

AFFIDAVIT OF NATHANIEL E FRANK-WHITE

1. I am a Records Request Processor at the Internet Archive. I make this declaration of my own personal knowledge.

2. The Internet Archive is a website that provides access to a digital library of Internet sites and other cultural artifacts in digital form. Like a paper library, we provide free access to researchers, historians, scholars, and the general public. The Internet Archive has partnered with and receives support from various institutions, including the Library of Congress.

3. The Internet Archive has created a service known as the Wayback Machine. The Wayback Machine makes it possible to browse more than 450 billion pages stored in the Internet Archive's web archive. Visitors to the Wayback Machine can search archives by URL (i.e., a website address). If archived records for a URL are available, the visitor will be presented with a display of available dates. The visitor may select one of those dates, and begin browsing an archived version of the Web. Links on archived files in the Wayback Machine point to other archived files (whether HTML pages or other file types), if any are found for the URL indicated by a given link. For instance, the Wayback Machine is designed such that when a visitor clicks on a hyperlink on an archived page that points to another URL, the visitor will be served the archived file found for the hyperlink's URL with the closest available date to the initial file containing the hyperlink.

4. The archived data made viewable and browsable by the Wayback Machine is obtained by use of web archiving software that automatically stores copies of files available via the Internet, each file preserved as it existed at a particular point in time.

5. The Internet Archive assigns a URL on its site to the archived files in the format http://web.archive.org/web/[Year in yyyy][Month in mm][Day in dd][Time code in hh:mm:ss]/[Archived URL] aka an "extended URL". Thus, the extended URL http://web.archive.org/web/19970126045828/http://www.archive.org/ would be the URL for the record of the Internet Archive home page HTML file (http://www.archive.org/) archived on January 26, 1997 at 4:58 a.m. and 28 seconds (1997/01/26 at 04:58:28). The date indicated by an extended URL applies to a preserved instance of a file for a given URL, but not necessarily to any other files linked therein. Thus, in the case of a page constituted by a primary HTML file and other separate files (e.g., files with images, audio, multimedia, design elements, or other embedded content) linked within that primary HTML file, the primary HTML file and the other files will each have their own respective extended URLs and may not have been archived on the same dates.

6. Attached hereto as Exhibit B are true and accurate copies of printouts of the Internet Archive's records of the archived files for the URLs and the dates specified in the attached coversheet of each printout.

INTERNET ARCHIVE
archive.org

7. I declare under penalty of perjury under the laws of the United States of America that the foregoing is true and correct.

Safe Harbor Statement

Except for historical information, the matters contained in this presentation may constitute forward-looking statements that involve risks and uncertainties, including uncertainties related to product development and clinical trials, unforeseen safety issues resulting from the administration of products in patients, uncertainties related to the need for regulatory and other government approvals, patents and proprietary technology, the need for additional capital, uncertainty of market acceptance of Regeneron's product candidates, the receipt of future payments, the continuation of business partnerships, and additional risks detailed from time to time in Regeneron's filings with the Securities and Exchange Commission (SEC). Please refer to Regeneron's recent Forms 10-K, 10-Q, and 8-K for additional information on the uncertainties and risk factors related to our business.

Because forward-looking statements involve risks and uncertainties, actual results may differ materially from current results expected by Regeneron. Regeneron is providing this information as of the original date of this presentation and expressly disclaims any duty to update any information contained in these materials.

Regeneron Overview

- 3 major clinical programs
  - Oncology
  - Eye Diseases
  - Inflammatory Diseases
- Major collaboration with sanofi-aventis
- Manufacturing expertise at 10,000 liter scale
- Next generation platform for monoclonal antibodies
- Strong financial position
  - Approximately $316 million cash on hand at 12/31/05

REGENERON

ent Id: 05E89300-EBE9-11EE-AB71-59C48E5E791C
Notary.net

What's New?

- **Oncology**
  - Initiated single agent Phase 2 study in lung cancer
  - 2 additional single agent efficacy studies planned for this quarter
- **Eye Diseases**
  - Reported positive preliminary results in wet AMD
  - Expanded dosing level to 4.0 mg
  - Initiated phase 1, part B study vs. Macugen®
  - Finalized plans for phase 2 study
- **IL-1 Trap inflammatory diseases**
  - Enrolling patients in phase 3 trial
- **Human monoclonal antibody platform**
  - Source of new drug candidates and potential partnerships

REGENERON

ent Id: 05E89300-EBE9-11EE-AB71-59C48E5E791C
Notary.net

“Mechanism” vs. “Execution” Risk

- **Mechanism Risk**
  - Target not validated; no approved products with same molecular target
  - Mechanism-based toxicity ill-defined
  - Historically high rate of failure
- **Execution Risk**
  - Approved product validates molecular target and safety profile
  - Higher probability of successful development
  - 2nd and 3rd entries to “blockbuster” categories have history of strong commercial success

REGENERON

Regeneron Clinical Product Candidates

- Each candidate designed to address clinically validated target
- Each has opportunity to expand to new disease settings
- Clinical evidence already obtained indicating that each candidate addresses its target
- Regulatory approval strategy defined for each candidate

Execution vs. Mechanism Risk!

VEGF Trap Oncology
The sanofi-aventis Collaboration

Strong partner
- Leader in oncology marketplace
- Expertise in clinical development and therapeutic research
- Sanofi-aventis leads the global development program

Commitment to broad VEGF Trap oncology program
- Single agent studies
- Chemotherapy combination studies
- Expanding number of therapeutic indications

Favorable financial opportunity for Regeneron
- $400 MM in commercial approval milestones
- 50:50 global profit split (35% royalty in Japan)
- Co-promotion rights

VEGF Trap Oncology

Rapid expansion started in 2005 to be continued in 2006

- **5 preliminary safety tolerability studies in combination with chemotherapy planned; 3/5 underway**
  - **These trials set stage for advanced combination trials**
- **3 single agent efficacy/safety studies to start 1Q 06**
  - **First trial initiated January 2006 in non-small cell lung cancer**
- **3 efficacy/safety studies in combination with chemotherapy; 2 of these starting as early as 2H 06**
- **10 efficacy/safety studies in collaboration with NCI planned for 2006**

Blocking VEGF with VEGF Trap

- Clinical evidence that VEGF Trap can address “VEGF target”
  - Blood samples demonstrate “trapping” of VEGF
  - Decreased perfusion/vascular permeability after single dose
  - Adverse events of hypertension and proteinuria; expected based on Avastin® results
  - Responses observed in individual patients previously treated with multiple chemotherapy regimens

Comparison of VEGF Trap and Avastin®

VEGF Trap has markedly higher affinity for VEGF than Avastin based on in vitro bioassay

IC50 for VEGF Trap = 44pM

IC50 for Avastin = 1400pM

VEGF Trap Oncology Summary

- Validated target
- Expansion of clinical program underway
- Sanofi-aventis responsible for execution of clinical trials
- Preliminary clinical evidence already obtained that target is being addressed

VEGF Trap – Eye Development Program

- Wet AMD is major cause of blindness in adults over 60
- Blocking VEGF validated as a means to treat wet AMD
- Opportunity for VEGF Trap – Eye to emerge as "best-in-class" treatment for wet AMD
  - Potential for greater efficacy related to unique characteristics
    - Higher affinity for VEGF than Lucentis®
    - Ability to block all forms of VEGF-A and Placental Growth Factor (PlGF)
  - Potential for greater patient convenience/safety by requiring less frequent injections
- Positive preliminary phase 1 data reported

Phase 1 Intravitreal Trial

- Part A
  - Dose-ascending cohorts of 3-6 subjects given single intravitreal injection to determine maximum tolerated dose
  - Primary endpoint safety and tolerability
    - Ocular coherence tomography (OCT) to assess retinal thickness
  - Status and preliminary results
    - Dose levels of 0.05, 0.15, 0.5, 1.0, and 2.0 mg completed
    - Final planned dose group (4.0 mg) in progress
    - Maximum tolerated dose not reached
    - Rapid, substantial, and prolonged (up to at least 4 weeks) reduction in retinal thickness demonstrated by OCT

Phase 1 Intravitreal Trial

- **Part B**
  - **Expand higher dose levels from Part A**
  - **Randomized comparison to Macugen®**
    - **Primary endpoint safety and tolerability**
    - **Preliminary assessment of biological activity, e.g., OCT**
  - **Patient enrollment in progress**

REGENERON

ent Id: 05E89300-EBE9-11EE-AB71-59C48E5E791C

VEGF Trap – Eye Summary

- Validated target
- Positioned for rapid expansion of program
  - Phase 2 wet AMD trial to begin in next few months
  - New indications being reviewed
- Confirmed evidence of biological activity
  - Rapid and substantial reduction in retinal thickness
  - Prolonged effect appears to be at least 4 weeks
- Presenting more data at ARVO 2006

IL-1 Trap CAPS POC Study (5 patients)

- **IL-1 Trap rapidly and dramatically:**
  - **Improves subjective measures of disease**
  - **Lowers blood markers of inflammation (e.g., CRP, SAA, ESR)**
  - **"Traps" IL-1 and convincingly confirms markedly increased IL-1 levels in this disease**
- **No significant safety concerns noted in small pilot study**

IL-1 Trap CAPS Registration Study

- Orphan drug designation
- 160 mg/week dose
- Study phases include
  - 6 month placebo controlled, double blind (efficacy/safety)
  - 6 month label extension (safety)
- Study cohort identified and enrollment in progress
  - Complete enrollment anticipated 1H 06
