Incoming call does not change mode from single-application mode to dual-application mode

Key: SSA-1430
URL: <https://spe-jira.flextronics.com/browse/SSA-1430>
Project: Android System Services
Issue Type: Bug
Components: 04 Smartpad, Multiple Display Support
Environment: newera_fr0102
Reporter: Sarah Savoy
Assignee: Ron Cassar

The SmartPad Windowing Management document (version 0.3, p29) states that when the tablet is running in single-application mode an incoming call should switch the tablet to dual-application mode. This does not occur, instead the tablet stays in single-application mode and the call screen is displayed on the full screen.

Steps to reproduce:

1. Set the tablet to single-application mode
2. Initiate an incoming call

- Expected Result: Tablet changes to dual-application mode.

- Actual result: Tablet remains in single-application mode and the call screen is displayed in full screen.

- Workaround (if any): None
