About

Hello!

I am an industrial designer originally from Pittsburgh but currently residing in Long Beach CA. I have a strong passion for softgoods and accessory design because I believe the personal connections we foster with these objects allows us to be confident and enjoy our lives. At Ergobaby, I am fortunate enough to develop juvenile products. I get an immense amount of satisfaction knowing that parents trust products I have designed to keep their children safe. That trust is about the strongest connection to an object one can have.

Please don't hesitate to contact me with any design opportunities you might have, I would love to discuss them with you.

Aerloom by Ergobaby is an engineered knitted baby carrier that is made to move, stretch, and fit parents and their daily lives. Drawing inspiration from the activewear industry, Aerloom features FormaKnit fabric made with seamless knitting technology and postconsumer recycled polyester. Aerloom's streamlined design results in a flexible yet supportive baby carrier that delivers all the performance of a traditional baby carrier while redefining the way parents think about comfort and purpose. It...

Green Good Design Award

The Chicago Athenaeum Museum of Architecture and Design

Apr 2021

The company believes secure parent and baby attachments from day 1 lead to confident, curious little humans who better the future and is committed to supporting families with products, which promote these bonds. The key to that, is a healthy planet, so decisions were made with Aerloom in reducing the carbon footprint:

- 87% of the knit is made with post-consumer, GRS-certified, recycled polyester, recycling 26 plastic bottles (500mL) with each baby carrier

- Uses bluesign® ...

Recommendations received**LinkedIn User**

"Lombardi Leather is a specialty and boutique leather goods manufacturer based in Syracuse, NY. Kevin was an intern with us during his senior year at Syracuse University. We work closely with the University and have worked with a number of interns over the years. Without question, Kevin has been one of the best interns experienced. He performed at a professional level in every respect and put forth admirable effort at our company. As a designer, Kevin was very innovative with meaningful input that often was incorporated into new product design. Without any prior experience working with leather, Kevin was a quick learner on the various pieces of specialty equipment on our production floor. He also adeptly developed the needed skills unique to and the often challenging nuances of leather pattern and construction methods. On one particular bespoke project, Kevin took a lead role from ideation-to-execution with excellence, ultimately succeeding in client satisfaction with the final product. Truly a talented individual and a pleasure to work with, I would highly recommend Kevin to any future employer looking to bring a young, innovative, and energetic individual onto its team."

Michael Crocco

"Kevin was among our top performing SBM's in the East Business Unit. It was evident from the get-go that I could count on his campus knowledge and entrepreneurial mindset to execute multiple collegiate activations. I can specifically recall two moments when Kevin went above and beyond to achieve a high-standard of success. Kevin executed a guerrilla marketing stunt to raise awareness for Syracuse's Red Bull Chariot Race. For the other biggest moment at Syracuse, spring festival MayFest, Kevin placed a Red Bull cooler backstage for the main headliner, 2 chains. I am thrilled that I can share memories like these with Kevin and know that he will have a long and successful career."
