About SILKPEEL

SilkPeel

SilkPeel's DermalInfusion is the most dynamic skin treatment available today. It is the only procedure that provides both non-invasive exfoliation and delivery of skin-specific topical solutions under pressure, leaving patients with fresher-feeling and better-looking skin. SilkPeel is safe and painless, allowing patients to achieve optimum results on an accelerated basis without the complications and discomfort usually associated with microdermabrasion, chemical peels, lasers and other risky treatments. In addition, SilkPeel is unique because it does not use crystals or other abrasive particles that can irritate the skin.

For the Physician, the SilkPeel features:

- **Simultaneous exfoliation and topical delivery**
- **A selection of topical solutions specific to the patient's skin condition**
- **Seven combinations of medical grade diamond treatment heads and handpiece tip sizes for optimal treatment**
- **Patented handpiece design**
- **Dual digital LED display for precise vacuum and flow settings**

For the Patient, the SilkPeel features:

- **Goes beyond microdermabrasion by providing simultaneous exfoliation and DermalInfusion topical delivery treatment**
- **Performs a painless, soothing treatment**
- **Delivers noticeable near-term results and lasting skin improvement**
- **Allows an immediate return to normal activities**
- **Offers you a choice of topical formulations to address your unique skin care needs**
- **Eliminates the risk and health concerns of aluminum-based crystals**
