Subject: RE: IPR2025-00274, IPR2025-00278, IPR2025-00280, and IPR2025-00281

Counsel,

On September 9, the panel instructed the parties to file redacted (i.e., public) versions of each paper and exhibit that is designated confidential. The parties were given 30 days to file redacted versions and were expected to work together to maintain each party's confidential information. On October 9, Patent Owner filed redacted copies of certain papers but not exhibits. It appears that Patent Owner overlooked the need to file redacted versions of Exhibits 2011 (2022 Niksa Expert Report), 2017 (Erickson Declaration), and 2037-2042 (various contracts and supply agreements). Within 14 days of this email, the parties shall file redacted versions of the above identified exhibits.

Regards,

Andrew Kellogg,

Subject: IPR2025-00274, IPR2025-00278, IPR2025-00280, and IPR2025-00281

Counsel,

The parties have filed several motions to seal in each of IPR2025-00274, IPR2025-00278, IPR2025-00280, and IPR2025-00281. The documents the parties seek to seal include the entirety of multiple exhibits and papers filed in the above-captioned proceedings. Our rules encourage parties to redact sensitive information, where possible, rather than seek to seal entire documents. *See generally* Consolidated Trial Practice Guide. The parties are instructed to review the materials sought to be sealed and file redacted (i.e., public) versions of each document within 30 days of this email. The parties are expected to work together to ensure that each party's confidential information is protected. The panel will rule on the motions to seal once the redacted versions are filed.
