Find all your devices

SmartThings Find helps you locate your Galaxy phone, tablet, watch, earbuds, and more.

Locate devices even if they're offline

SmartThings Find makes it easy to find lost devices, even when they're not connected to a network.

Share your location with others

You can invite people in the SmartThings app, then share the location of your devices with them.

If they're online

SmartThings Find makes it easy to find lost devices, even when they're not connected to a network.

Share your location with others

You can invite people in the SmartThings app, then share the location of your devices with them.

When you share a device with someone, the other person will be able to locate it or make it ring.

Get notified when a device arrives at or leaves a location

You can get notifications when your Galaxy SmartTag arrives at or leaves a certain place.

To use this feature, you need a SmartThings Station in the place you want to receive notifications for.
