Subject: [JIRA] Assigned: (SSA-1567) Activity image re-appears when it shouldn't.

[<https://spe-jira.flextronics.com/browse/SSA-1567?page=com.atlassian.jira.plugin.system.issuetabpanels:all-tabpanel>]

Ron Cassar reassigned SSA-1567:

Assignee: John Visosky (was: Ron Cassar)

Please verify and close

> Activity image re-appears when it shouldn't.

> -----
>
> Key: SSA-1567
> URL: <https://spe-jira.flextronics.com/browse/SSA-1567>
> Project: Android System Services
> Issue Type: Bug
> Reporter: John Visosky
> Assignee: John Visosky
> Attachments: GhostImage_Phone.txt
>
>

> This is 100% reproducible, even on the emulator.

> One-time setup:

> - turn on Airplane mode so an outgoing call will fail

> Steps to reproduce problem:

> 1 - launch Phone and expand to dual

> 2 - dial a number (doesn't need to be a real or full number), hit Call

> 3 - phone keypad will jump to right (it's supposed to) and a dialog will come up on the left, "To place a call, first turn off Airplane mode"

> 4 - dismiss the dialog with OK, and phone contracts to right display (it's supposed to)

> 5 - do some WPC motion (just a small wiggle will do) and the BITMAP of the discarded dialog reappears on the left display

> Attached is a log of this whole sequence, starting from launching the Phone. Look for two lines in the file starting with >>>> where I've tagged the points where steps 4 and 5 occur.

> Additional observations:

> - even if you hit Back to get rid of the Phone, the 'fake' image remains

> - touch on the left display goes through to the desktop, even though it's obscured

> - if you touch the AppMan button BEFORE doing any WPC in step 5, AppMan shows TWO apps running, including the already-dismissed dialog as one card, and the Phone keypad as the other card (This is odd because there should only be one running task there: the Phone)

> - if you try to close the 'bogus' app (the dialog) using AppMan's X button on the card, you get this exception and Launcher dies:
