Colophon

The book was written in Word 2001, whose revision-tracking and collaboration features (see Chapter 5) made life far easier as drafts were circulated from authors to technical and copy editors.

The screen images in this book were captured by Ambrosia Software's Snapz Pro 2 (www.ambrosiasw.com); Adobe Photoshop 6 (www.adobe.com) and Macromedia Freehand (www.macromedia.com) were called in as required for touching them up.

The book was designed and laid out in Adobe PageMaker 6.5 on a Power Mac 8500, Power Mac G3, and Power Mac G4. The fonts used include Formata (as the sans-serif family) and Minion (as the serif body face). To provide the  and  symbols, a custom font was created using Macromedia Fontographer.

Index entries were typed into a custom FileMaker database, then collated and formatted by a custom indexing program written in MacPerl. The book was then generated as Adobe Acrobat PDF files for proofreading, "beta reading," and final transmission to the printing plant.

About the Missing Manual Series

Missing Manuals are designed to be authoritative, superbly written guides to popular computer products that don't come with printed manuals (which is just about all of them). Each book features a hand-crafted index; cross-references to specific page numbers (not just "See Chapter 14"); freedom from jargon like "price point" and "solutions"; an ironclad promise never to use an apostrophe in the possessive word "its"; and RepKover, a detached-spine binding that lets the book lie perfectly flat without the assistance of weights or cinder blocks.

Recent and upcoming Missing Manual titles include:

- *DreamWeaver 4: The Missing Manual* by David Sawyer McFarland
- *Mac OS X: The Missing Manual* by David Pogue
- *AppleWorks 6: The Missing Manual* by Jim Elferdink and David Reynolds
- *iMovie 2: The Missing Manual* by David Pogue
- *Mac OS 9: The Missing Manual* by David Pogue
- *Windows Me: The Missing Manual* by David Pogue
- *Windows 2000 Pro: The Missing Manual* by Sharon Crawford
- *Windows XP: The Missing Manual* by David Pogue
