

Know the True Identity of Your Customers

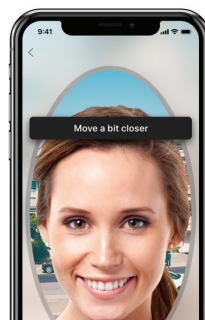

In the era of large-scale data breaches, identity theft and account takeover, businesses need a reliable way to determine if someone is who they claim to be online. Jumio Identity Verification uses informed AI, machine learning and biometrics to help companies improve conversion rates, comply with AML and KYC regulations and better detect fraud — all while delivering a definitive yes/no decision in seconds.

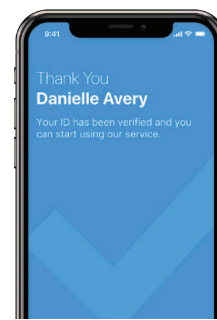

ID Proofing Check
Is the ID document authentic and valid?

Similarity Check
Is the person holding the ID the same person shown in the ID photo?

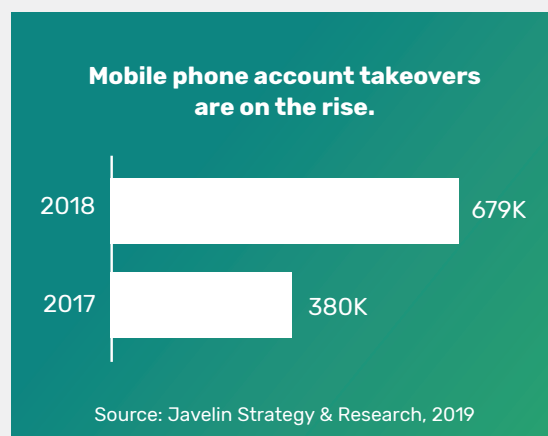

Liveness Check
Is the person holding the ID physically present during the transaction?

Definitive Answer
Jumio Identity Verification delivers a definitive yes or no answer in seconds.

Product Highlights

- Intimidate fraudsters and detect fraudulent transactions before they are processed.
- Deliver a state-of-the-art user experience highlighted by the use of selfies to prove customer presence.
- Transform 'customer not present' transactions into 'ID present' transactions.
- Gain anti-spoofing detection via FaceTec's certified liveness detection.
- Verify identity in real time using informed AI, machine learning and biometrics.

The Jumio Difference

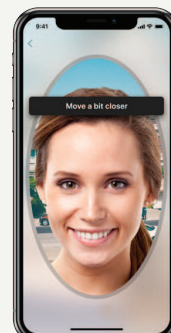

Face Match

- ✓ Not cropped from ID
- ✓ Not a photo of the ID
- ✓ Not taken from a screen, video or paper copy
- ✓ No filter applied
- ✓ Age difference within acceptable range
- ✓ Face is present and fully visible

Liveness Check

Similarity Check

ID photo matches the user's selfie.

Validity Check

The selfie is real.

Certified Liveness Check

Perform liveness and anti-spoofing detection using FaceTec's certified 3D selfie technology.
