| <p>c) a remote tool box feature application that allows the user to write code, select code, or delete code to enable and disable tool features that control how subsets of the content data or the content applications from the multiple content sources or service providers are received, displayed or organized, wherein the master server collects analytics based which tool features are enabled to target specific products, services or information to the user.</p> | <p>Twitch has a remote tool box application. Users provide information whereby the Twitch system controls how subsets of video content are received, displayed, or organized. Twitch users can enter settings and/or select icons, whereby the Twitch system writes, selects, or deletes code to enable and disable various tool features. For instance, the “Tags” tool feature is shown below:</p>  <p>RD_00000851- RD_00000857, at 853 (Adding Tags To Your Stream).</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

Twitch also has remote tool box software that allows users to construct the master webpage and control how subsets of video content are received, displayed, or organized. Twitch users are able to log into their accounts and enter settings or select icons associated with code that enable and disable various tool features. For instance, users can enable or disable the “Tags” tool feature:

On twitch.tv:

1. Navigate to your Creator Dashboard -> Stream Manager -> Edit Stream Info.
2. Enter up to 10 custom tags to describe yourself or the content of your stream

Tags

Use Enter after each tag
 

Add Tag

coworking x

Chattingwithviewers x
