.
> Auto minimization by setting the displaymode to single results in a loss of WPC expansion/contraction. Once the display mode is set to single offscreen gestures can no longer expand the application to dual screen.
> Also, flags on the DualActivity's Window to hide/remove the annunciator bar work correctly in single screen but in dual once the bar is removed it does not come back.
