Overview

GO2SLEEP is a Home Sleep Test (HST) device that is mainly used for monitoring your sleep and evaluating Obstructive Sleep Apnea. It is used to classify the severity of your Sleep Apnea, it's also useful in determining the best treatment options.

Most cases of mild-moderate Sleep Apnea can be helped through a combination of GO2SLEEP kits (Ring+MRD+Exercises & Courses).

It also tracks a set of indicators during sleep, offers a lifetime free sleep reports.

Food grade silicone construction for 100% safety, weighs only 6 grams (0.21 oz.),
you will not notice it on your finger.

The abundant capillaries on your fingers helps Go2Sleep to provide significantly more accurate detection data compared to conventional wrist band devices, plus the ultra-compact size makes it barely noticeable, ultimate sleeping comfort guaranteed.

Our App keeps track of your sleep quality every night, which covers all essential sleep and health data, including your sleep stages, heart rate, AHI, body movements, sleep debt, and more importantly, health tips tailored for you.

SNORING

What is it and why would I snore?

Snoring is a common condition which occurs when the flow of air through the mouth and nose is physically obstructed, when it gets serious, it is called Obstructive Sleep Apnea Syndrome (OSAS).

Habitual snoring impairs sleep quality and is often associated with other diseases such as high blood pressure, diabetes, obesity as well as cardiovascular diseases, and it increases the chance of having depression and even dementia.

AHI Screening & OSAS Alert

Go2Sleep offers professional AHI monitoring and detection, real time analyses of your sleep quality and accurate detection of AHI.

The app displays the following metrics:

- Resting Heart Rate:** 66 bpm (Average), with a range from 52 to 132 bpm.
- Oxygen Saturation:** 66% (normal) and 33% (Danger), with a range from 85% to 98%.
- Movement:** 5 Times (Normal), with a range from 0 to 100 times.
- Sleep Debts:** 0 (Normal), with a range from 0 to 100.

Risk Alert

Whenever apnea is detected during your sleep the vibration will alert you to increase the chance of you unconsciously changing your sleeping position, diminishing the probability of sleep apnea.

Fully Automatic for Ultimate User Experience

Super easy to use, just wear it on any finger, and you are good to go. Your comprehensive sleep report will be ready when you wake up the next morning.

Track your loved one's health & enjoy peacefulness in mind

Synchronize your Go2Sleep device with the App via Bluetooth, search your family member by their ID and set them as family so you can track all the key data of yourself and your loved ones, wherever they are.

Sleepon Cloud Heath Services

Detailed weekly and monthly sleep report with predicted trends

Go2Sleep Home Sleep Test analyzes all the key data (including heart rate, AHI, body movements, sleep debt etc.) and produce a detailed comprehensive sleep report on a monthly or weekly basis, with tips or recommendations for you to improve your sleep quality.

The sleeping habits observations & analyses feature help you better understand what compromises your sleep quality by observing and analyzing your sleeping habits with tips and recommendations tailored for you on how to improve your sleep quality.
