**Re: Maxell's Smartphones, Tablets, Smartwatches, Streaming Devices, and Television
Related Patents**

Dear Mr. Hwi jae Cho,

I hope this correspondence finds you well.

I am Tatsuya Yamamoto, General Manager, IP Innovation BU, and I oversee, among other matters, all patent licensing and litigation for Maxell, Ltd. ("Maxell"). This letter is to invite you to discuss a mutually beneficial intellectual property transaction between LGE and Maxell. In particular, as you may know, Maxell maintains and develops intellectual property assets related to various fields of technologies including but not limited to smartphones, tablets, smartwatches, and televisions. As a result, Maxell owns a large portfolio of patents related to such technologies, and our analysis of LG's lines of smartphones (*e.g.*, Velvet, Wing, K, Xpression, Phoenix, V, Neon, G, ThinQ, Arena, Prime, Stylo, W, Q, Optimus, Aristo, Tribute, Harmony, Reflect, Risio. Fortune, Journey, Solo, Escape and L series phones), tablets (*e.g.*, G Pad series tablets), smartwatches (*e.g.*, W series), televisions (*e.g.*, OLED TVs, NanoCell TVs, 8K TVs, and 4K Ultra HD TVs), and related software and hardware demonstrates that your company makes, uses, sells, offers to sell, and/or imports products in the United States and other countries that would benefit from a license to many of Maxell's patents. Maxell would welcome the opportunity to enter into constructive discussions with LGE to determine whether the parties can agree to a mutually acceptable patent license agreement.

I. Maxell's Television Patent Portfolio

While Maxell continues to review its patent portfolio, we specifically call your attention to the following U.S. patents directed to televisions. To aid in your review of the patents listed below, we included representative claims. These claims, however, are not included to limit your review of Maxell's patents.

No.	U.S. Pat. No.	Claims	LG Products
1	9,578,369	1-18	LG SIGNATURE, OLED TVs, QNED MiniLED TVs, NanoCell TVs, 8K TVs, and 4K Ultra HD TVs, HDR TVs, Smart TVs, and HD TVs
2	9,883,225	1-16	LG SIGNATURE, OLED TVs, QNED MiniLED TVs, NanoCell TVs, 8K TVs, and 4K Ultra HD TVs, HDR TVs, Smart TVs, and HD TVs
3	9,794,629	1-20	LG SIGNATURE, OLED TVs, QNED MiniLED TVs, NanoCell TVs, 8K TVs, and 4K Ultra HD TVs, HDR TVs, Smart TVs, and HD TVs
4	10,110,944	1-40	LG SIGNATURE, OLED TVs, QNED MiniLED TVs, NanoCell TVs, 8K TVs, and 4K Ultra HD TVs, HDR TVs, Smart TVs, and HD TVs

69	8,411,222	1, 2, 3, 7, 8	QNED MiniLED TVs, NanoCell TVs, 8K TVs, 4K Ultra HD TVs, Smart TVs and HD TVs

These patents are directed to technologies including, for example, casting, slideshows, 3D video, slim structures, dynamic contrast, brightness adjustment, black level correction, sound settings, TV-phone interface, image processing including performance and image quality improvements,

user experience including user settings and image presentation control and, streaming and viewing angles, and backlight units/light guide plates incorporated in LG's televisions and related hardware and software sold in the United States. Copies of each of these patents may be found by visiting the United States Patent and Trademark office website, www.uspto.gov. We would also like to bring to your attention the recent resolution of the matter between Maxell and Hisense (*Maxell, Ltd. v. Hisense Co., Ltd. et al*, 5:19-cv-00156 (EDTX)), confirming the value of Maxell's TV portfolio.

We encourage you to examine (or re-examine) these patents to determine whether LGE wishes to have a non-exclusive license under each of the patents identified. In particular, at least the identified patents in the above chart are believed to be practiced by many of LG's TV products, including but not limited to LG's OLED TVs, NanoCell TVs, 8K TVs, and 4K Ultra HD TVs.

II. Maxell's Smartphone Patent Portfolio

Further, we specifically call your attention to the following U.S. patents in Maxell's Smartphone Patent Portfolio that are infringed by LG's smartphones, tablets, smartwatches, and related hardware and software products:

The patents in Maxell's smartphone portfolio are directed to technologies, including imaging/camera components, image processor, proximity sensors, touch screen, power management, wireless communications including Bluetooth, WiFi, NFC, and cellular communications, biometric authentication, positioning, user interfaces, content management incorporated in LG's smartphones, tablets, smartwatches, and related hardware and software sold in the United States. Copies of each of these patents may be found by visiting the United States Patent and Trademark office website, www.uspto.gov.

We encourage you to examine these patents considering the features of LG's smartphones, tablets, and smartwatches. We are confident you will agree that a nonexclusive license is needed under each of the patents identified. In particular, at least the identified claims in the above chart are believed to be practiced by the identified LG products. Further, many of these patents were the subject of various litigations, including, for example, *Maxell, Ltd. v. Huawei Devices USA, Inc., et al.*, C.A. Nos. 5:16-CV-00178-RWS (E.D. Tex.) and 5:18-CV-00033-RWS (E.D. Tex.); *Maxell, Ltd. v. ZTE Corp., et al.*, C.A. Nos. 5:16-CV-00179-RWS (E.D. Tex.) and 5:18-CV-00034 (E.D. Tex.); *Maxell, Ltd. v. ASUSTeK Computer, Inc.*, C.A. No. 3:18-CV-01788 (N.D. Cal.); *Maxell, Ltd. v. Blu Products, Inc.*, C.A. No. 1:18-CV-21231 (S.D. Fla.); *Maxell, Ltd. v. Blackberry Corp., et al.*, C.A. No. 1:17-CV-01446 (D. Del.); *Maxell, Ltd. v. Olympus Corp., et al.*, C.A. No. 1:18-CV-00310-JFB-SRF (D.Del.); *Maxell, Ltd. v. Apple Inc.*, C.A. No. 5:19-CV-00036-RWS (E.D. Tex.); *Maxell, Ltd. v. Apple Inc.*, C.A. No. 6:21-CV-00158-ADA (W.D. Tex.); *In the Matter of Certain Mobile Electronic Devices And Laptop Computers*, Inv. No. 337-TA-1215; and numerous foreign proceedings in Germany and Japan. Each of these litigations has now concluded with very favorable results for Maxell. For example, the ZTE litigation resulted in a \$43.3 million verdict on seven patents in its portfolio, including U.S. Patent Nos. 6,748,317 ("317 Patent"); 8,339,493 ("493 Patent"); 8,736,729 ("729 Patent"); 6,408,193 ("193 Patent"); 6,329,794 ("794 Patent"); 6,816,491 ("491 Patent"); and 8,098,695 ("695 Patent") and the Apple litigation resulted in a settlement shortly after jury selection. In addition to the litigation successes, we also note that numerous patents in Maxell's Smartphone portfolio have been subject to IPR petitions that were not instituted by the PTAB. We encourage you to review these matters. Because LG's infringing products operate in substantially the same manner as the products accused of infringement in these case, additional detail regarding LG's infringing activities can be gained from reviewing the complaints and allegations in these matters.

Maxell is focused on addressing these issues without the need for costly and protracted litigation, and it would welcome the opportunity to have constructive discussions with LG to determine whether a mutually acceptable patent license agreement can be reached. Maxell is prepared to commence discussions with you or your representative at your earliest convenience, at which

time Maxell can set forth its basic licensing structure for your consideration. I look forward to your reply and the opportunity to discuss these matters with you or your representative.

Sincerely,

Tatsuya Yamamoto

General Manager
IP Innovation Business Unit
