FAQ

Frequently Asked Questions

1. What applications are supported with X1 Search?

- Outlook 2007
- Outlook 2010 (32-bit and 64-bit)
- Outlook 2013 (32-bit and 64-bit)
- Outlook 2016 (32-bit and 64-bit)
- SharePoint 2007
- SharePoint 2010
- SharePoint 2013
- SharePoint 365
- Box
- OneDrive
- OneDrive for Business (O365)
- OneDrive for Business (SharePoint)
- Symantec Enterprise Vault 9
- Symantec Enterprise Vault 10
- Symantec Enterprise Vault 11
- IMAP based email accounts such as Gmail, Yahoo!, AOL, and more

2. What is the difference between the X1 Professional Client and X1 Search?

New to X1 Search:

- Outlook 64-bit support
- SharePoint support
- Box support
- OneDrive support
- Symantec Enterprise Vault support
- Gmail, AOL, Yahoo! Mail and other IMAP based email accounts
- Completely new, sleek interface
- Separate indexes for each data source

Applications supported by the Professional Client no longer supported in X1 Search

- Lotus Notes
- Eudora
- Thunderbird

Please note: With the release of X1 Search we made a change our licensing scheme, making it easier to distribute product updates and new releases. As part of this change, X1 Search requires you have an active internet connection to validate the installed license file, and Search "phones home" to our activation server once every 14 days.

3. What are the minimum hardware requirements for X1 Search?

- OS: Microsoft Windows 7, Windows 8, Windows 10 (32-bit or 64-bit)
- CPU: 1 GHz minimum, 32-bit (x86) or 64-bit (x64)
- Memory: 1 GB RAM for 32-bit or 2GB RAM for 64-bit*
- Disk: 1 GB free hard disk space recommended*
- Software: Microsoft .NET Framework 4.5.1 Extended version or higher

*Actual memory and disk space varies depending on the amount of content indexed.

4. Can I install Search on Virtual Desktops like XenDesktop or XenApp?

- Yes, X1 Search Virtual provides X1's robust search, architected for virtual desktop environments. X1 Search Virtual is available for volume purchase only, so please contact sales directly for more information.

5. Is X1 Search available on the Mac?

- While our product team is well aware of the desire and an X1 Pro Mac version is certainly part of our product development plans, no release is imminent at this time.

X1 Search™

[Overview](#) [Videos & Webinars](#) [Whitepapers & Briefs](#) [FAQ](#)

X1's Lightning-Fast Search Software is the Premium Alternative to Windows Desktop Search and Outlook Search

X1 Search Introductory Video (4 min)

Take a tour of the latest version of X1's award winning desktop search and productivity application. Stop searching, and start finding.

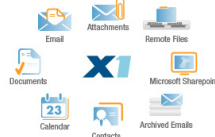

X1's award winning, easy-to-use interface simplifies the way business professionals search and act upon desktop files, remote file shares, emails, attachments, SharePoint data, and more.

Fastest Desktop Search Tool

- Best in class indexing speed
- Unified search across multiple data types
- Boolean, proximity and keyword search
- Preview over 500+ file types

The Right Choice for Search Software

- Enables business productivity search
- Instant access to your critical files
- Unified interface = no wasted time
- Installs easily, requires minimal maintenance

Key Benefits

Enables Business Productivity
It is easy to find email, desktop files, remote file shares (e.g. Box), SharePoint data and more in a single interface with hit highlighting and full-fidelity preview of results. Find the information that matters fast and take action on it to get your job done quickly and efficiently. [More on business productivity search >](#)

Comprehensive Email Search
Deep Outlook and Symantec® Enterprise Vault integration empowers professionals to search across multiple Vaults, Outlook email, attachments, Outlook Calendars, and contacts lists. [More on X1's Enterprise Vault search connector >](#)

SharePoint Search
Seamlessly integrate SharePoint into your workflow with native preview of document libraries and lists as well as SharePoint specific post-search actions such as check-in and check-out. [Learn more >](#)

Federated Search
X1 unifies search results across desktops, network file shares, email, cloud sources (e.g. Box, AWS), and more, enabling you to preview and act upon information no matter where it lives.

Cloud & Hybrid Cloud Search
Search cloud repositories like Box and OneDrive alongside email, files, and SharePoint content, reaping the benefits of a single-pane-of-glass view for business content. Flexible indexing options (full local indexing of cloud content, partial local indexing, or no local index) allow IT administrators to control how users search cloud repositories.

Search on the Go
Take X1 desktop search with you on your mobile devices with **X1 Search Mobile**. Search your email, desktop files, and more directly from your mobile device. (Requires additional purchase). [More on Mobile productivity >](#)

User-Centric Interface
A single, unified interface with fast-as-you-type search, 50+ refine columns, full fidelity preview of attachments and files, and a catalog of post-search actions retrieve and act upon results in the way a business professional recollects information.

X1 Search is built to empower business workers and enable productivity. Effective productivity search leverages the human brain to help people find what they know they are looking for. In the business world, this is what workers need daily – a tool to efficiently find the emails and office documents necessary to do their jobs.

X1 Search is specifically architected to retrieve results in the way a business professional remembers information. More often than not, professionals forget document names or where they filed a critical email, and spend countless hours sifting frustratingly inaccurate search results generated by a "relevance" algorithm. X1 simplifies search, retrieving results as fast as you type, anywhere in the email, file and SharePoint contents or metadata, empowering professionals to tactically sort through and act upon their information.

X1 can go beyond desktop search to offer enterprise search of other repositories with the X1 Rapid Discovery product. X1 Rapid Discovery is a proven eDiscovery and enterprise search solution that uniquely deploys within virtual environments to enable corporations, law firms and consultants to quickly identify, search, and collect distributed data wherever it resides in the cloud or within the enterprise.

Working in virtual desktop environment (VDI)? X1 Search is certified **VMware Ready** and there is a **virtual edition of Search** enabling a better VDI experience by providing users the comfortable interface and robust search

Product Review

X1 Search
PCMag.com

"If you can take advantage of X1 Search's ability to extend its reach to SharePoint or cloud-based email and Box or make use of its ability to build much more sophisticated search phrases than Lookeen can handle, X1 Search is the obvious choice. These additional capabilities - along with easier setup than Lookeen for some features and an equally easy-to-use interface - make it our Editors' Choice for desktop search utilities."

M. David Stone
Lead Analyst
PCMag.com
