Total of central textile element 60

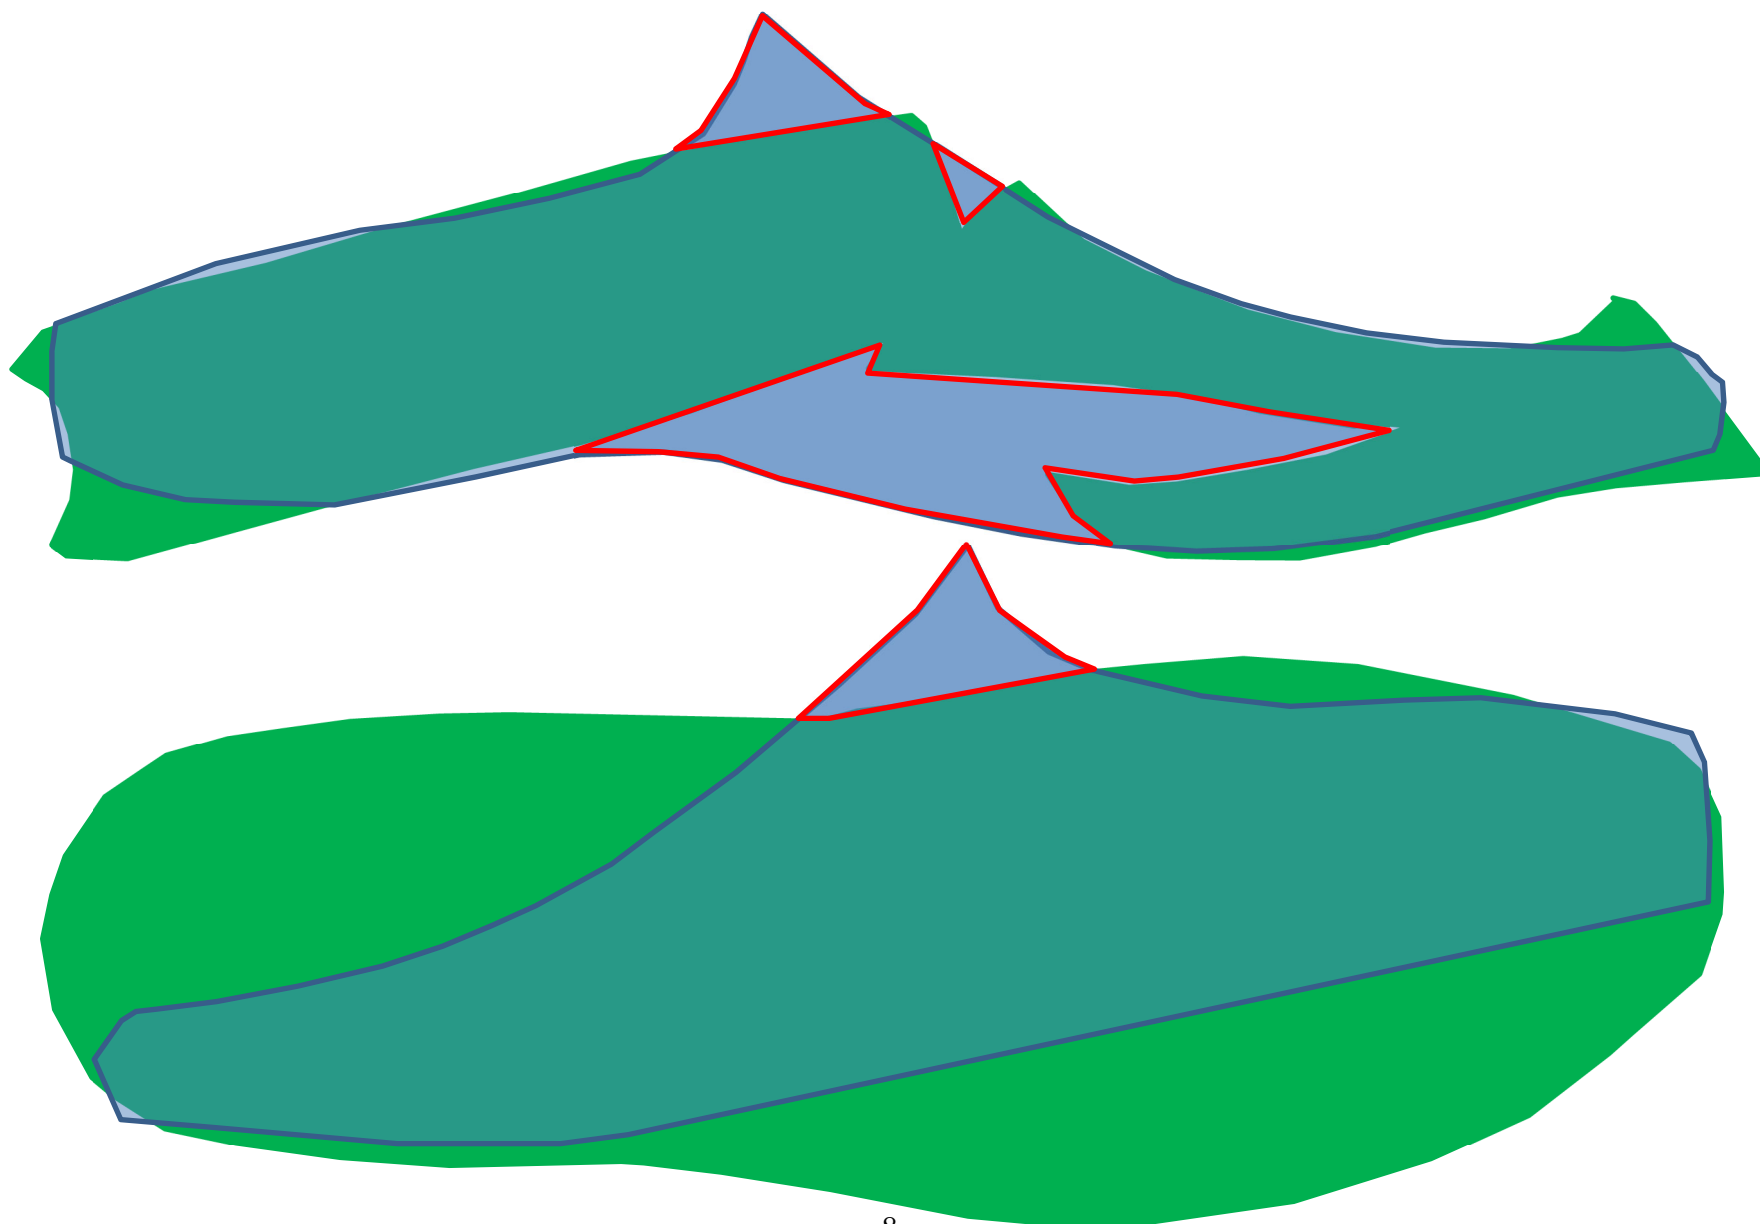

Total of Medial and Lateral textile elements 40 and 50

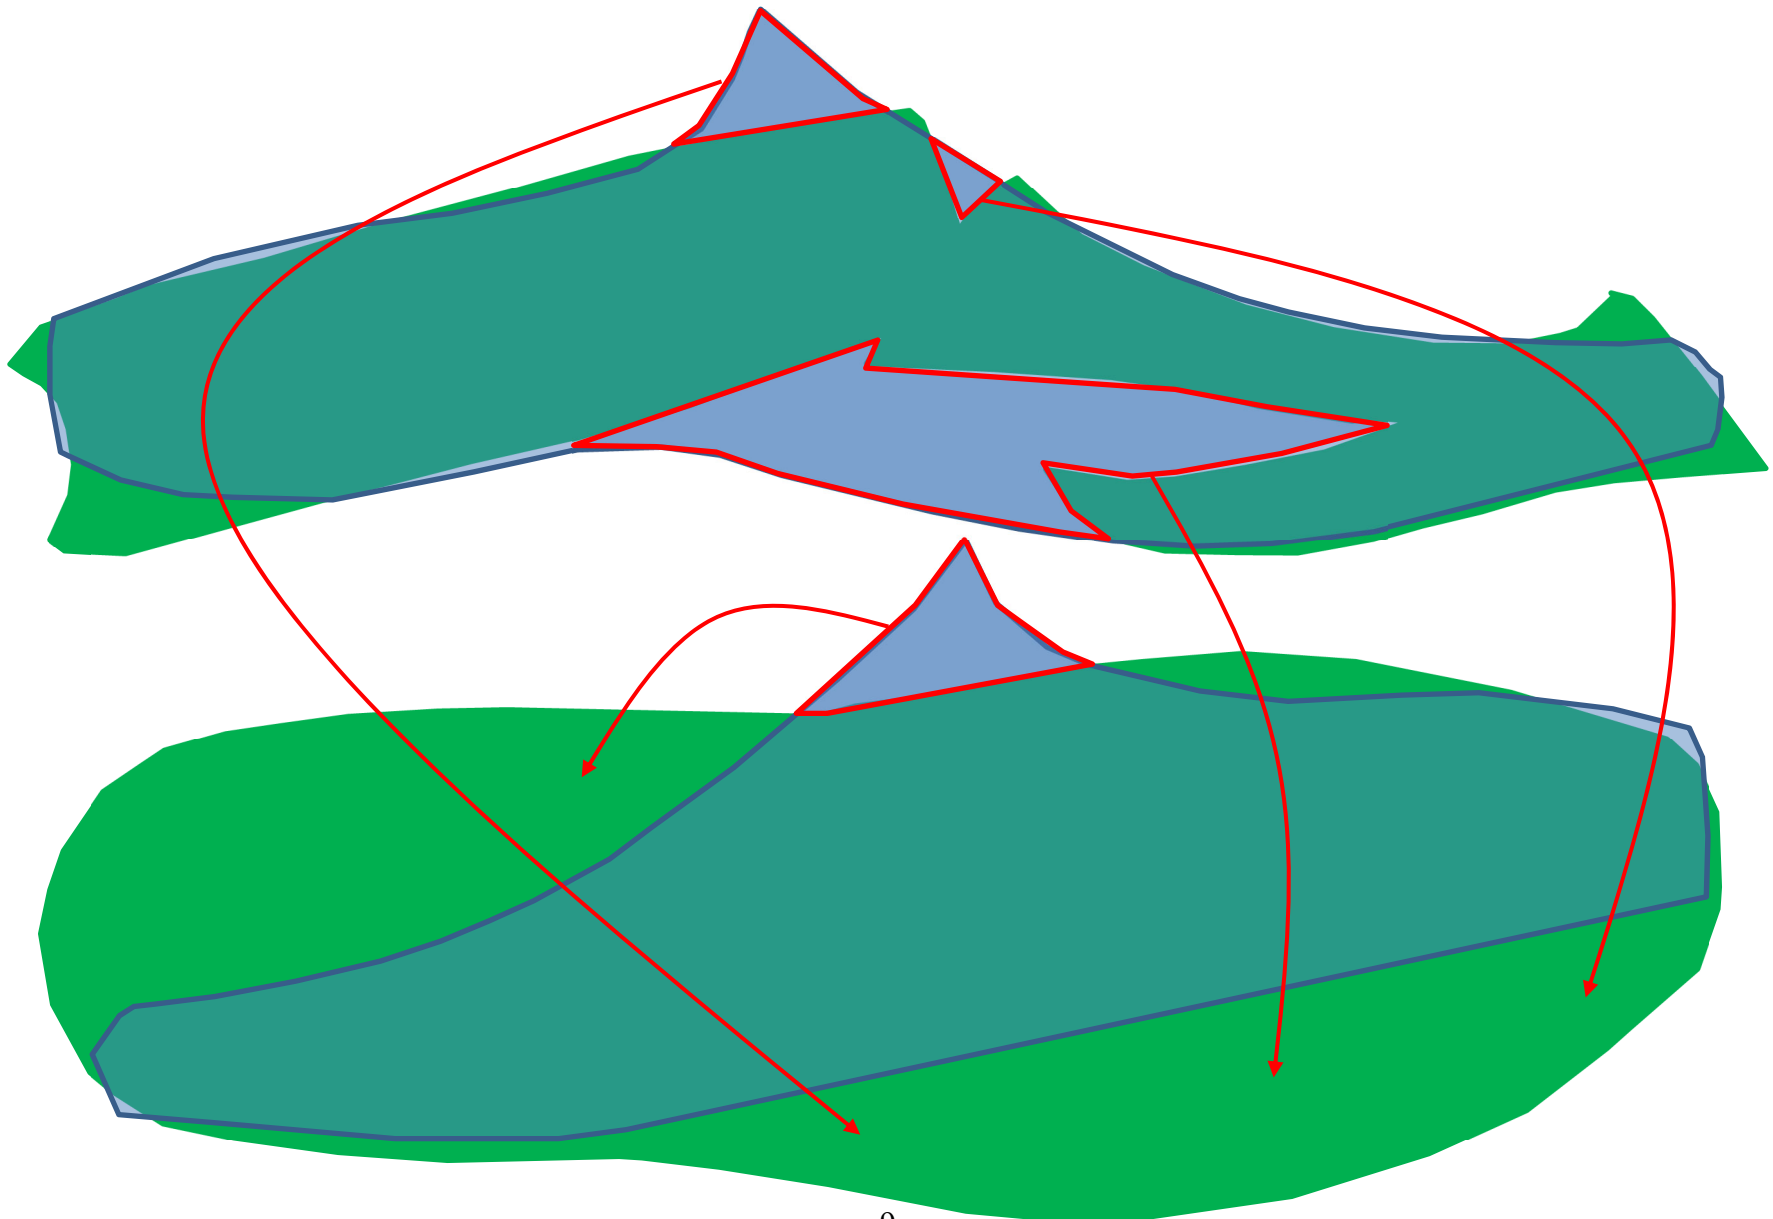

Lateral and Medial Elements Overlaid onto Central Element

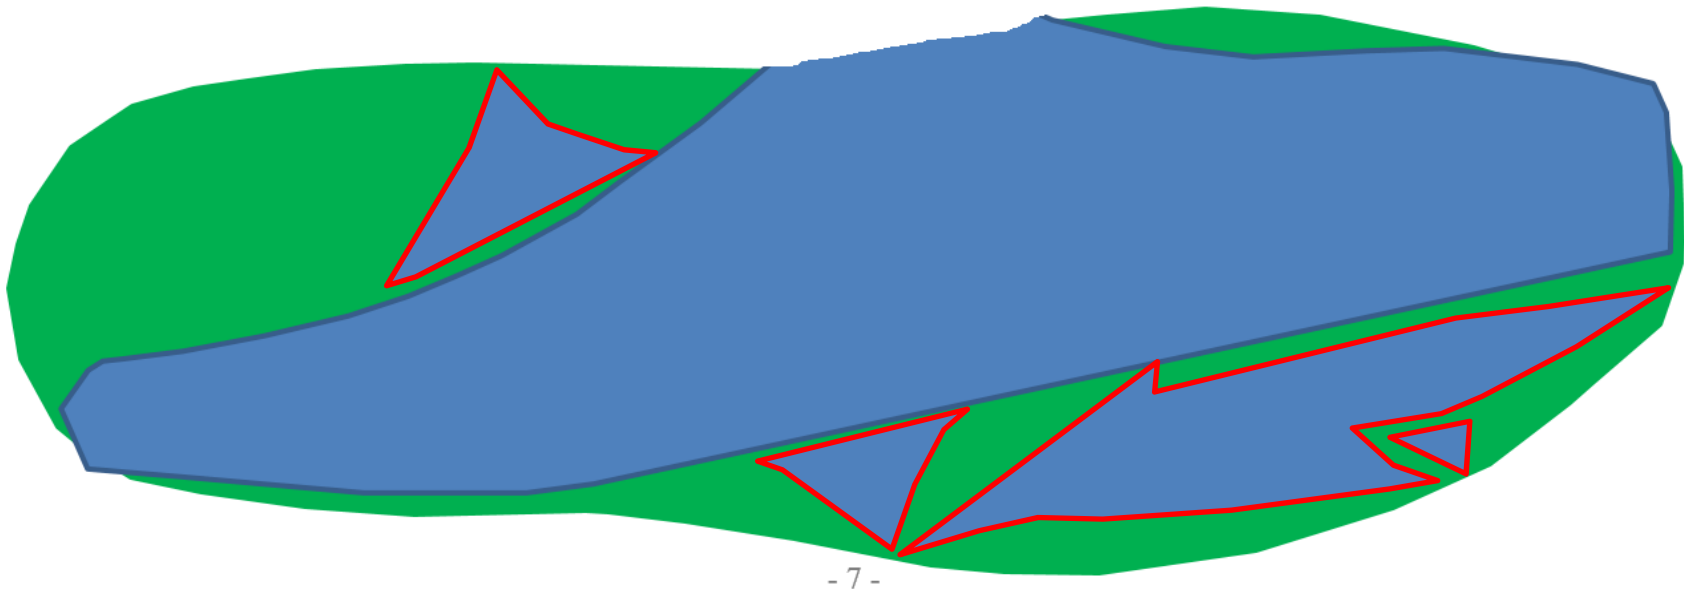

Lateral/medial areas outlined in red to be combined

Method of combination

Final Area Comparison

- 7 -

Conclusion: The combined lateral and medial textile elements (blue) do not overlay all areas comprising the central textile element (green), and therefore the central textile element comprises a majority of the upper.

This area comparison is conservative because it ignores additional areas which comprise the central textile element, including the heel portion (see below) and the additional portions of the central textile element outlined in orange below.

Heel of Central Portion Not Included in Area Comparison
