UNITED STATES PATENT AND TRADEMARK OFFICE

BEFORE THE PATENT TRIAL AND APPEAL BOARD

YAHOO! INC.,
Petitioner,

v.

ALMONDNET, INC.,
Patent Owner.

Case CBM2017-00051
Patent 8,494,904 B2

Before MICHAEL W. KIM, JUSTIN T. ARBES, and
THOMAS L. GIANNETTI, *Administrative Patent Judges*.

KIM, *Administrative Patent Judge*.

DECISION

Denying Institution of Covered Business Method Patent Review
35 U.S.C. § 324(a) and 37 C.F.R. § 42.208

I. INTRODUCTION

A. *Background*

Yahoo! Inc. (“Petitioner”) filed a Corrected Petition to institute a covered business method patent review of claims 1–6, 9–16, 19–26, 29, and 30 of U.S. Patent No. 8,494,904 B2 (Ex. 1001, “the ’904 patent”) on a single ground of unpatentability under 35 U.S.C. § 101. Paper 3 (“Pet.”).¹ AlmondNet, Inc. (“Patent Owner”) filed a Preliminary Response, in which Patent Owner indicates that a statutory disclaimer has been filed with respect to dependent claims 2, 12, and 22. Paper 7 (“Prelim. Resp.”), 23–24.

For the reasons set forth below, we determine that the ’904 patent does not qualify as a covered business method patent for the purposes of § 18(d)(1) of the Leahy-Smith America Invents Act (“AIA”), Pub. L. No. 112-29, 125 Stat. 284, 331. We, thus, do not institute a covered business method patent review of any claim of the ’904 patent.

B. *Related Proceedings*

Petitioner and Patent Owner identify the following district court proceeding concerning the ’904 patent: *AlmondNet, Inc. et al. v. Yahoo! Inc.*, No. 1:16-cv-01557-ILG-SMG (E.D.N.Y.). Pet. 2; Paper 4, 2. The following proceedings, before the Board, also involve the same parties:

¹ Petitioner filed its initial Petition on May 15, 2017 (Paper 2), then filed a Corrected Petition on June 2, 2017 (Paper 3). Petitioner was not ordered to correct its Petition in the Notice of Filing Date Accorded to Petition (*see* Paper 6), and the filed papers do not otherwise indicate that Board authorization was obtained to do so. *See* 37 C.F.R. § 42.20(a). We need not reach this issue, however, given our disposition of the Corrected Petition on the merits, as explained herein.

CBM2017-00051
Patent 8,494,904 B2

CBM2017-00046 (U.S. Patent No. 7,822,639) (institution denied);
CBM2017-00047 (U.S. Patent No. 8,244,586) (institution denied);
CBM2017-00049 (U.S. Patent No. 7,979,307); CBM2017-00050 (U.S.
Patent No. 8,775,249); CBM2017-00052 (U.S. Patent No. 8,244,582);
CBM2017-00056 (U.S. Patent No. 8,959,146) (institution denied);
CBM2017-00058 (U.S. Patent No. 8,671,139) (institution denied).

C. Standing

Section 18 of the America Invents Act governs the transitional program for covered business method patent reviews. Leahy-Smith America Invents Act (“AIA”), Pub. L. No. 112–29, § 18, 125 Stat. 284, 329–31 (2011); *see also* 37 C.F.R. §§ 42.300–304 (2016) (setting forth the rules governing the transitional program for covered business method patents). Section 18(a)(1)(B) of the AIA limits such reviews to persons, or their privies, that have been sued or charged with infringement of a covered business method patent. *See also* 37 C.F.R. § 42.302(a) (setting forth who may petition for a covered business method patent review). Petitioner asserts that, because it has been sued for infringement of certain claims of the ’904 patent, it has standing to file this Petition. Pet. 40 (citing Ex. 1003).² Based on the record before us, we agree.

D. The ’904 Patent

The ’904 patent discloses that the claimed invention relates generally to “a mercantile method directed to brokerage of attributes of information.” Ex. 1001, 1:31–33. According to the ’904 patent, “[a]dvances in database

² Petitioner cites Ex. 1003 (Resume of Stephen Gray); we assume, however, Petitioner intended to cite the Complaint labeled Ex. 1004.

technology have given rise to commerce in records, files and databases, per se. For example, paying for a database credit check for an individual or buying a mailing list have become common practice.” *Id.* at 1:37–40. The ’904 patent further discloses that “[u]nfortunately, the current state of information commerce is focused on the sales of whole databases, whole records, or evaluations based on single or clusters of records.” *Id.* at 1:59–61. The ’904 patent indicates this is a problem because “[i]n commercial applications where specific attributes of information strongly affect the value of evaluations, there is a need in the art for commerce in such attributes. For example, in targeted advertising, every attribute, which substantially affects the probability of that advertisement’s success, innately has a discrete economic value.” *Id.* at 1:61–67. The ’904 patent purports to solve this problem by utilizing “a descriptive-profile mercantile method, for use at a juncture in a data communications topology having associated therewith a maintained databank of partial profiles.” *Id.* at 3:32–35. According to the ’904 patent, the disclosed invention provides “a means for making viable the economic commerce in the information attributes” and “operates on a brokerage representation model.” *Id.* at 3:55–61.

E. Illustrative Claim

Petitioner challenges claims 1–6, 9–16, 19–26, 29, and 30 of the ’904 patent. Of those, claims 1, 11, and 21 are independent claims. Independent claim 1 is illustrative of the challenged claims, and is reproduced below.

1. An automated method of collecting profiles of Internet using entities, the method comprising:

(a) electronically receiving at a programmed computer system coupled to a global computer network, from at least one server controlled by one of a plurality of unaffiliated third parties, an electronically URL-redirected partial profile of an

entity that uses a user computer coupled to the global computer network to access a website, which partial profile is available to one of the third parties and which partial profile is received along with an identification of the one of the third parties that contributed the partial profile, and automatically with the computer system storing the received partial profile;

(b) automatically with the computer system electronically adding the received partial profile to a maintained profile believed to be related to the same entity;

(c) automatically with the computer system generating and storing an electronic record of which of the plurality of unaffiliated third parties contributed to the maintained profile particular profile attributes; and

(d) wherein the maintained profile, including the added partial profile, comprises data used in targeting third party advertisements to the user computer over the global computer network.

Ex. 1001, 16:59–17:16.

F. Asserted Ground of Unpatentability

Petitioner challenges claims 1–6, 9–16, 19–26, 29, and 30 of the '904 patent as failing to claim patent-eligible subject matter under 35 U.S.C. § 101. Pet. 41–70.

II. ANALYSIS

A. Claim Construction

In a covered business method patent review, we construe claim terms in an unexpired patent according to their broadest reasonable construction in light of the specification of the patent in which they appear.

37 C.F.R. § 42.200(b); *see Cuozzo Speed Techs. LLC v. Lee*, 136 S. Ct.

2131, 2142 (2016) (upholding the use of the broadest reasonable interpretation standard). Only those terms that are in controversy, however,

need be construed, and only to the extent necessary to resolve the controversy. *See VividTechs., Inc. v. Am. Sci. & Eng'g, Inc.*, 200 F.3d 795, 803 (Fed. Cir. 1999). Under the broadest reasonable interpretation (“BRI”), claim terms generally are given their ordinary and customary meaning, as would be understood by one of ordinary skill in the art in the context of the entire disclosure. *In re Translogic Tech., Inc.*, 504 F.3d 1249, 1257 (Fed. Cir. 2007). An inventor, however, may define specific terms used to describe an invention, but must do so “with reasonable clarity, deliberateness, and precision” and must “‘set out his uncommon definition in some manner within the patent disclosure’ so as to give one of ordinary skill in the art notice of the change” in meaning. *In re Paulsen*, 30 F.3d 1475, 1480 (Fed. Cir. 1994) (quoting *Intellicall, Inc. v. Phonometrics, Inc.*, 952 F.2d 1384, 1387–88 (Fed. Cir. 1992)).

Petitioner proposes two claim terms be construed: “unaffiliated third parties” and “third party advertisements.” Pet. 21–31. We begin our analysis with the plain language of the claims themselves, but look to the specification for guidance as to how one skilled in the art would understand the ordinary meaning of the claims. In interpreting claims, care must be exercised, as there is a fine line between interpreting claims in light of the specification, and reading limitations into the claims from the specification. *Comark Commc’ns, Inc. v. Harris Corp.*, 156 F.3d 1182, 1186 (Fed. Cir. 1998).

1. “*unaffiliated third parties*”

Independent claim 1 recites “electronically receiving at a programmed computer system coupled to a global computer network, from at least one server controlled by one of a plurality of *unaffiliated third parties*, an

electronically URL-redirected partial profile . . .” (emphasis added).
Petitioner asserts that “unaffiliated third parties” should be construed as “parties that engage in arm’s length transactions to buy and sell profiles.” Pet. 21–29. Petitioner asserts this construction is proper because: (1) the specification characterizes the “present invention” as including “unaffiliated third parties” that buy and sell profiles; (2) the specification makes clear that “unaffiliated third parties” are those that contract to buy and sell profiles; and (3) any construction of “unaffiliated third parties” that excludes a contract to buy and sell profiles would read out impermissibly the preferred embodiment of the invention. *Id.*

Patent Owner disagrees, asserting that the term “unaffiliated third parties” does not require any express construction. Prelim. Resp. 14–18. Patent Owner asserts further that even if construction were required, Petitioner’s construction would be incorrect, because it excludes improperly “a party that *donates* data or *swaps* data rather than buying or selling it,” something covered by use of the words “economic *or other* value” in a relevant portion of the specification. *Id.* (emphasis in original) (in part quoting Ex. 1001, 8:9–16). We agree with Patent Owner.

As an initial matter, we note that Petitioner does not assert that any express claim language supports its proffered construction. We discern that the lack of such an assertion is logical as, of all the substantive terms set forth in Petitioner’s construction, the only one recited explicitly, in any claim, is “profile.” We do not discern that any of the terms “unaffiliated,” “third,” “parties,” and “profile,” individually or collectively, provides a sufficient basis for Petitioner’s proposed construction.

Instead, Petitioner relies almost exclusively on the specification. In light of the above, however, Petitioner needs to show that its proffered construction is set forth “with reasonable clarity, deliberateness, and precision” and is “‘set out . . . in some manner within the patent disclosure’ so as to give one of ordinary skill in the art notice of the change” in meaning. *Paulsen*, 30 F.3d at 1480. We are unpersuaded that Petitioner has done so. Specifically, we agree with Patent Owner that the portions of the specification identified by Petitioner merely disclose preferred, but non-limiting, embodiments. *See* Prelim. Resp. 14–19. In particular, Patent Owner contends, and we agree, that the following portions of the specification indicate that “unaffiliated third parties” is not limited to “buying and selling,” as asserted by Petitioner:

In the context of the preferred embodiment of the present invention, ‘user’ relates to an individual, web site, search-robot and/or other type of software agent that interacts with the system by virtue of their contacting a juncture in the data-communications topology where the method is installed in order to acquire, trade, dispose of and/or broker some attribute data for the purpose of acquiring some potential economic *or other value* in connection with that attribute data.

Ex. 1001, 8:9–16 (emphasis added).

The various kinds of contracts available in a transaction between the system and the user are: buy, sell, **broker, and trade**. Where new information is disclosed to the system a royalty arrangement (or, alternatively, an outright purchase or sale) comprised of micro payments *may be employed*.

Id. at 10:47–51 (emphases added).

As for Petitioner’s assertion that construing “unaffiliated third parties” to exclude a contract to buy and sell profiles would read out, impermissibly, the preferred embodiment of the invention, we conclude that assertion is

misplaced. Patent Owner does not assert that “unaffiliated third parties” should be construed as excluding buying and selling profiles; Patent Owner is merely asserting that “unaffiliated third parties” is not limited to “parties that engage in arm’s length transactions to buy and sell profiles.” Under that premise, a premise with which we agree for the reasons set forth above, the preferred embodiment is not excluded.

We are unpersuaded that “unaffiliated third party” is limited to “parties that engage in arm’s length transactions to buy and sell profiles.” As explained above, the term also encompasses parties that engage in other types of transactions (e.g., trades). We agree with Patent Owner that “unaffiliated third parties” does not require any further construction.

2. “*third-party advertisements*”

Independent claim 1 recites “wherein the maintained profile, including the added partial profile, comprises data used in targeting *third-party advertisements* to the user computer over the global computer network . . .” (emphasis added). Petitioner asserts that the term “third-party advertisements” should be construed as “paid announcements.” Pet. 29–31. Petitioner asserts that the specification defines a “third party” as “one that buys and sells information.” *Id.* Petitioner additionally asserts that an advertisement, in the context of electronic media, necessarily is paid. *Id.* (citing Ex. 1002 ¶¶ 44, 65). Petitioner, thus, concludes that “[s]ince, here, ‘third-party’ modifies ‘advertisements,’ the claim term ‘third-party advertisements’ ought to be construed to mean ‘advertisements’ that are sold by one party and purchased by another (*i.e.*, third) party, *i.e.*, ‘paid announcements.’” *Id.* at 29–30 (citing Ex. 1002 ¶ 64).

Patent Owner disagrees, asserting that “[t]he *broadest* reasonable interpretation of ‘advertisement’ is simply ‘a notice or announcement,’ and the broadest reasonable interpretation of ‘third party advertisement’ is a notice or announcement by some party other than the one performing the method of claim 1. Including free ads is not ‘unreasonable.’” Prelim. Resp. 23. Patent Owner argues that Petitioner’s assertions are flawed, because the “third party” recited in each of “unaffiliated third parties” and “third-party advertisement” are actually different parties. *Id.* at 21. Specifically, Patent Owner argues the “term ‘unaffiliated third party’ refers to the ‘user,’ whereas the term ‘third-party advertisements’ refers to advertisements of a third-party *advertiser*.” *Id.* As an initial matter, we note that the parties appear to agree that “advertisements” are, essentially, “announcements,” as each party’s respective construction includes that term. Accordingly, we will limit our analysis to whether or not it is proper to insert the word “paid” before “announcements.” On that issue, we agree with Patent Owner that it is not.

Beginning with “third party,” Petitioner does not identify, and we are unable to ascertain independently, anything about the terms “third” or “party,” individually or collectively, that has anything to do with either “one that buys and sells information” or “paid.” The same is true for the rest of the express language set forth in independent claim 1.

The portions of the specification cited by Petitioner are equally unavailing. Pet. 29–30 (citing Ex. 1001, 3:55–56, 8:24–29). We are unpersuaded that either portion provides a definition of “third party” as “one that buys and sells information,” or as requiring “paid,” with any degree of “clarity, deliberateness, and precision.” *See Paulsen*, 30 F.3d at 1480. As

noted by Patent Owner, the portions of the specification cited by Petitioner refer to a “third-party” in the context of “unaffiliated third party,” and not “third-party advertisements.” Moreover, even if those portions of the specification are considered relevant, we are unpersuaded that they limit “third party” to “one that buys and sells information,” or require the term “paid,” for the same reasons set forth above in our analysis of “unaffiliated third party.”

For the claim term “advertisements,” Petitioner asserts that adding the word “paid” is appropriate, because “one of ordinary skill would understand that in the context of the electronic media at issue in the ’904 patent, an ‘advertisement[]’ is necessarily paid; otherwise, it would not be considered an ‘advertisement[].’” Pet. 30 (citing Ex. 1002 ¶¶ 44, 65). We are unpersuaded. We have considered Petitioner’s supporting evidence and, in particular, the testimony of Stephen Gray. While Mr. Gray uses the absolute term “always” in asserting that “[a]t least in the context of the Internet, advertisers always pay for ‘advertisements’; otherwise, a displayed message would not be considered an advertisement” (Ex. 1002 ¶ 44), we are unpersuaded that it is credible, as the balance of the paragraph, as well as the cited exhibits, use much more equivocal language, as follows:

Indeed, from its inception, Internet advertising was *focused* on generating revenue for websites for the display of advertisements. (See, e.g., Ex. 1025 at 153 (“When advertising on the Web first began, no one knew how to price. The only known figure was a fee HotWired decided to charge for its first ads in 1994: \$30,000 for banner advertising that ran for 12 weeks.”). Advertisers *may* pay for advertisements via pay-per-click (PPC) systems, also called cost-per-click (CPC) systems. (See Ex. 1026 (<https://www.duncanjonesnz.com/history-of-ppcmarketing/>)). PPC is an Internet advertising *model* in which

advertisers pay the publisher (*typically* a website owner or a search engine) when the ad is clicked. The ads would have *typically* appeared as a link that *may* be accompanied by additional advertising language. When a user clicked on one of the ads containing a hyperlink, the user's browser was directed to the website of a company that had agreed to pay the owner of the PPC system some amount of money for each such click. Other pricing *models* "range from flat-fee to paying for the number of times an ad is seen . . . to paying on a cost-per-lead or cost-per-purchase basis." (Ex. 1025 at 154; *see also id.* at 153–78 (describing various pricing models used in Internet advertising).)

Ex. 1002 ¶ 44 (emphases added). The use of equivocal terms that signify the presence of alternatives, such as "focused," "may," "typically," and "model," all indicate that paid advertising was merely an option, and does not support Mr. Gray's testimony that "advertisers *always* pay for 'advertisements.'" *Id.* (emphasis added).

The same logic also is applicable to the analysis and supporting evidence set forth in paragraph 65 of Mr. Gray's Declaration. Ex. 1002 ¶ 65 (citing Exs. 1005, 1006).³ Specifically, while the cited dictionary definitions do mention "paid announcement," that is merely set forth in a listing with other options that do not use the word "paid," or any equivalent. *See, e.g.,* Ex. 1006, 4 of 4 ("advertisement" is defined as "[a] notice, such as a poster, newspaper display, or paid announcement in the electronic media to attract public attention or patronage."). Accordingly, again, we are unpersuaded that Mr. Gray's testimony that "'advertisement[]' is *necessarily* paid;

³ Petitioner cites Ex. 1004 (Complaint). We assume, however, Petitioner intended to cite The American Heritage College Dictionary, 4th Edition (Ex. 1005), The American Heritage College Dictionary, 3rd Edition (Ex. 1006).

otherwise, it would not be considered an ‘advertisement[]’ is credible.
Ex. 1002 ¶ 65 (emphasis added).

Finally, Patent Owner cites several cases in support of its argument that an advertisement does not necessarily require payment; rather, an advertisement is merely a notice or announcement. Prelim. Resp. 19–23 (citing *Unwired Planet, LLC v. Google, Inc.*, 841 F.3d 1376, 1382 (Fed. Cir. 2016); *Google Inc. v. Klaustech, Inc.*, CBM2016-00096, slip op. at 8–16 (PTAB. Feb. 27, 2017) (Paper 10); *Google Inc. v. HBAC Matchmaker Media Inc.*, CBM2016-00097, slip op. at 12–23 (PTAB Feb. 27, 2017) (Paper 16) (*but see* dissenting opinion)). We acknowledge that facts and arguments may differ between cases, such that a finding in one case that “advertisement” does not necessarily require payment is not always binding on another. Nevertheless, the cited cases, and, in particular, the *Unwired Planet* decision issued by the Federal Circuit, provide some guidance on this issue. We are unpersuaded that Petitioner has shown sufficiently that the facts and arguments in this case justify a different outcome.

Accordingly, we construe “third party advertisements” as “third party announcements,” which does not include the word “paid.”

B. Covered Business Method Patent

Section 18(d)(1) of the AIA defines a covered business method patent as “a patent that claims a method or corresponding apparatus for performing data processing or other operations used in the practice, administration, or management of a financial product or service, except that the term does not include patents for technological inventions.” *See also* 37 C.F.R. § 42.301(a) (stating the same). To determine whether a patent is a covered business method patent, “the statutory definition of a [covered business

method (CBM)] patent requires that the patent have a claim that contains, however phrased, a financial activity element.” *Secure Axxess, LLC v. PNC Bank Nat’l Ass’n*, 848 F.3d 1370, 1381 (Fed. Cir. 2017); *see also Blue Calypso, LLC v. Groupon, Inc.*, 815 F.3d 1331, 1340 (Fed. Cir. 2016) (stating that “§ 18(d)(1) directs us to examine *the claims* when deciding whether a patent is a CBM patent”); *Unwired Planet*, 841 F.3d at 1382 (“CBM patents are limited to those with claims that are directed to methods and apparatuses of particular types and with particular uses ‘in the practice, administration, or management of a financial product or service.’”).

Petitioner cites six claims of the ’904 patent in support of its assertion that the ’904 patent is a covered business method patent: dependent claims 2, 12, and 22, and independent claims 1, 11, and 21. Pet. 31–40.

1. Effect of Statutory Disclaimer

Petitioner contends dependent claims 2, 12, and 22 of the ’904 patent are directed to financial activity, because each claim requires a predetermined arrangement whereby a payment amount is due to the unaffiliated third party as a result of using at least one of the profile attributes contributed by that third party in targeting the third party advertisements. Pet. 32–33. Patent Owner argues, however, that these claims cannot provide the basis for eligibility for a covered business method patent review, because they have been disclaimed pursuant to 35 U.S.C. § 253(a) and 37 C.F.R. § 1.321(a). Prelim. Resp. 23–24. We agree with Patent Owner. “The Federal Circuit has held consistently that claims disclaimed under § 253(a) should be treated as though they never existed.” *Facebook, Inc. v. Skky, LLC*, Case CBM2016-00091, slip op. at 8 (PTAB Sept. 28, 2017) (Paper 12) (informative) (citing *Vectra Fitness, Inc. v.*

TWINK Corp., 162 F.3d 1379, 1383 (Fed. Cir. 1998)). “The decision whether to institute a CBM patent review is based on whether a patent ‘is’ a covered business method patent, which in turn is based on what the patent ‘claims’ at the time of the institution decision, not as the claims may have existed at some previous time.” *Id.* at 6. Accordingly, as dependent claims 2, 12, and 22 are disclaimed by the time of this decision, they cannot provide the basis for eligibility for a covered business method patent review.

2. *Financial Product or Service*

Petitioner’s assertion that independent claims 1, 11, and 21 recite financial activity elements is entirely premised on its proposed constructions of “unaffiliated third parties” and “third-party advertisements.” Pet. 33–35.⁴ As discussed *supra*, however, we do not adopt Petitioner’s proffered claim constructions of either term. Instead, we determine that “unaffiliated third parties” is not limited to profile buyers and sellers and does not require any further construction, and that “third party advertisements” should be construed as “third party announcements.” On this record, therefore, we are

⁴ Petitioner also asserts that “[t]he ’904 patent’s specification makes plain that it is a patent ‘used in the practice, administration, or management of a financial product or service.’” Pet. 35–36. Petitioner then asserts, however, the following: “Petitioner acknowledges that this argument is inconsistent with the Federal Circuit’s language in *Secure Access LLC v. PNC*, 848 F.3d 1370 (Fed. Cir. 2017). The appellant in that case, however, has filed a request for *en banc* review, asking whether such patents are CBM eligible Petitioner submits this argument for the Board’s consideration should the Federal Circuit or Supreme Court overrule or modify the *Secure Access* decision.” Pet. 35–36 n.6. The request for *en banc* review was denied. *Secure Access LLC v. PNC*, 859 F.3d 998 (Fed. Cir. 2017). A petition for a writ of certiorari was filed on September 4, 2017, and is pending. In any case, however, as neither the Federal Circuit nor Supreme Court, as of this date, has overruled or modified *Secure Access*, Petitioner’s assertion is moot.

unpersuaded that Petitioner has shown sufficiently that either claim term is a financial activity element. Accordingly, Petitioner has not met its burden of demonstrating that the '904 patent is eligible for a covered business method patent review.

II. CONCLUSION

On this record, Petitioner has not met its burden of showing that the '904 patent is eligible for the transitional covered business method patent review program.

III. ORDER

After due consideration of the record before us, and for the foregoing reasons, it is ORDERED that the Petition is *denied* and no covered business method patent review is instituted.

NOTIFICATION OF LOSS OF ENTITLEMENT TO SMALL ENTITY STATUS

Dear Sir:

Assignee notifies the USPTO of the loss of entitlement to small entity status in the above-captioned patent.

If the Office has any questions, please feel free to contact assignee's undersigned attorney of record.

Respectfully submitted,
ALMONDNET, INC.
by its attorney

Dated: January 5, 2017

ISSUE NOTIFICATION

The projected patent number and issue date are specified above.

Determination of Patent Term Adjustment under 35 U.S.C. 154 (b) (application filed on or after May 29, 2000)

The Patent Term Adjustment is 0 day(s). Any patent to issue from the above-identified application will include an indication of the adjustment on the front page.

If a Continued Prosecution Application (CPA) was filed in the above-identified application, the filing date that determines Patent Term Adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) WEB site (<http://pair.uspto.gov>).

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Application Assistance Unit (AAU) of the Office of Data Management (ODM) at (571)-272-4200.

APPLICANT(S) (Please see PAIR WEB site <http://pair.uspto.gov> for additional applicants):

Roy Shkedi, New York, NY;

The United States represents the largest, most dynamic marketplace in the world and is an unparalleled location for business investment, innovation, and commercialization of new technologies. The USA offers tremendous resources and advantages for those who invest and manufacture goods here. Through SelectUSA, our nation works to encourage and facilitate business investment. To learn more about why the USA is the best country in the world to develop technology, manufacture products, and grow your business, visit SelectUSA.gov.

PART B - FEE(S) TRANSMITTAL

Complete and send this form, together with applicable fee(s), to: **Mail** **Mail Stop ISSUE FEE**
Commissioner for Patents
P.O. Box 1450
Alexandria, Virginia 22313-1450
or Fax **(571)-273-2885**

INSTRUCTIONS: This form should be used for transmitting the ISSUE FEE and PUBLICATION FEE (if required). Blocks 1 through 5 should be completed where appropriate. All further correspondence including the Patent, advance orders and notification of maintenance fees will be mailed to the current correspondence address as indicated unless corrected below or directed otherwise in Block 1, by (a) specifying a new correspondence address; and/or (b) indicating a separate "FEE ADDRESS" for maintenance fee notifications.

CURRENT CORRESPONDENCE ADDRESS (Note: Use Block 1 for any change of address)

26362 7590 03/28/2013

LOUIS J. HOFFMAN, P.C.
14301 North 87th Street, Suite 312
Scottsdale, AZ 85260

Note: A certificate of mailing can only be used for domestic mailings of the Fee(s) Transmittal. This certificate cannot be used for any other accompanying papers. Each additional paper, such as an assignment or formal drawing, must have its own certificate of mailing or transmission.

Certificate of Mailing or Transmission

I hereby certify that is Fee(s) Transmittal is being filed with the USPTO via EFS, on the date indicated below.

3. ASSIGNEE NAME AND RESIDENCE DATA TO BE PRINTED ON THE PATENT (print or type)

PLEASE NOTE: Unless an assignee is identified below, no assignee data will appear on the patent. If an assignee is identified below, the document has been filed for recordation as set forth in 37 CFR 3.11. Completion of this form is NOT a substitute for filing an assignment.

(A) NAME OF ASSIGNEE

ALMONDNET, INC.

(B) RESIDENCE: (CITY and STATE OR COUNTRY)

NEW YORK, NEW YORK

Please check the appropriate assignee category or categories (will not be printed on the patent) : ☐ Individual ☒ Corporation or other private group entity ☐ Government

4a. The following fee(s) are submitted:

☒ Issue Fee

☒ Publication Fee (No small entity discount permitted)

☐ Advance Order - # of Copies

4b. Payment of Fee(s): (Please first reapply any previously paid issue fee shown above)

☐ A check is enclosed.

☒ Payment by credit card.

☐ The Director is hereby authorized to charge the required fee(s), any deficiency, or credit any overpayment, to Deposit Account Number (enclose an extra copy of this form).

5. Change in Entity Status (from status indicated above)

☐ a. Applicant claims SMALL ENTITY status. See 37 CFR 1.27.

☐ b. Applicant is no longer claiming SMALL ENTITY status. See 37 CFR 1.27(g)(2).

NOTE: The Issue Fee and Publication Fee (if required) will not be accepted from anyone other than the applicant; a registered attorney or agent; or the assignee or other party in interest as shown by the records of the United States Patent and Trademark Office.

Authorized Signature /Louis J. Hoffman/

Date 06/25/2013

TITLE OF INVENTION: METHOD AND STORED PROGRAM FOR ACCUMULATING DESCRIPTIVE PROFILE DATA ALONG WITH SOURCE INFORMATION FOR USE IN TARGETING THIRD-PARTY ADVERTISEMENTS

APPLN. TYPE	ENTITY STATUS	ISSUE FEE DUE	PUBLICATION FEE DUE	PREV. PAID ISSUE FEE	TOTAL FEE(S) DUE	DATE DUE
nonprovisional	SMALL	\$890	\$300	\$0	\$1190	06/28/2013

THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. PROSECUTION ON THE MERITS IS CLOSED. THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED. SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the ENTITY STATUS shown above. If the ENTITY STATUS is shown as SMALL or MICRO, verify whether entitlement to that entity status still applies.

If the ENTITY STATUS is the same as shown above, pay the TOTAL FEE(S) DUE shown above.

If the ENTITY STATUS is changed from that shown above, on PART B - FEE(S) TRANSMITTAL, complete section number 5 titled "Change in Entity Status (from status indicated above)".

For purposes of this notice, small entity fees are 1/2 the amount of undiscounted fees, and micro entity fees are 1/2 the amount of small entity fees.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

PART B - FEE(S) TRANSMITTAL

Complete and send this form, together with applicable fee(s), to: **Mail** **Mail Stop ISSUE FEE**
Commissioner for Patents
P.O. Box 1450
Alexandria, Virginia 22313-1450
or **Fax** **(571)-273-2885**

INSTRUCTIONS: This form should be used for transmitting the ISSUE FEE and PUBLICATION FEE (if required). Blocks 1 through 5 should be completed where appropriate. All further correspondence including the Patent, advance orders and notification of maintenance fees will be mailed to the current correspondence address as indicated unless corrected below or directed otherwise in Block 1, by (a) specifying a new correspondence address; and/or (b) indicating a separate "FEE ADDRESS" for maintenance fee notifications.

CURRENT CORRESPONDENCE ADDRESS (Note: Use Block 1 for any change of address)

LOUIS J. HOFFMAN, P.C.
14301 North 87th Street, Suite 312
Scottsdale, AZ 85260

Note: A certificate of mailing can only be used for domestic mailings of the Fee(s) Transmittal. This certificate cannot be used for any other accompanying papers. Each additional paper, such as an assignment or formal drawing, must have its own certificate of mailing or transmission.

Certificate of Mailing or Transmission

I hereby certify that this Fee(s) Transmittal is being deposited with the United States Postal Service with sufficient postage for first class mail in an envelope addressed to the Mail Stop ISSUE FEE address above, or being facsimile transmitted to the USPTO (571) 273-2885, on the date indicated below.

This collection of information is required by 37 CFR 1.311. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to take 12 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, Virginia 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, Virginia 22313-1450.

Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number.

Determination of Patent Term Adjustment under 35 U.S.C. 154 (b)
(application filed on or after May 29, 2000)

The Patent Term Adjustment to date is 0 day(s). If the issue fee is paid on the date that is three months after the mailing date of this notice and the patent issues on the Tuesday before the date that is 28 weeks (six and a half months) after the mailing date of this notice, the Patent Term Adjustment will be 0 day(s).

If a Continued Prosecution Application (CPA) was filed in the above-identified application, the filing date that determines Patent Term Adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) WEB site (<http://pair.uspto.gov>).

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at 1-(888)-786-0101 or (571)-272-4200.

Privacy Act Statement

The Privacy Act of 1974 (P.L. 93-579) requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether disclosure of these records is required by the Freedom of Information Act.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (i.e., GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspection or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

Notice of Allowability	Application No. 13/585,779	Applicant(s) SHKEDI, ROY
	Examiner JONATHAN OUELLETTE	Art Unit 3629

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address--

All claims being allowable, PROSECUTION ON THE MERITS IS (OR REMAINS) CLOSED in this application. If not included herewith (or previously mailed), a Notice of Allowance (PTOL-85) or other appropriate communication will be mailed in due course. **THIS NOTICE OF ALLOWABILITY IS NOT A GRANT OF PATENT RIGHTS.** This application is subject to withdrawal from issue at the initiative of the Office or upon petition by the applicant. See 37 CFR 1.313 and MPEP 1308.

1. ☒ This communication is responsive to 3/18/2013.

2. ☐ An election was made by the applicant in response to a restriction requirement set forth during the interview on ____; the restriction requirement and election have been incorporated into this action.

3. ☒ The allowed claim(s) is/are 40-69. As a result of the allowed claim(s), you may be eligible to benefit from the **Patent Prosecution Highway** program at a participating intellectual property office for the corresponding application. For more information, please see http://www.uspto.gov/patents/init_events/pph/index.jsp or send an inquiry to PPHfeedback@uspto.gov.

4. ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).

a) ☒ All b) ☐ Some* c) ☐ None of the:

1. ☐ Certified copies of the priority documents have been received.

2. ☒ Certified copies of the priority documents have been received in Application No. 09593993.

3. ☐ Copies of the certified copies of the priority documents have been received in this national stage application from the International Bureau (PCT Rule 17.2(a)).

* Certified copies not received: _____.

Applicant has THREE MONTHS FROM THE "MAILING DATE" of this communication to file a reply complying with the requirements noted below. Failure to timely comply will result in ABANDONMENT of this application.
THIS THREE-MONTH PERIOD IS NOT EXTENDABLE.

5. ☐ CORRECTED DRAWINGS (as "replacement sheets") must be submitted.

☐ including changes required by the attached Examiner's Amendment / Comment or in the Office action of Paper No./Mail Date _____.

Identifying indicia such as the application number (see 37 CFR 1.84(c)) should be written on the drawings in the front (not the back) of each sheet. Replacement sheet(s) should be labeled as such in the header according to 37 CFR 1.121(d).

6. ☐ DEPOSIT OF and/or INFORMATION about the deposit of BIOLOGICAL MATERIAL must be submitted. Note the attached Examiner's comment regarding REQUIREMENT FOR THE DEPOSIT OF BIOLOGICAL MATERIAL.

Attachment(s)

1. ☐ Notice of References Cited (PTO-892)	5. ☐ Examiner's Amendment/Comment
2. ☐ Information Disclosure Statements (PTO/SB/08), Paper No./Mail Date _____	6. ☒ Examiner's Statement of Reasons for Allowance
3. ☐ Examiner's Comment Regarding Requirement for Deposit of Biological Material	7. ☐ Other _____.
4. ☐ Interview Summary (PTO-413), Paper No./Mail Date _____ .	

/Jonathan Ouellette/ Primary Examiner, Art Unit 3629	
---	--

DETAILED ACTION

Response to Amendment

1. Claims 1-39 have been cancelled; therefor, Claims 40-69 are currently pending in application 13/585,779.

Allowable Subject Matter

2. **Claims 40-69 are allowed.**
3. The following is an examiner's statement of reasons for allowance:
4. All previous rejections are withdrawn due to Applicant's amendments and arguments (See prosecution of child applications).

Conclusion

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jonathan Ouellette whose telephone number is (571) 272-6807. The examiner can normally be reached on Monday through Thursday, 8am - 5:00pm.
7. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jamisue Plucinski can be reached on (571) 272-6811. The fax phone numbers for the

Art Unit: 3629

organization where this application or proceeding is assigned (571) 273-8300 for all official communications.

8. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Office of Initial Patent Examination whose telephone number is (571) 272-4000. Information regarding the status of an application may also be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.

Doc Code: DIST.E.FILE Document Description: Electronic Terminal Disclaimer - Filed		PTO/SB/26 U.S. Patent and Trademark Office Department of Commerce
Electronic Petition Request	TERMINAL DISCLAIMER TO OBVIATE A DOUBLE PATENTING REJECTION OVER A "PRIOR" PATENT	
Application Number	13585779	
Filing Date	14-Aug-2012	
First Named Inventor	Roy Shkedi	
Attorney Docket Number	14-DP-CON5	
Title of Invention	Method and Stored Program for Accumulating Descriptive Profile Data Along with Source Information for Use in Targeting Third-Party Advertisements	
☒ Filing of terminal disclaimer does not obviate requirement for response under 37 CFR 1.111 to outstanding Office Action ☒ This electronic Terminal Disclaimer is not being used for a Joint Research Agreement.		
Owner	Percent Interest	
ALMONDNET, INC.	100%	
The owner(s) with percent interest listed above in the instant application hereby disclaims, except as provided below, the terminal part of the statutory term of any patent granted on the instant application which would extend beyond the expiration date of the full statutory term of prior patent number(s) 7979307 8244582 as the term of said prior patent is presently shortened by any terminal disclaimer. The owner hereby agrees that any patent so granted on the instant application shall be enforceable only for and during such period that it and the prior patent are commonly owned. This agreement runs with any patent granted on the instant application and is binding upon the grantee, its successors or assigns. In making the above disclaimer, the owner does not disclaim the terminal part of the term of any patent granted on the instant application that would extend to the expiration date of the full statutory term of the prior patent, "as the term of said prior patent is presently shortened by any terminal disclaimer," in the event that said prior patent later: - expires for failure to pay a maintenance fee; - is held unenforceable; - is found invalid by a court of competent jurisdiction; - is statutorily disclaimed in whole or terminally disclaimed under 37 CFR 1.321; - has all claims canceled by a reexamination certificate; - is reissued; or - is in any manner terminated prior to the expiration of its full statutory term as presently shortened by any terminal disclaimer.		

☒ Terminal disclaimer fee under 37 CFR 1.20(d) is included with Electronic Terminal Disclaimer request.	
☐ I certify, in accordance with 37 CFR 1.4(d)(4), that the terminal disclaimer fee under 37 CFR 1.20(d) required for this terminal disclaimer has already been paid in the above-identified application.	
☐ Applicant claims SMALL ENTITY status. See 37 CFR 1.27.	
☐ Applicant is no longer claiming SMALL ENTITY status. See 37 CFR 1.27(g)(2).	
☒ Applicant(s) status remains as SMALL ENTITY.	
☐ Applicant(s) status remains as other than SMALL ENTITY.	
I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.	
THIS PORTION MUST BE COMPLETED BY THE SIGNATORY OR SIGNATORIES I certify, in accordance with 37 CFR 1.4(d)(4) that I am:	
☒ An attorney or agent registered to practice before the Patent and Trademark Office who is of record in this application	
Registration Number <u>38918</u>	
☐ A sole inventor	
☐ A joint inventor; I certify that I am authorized to sign this submission on behalf of all of the inventors	
☐ A joint inventor; all of whom are signing this request	
☐ The assignee of record of the entire interest that has properly made itself of record pursuant to 37 <u>CFR 3.71</u>	
Signature	/Louis J. Hoffman/
Name	Louis J. Hoffman

*Statement under 37 CFR 3.73(b) is required if terminal disclaimer is signed by the assignee (owner).
 Form PTO/SB/96 may be used for making this certification. See MPEP § 324.

RESPONSE TO OFFICE ACTION

Dear Sir:

In response to the Office Action dated December 21, 2012, assignee submits concurrently a terminal disclaimer, for e-processing through the Office's electronic filing system, to overcome the statutory double patenting rejection over U.S. Patents 7,979,307, and 8,244,582, the sole ground of rejection. Assignee respectfully requests prompt allowance.

Please feel free to telephone the undersigned if it would in any way advance prosecution of this application.

Respectfully submitted,
ALMONDNET, INC.
by its attorney

Dated: February 22, 2013

This Acknowledgement Receipt evidences receipt on the noted date by the USPTO of the indicated documents, characterized by the applicant, and including page counts, where applicable. It serves as evidence of receipt similar to a Post Card, as described in MPEP 503.

New Applications Under 35 U.S.C. 111

If a new application is being filed and the application includes the necessary components for a filing date (see 37 CFR 1.53(b)-(d) and MPEP 506), a Filing Receipt (37 CFR 1.54) will be issued in due course and the date shown on this Acknowledgement Receipt will establish the filing date of the application.

National Stage of an International Application under 35 U.S.C. 371

If a timely submission to enter the national stage of an international application is compliant with the conditions of 35 U.S.C. 371 and other applicable requirements a Form PCT/DO/EO/903 indicating acceptance of the application as a national stage submission under 35 U.S.C. 371 will be issued in addition to the Filing Receipt, in due course.

New International Application Filed with the USPTO as a Receiving Office

If a new international application is being filed and the international application includes the necessary components for an international filing date (see PCT Article 11 and MPEP 1810), a Notification of the International Application Number and of the International Filing Date (Form PCT/RO/105) will be issued in due course, subject to prescriptions concerning national security, and the date shown on this Acknowledgement Receipt will establish the international filing date of the application.

**TERMINAL DISCLAIMER TO OBVIATE A DOUBLE PATENTING
REJECTION OVER A "PRIOR" PATENT**

Docket Number (Optional)

In re Application of: Shkedi, Roy

Application No.: 13/585,779

Filed: 08/14/2012

For: Method and stored program for accumulating descriptive profile data along with source information for use in targeting third-party advertisements

The owner*, AlmondNet, Inc., of 100 percent interest in the instant application hereby disclaims, except as provided below, the terminal part of the statutory term of any patent granted on the instant application which would extend beyond the expiration date of the full statutory term of **prior patent** No. 7979307 & 8244582 as the term of said **prior patent** is presently shortened by any terminal disclaimer. The owner hereby agrees that any patent so granted on the instant application shall be enforceable only for and during such period that it and the **prior patent** are commonly owned. This agreement runs with any patent granted on the instant application and is binding upon the grantee, its successors or assigns.

In making the above disclaimer, the owner does not disclaim the terminal part of the term of any patent granted on the instant application that would extend to the expiration date of the full statutory term of the **prior patent**, "as the term of said **prior patent** is presently shortened by any terminal disclaimer," in the event that said **prior patent** later:

- expires for failure to pay a maintenance fee;
- is held unenforceable;
- is found invalid by a court of competent jurisdiction;
- is statutorily disclaimed in whole or terminally disclaimed under 37 CFR 1.321;
- has all claims canceled by a reexamination certificate;
- is reissued; or
- is in any manner terminated prior to the expiration of its full statutory term as presently shortened by any terminal disclaimer.

Check either box 1 or 2 below, if appropriate.

1. ☒ For submissions on behalf of a business/organization (e.g., corporation, partnership, university, government agency, etc.), the undersigned is empowered to act on behalf of the business/organization.

I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.

Office Action Summary	Application No. 13/585,779	Applicant(s) SHKEDI, ROY	
	Examiner JONATHAN OUELLETTE	Art Unit 3629	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).

Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1) ☒ Responsive to communication(s) filed on 24 September 2012.

2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

3) ☐ An election was made by the applicant in response to a restriction requirement set forth during the interview on ____; the restriction requirement and election have been incorporated into this action.

4) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

5) ☒ Claim(s) 40-69 is/are pending in the application.

5a) Of the above claim(s) ____ is/are withdrawn from consideration.

6) ☐ Claim(s) ____ is/are allowed.

7) ☒ Claim(s) 40-69 is/are rejected.

8) ☐ Claim(s) ____ is/are objected to.

9) ☐ Claim(s) ____ are subject to restriction and/or election requirement.

* If any claims have been determined allowable, you may be eligible to benefit from the **Patent Prosecution Highway** program at a participating intellectual property office for the corresponding application. For more information, please see http://www.uspto.gov/patents/init_events/pph/index.jsp or send an inquiry to PPHfeedback@uspto.gov.

Application Papers

10) ☐ The specification is objected to by the Examiner.

11) ☐ The drawing(s) filed on ____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.

Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).

Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).

Priority under 35 U.S.C. § 119

12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).

a) ☐ All b) ☐ Some * c) ☐ None of:

1. ☐ Certified copies of the priority documents have been received.

2. ☐ Certified copies of the priority documents have been received in Application No. ____.

3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

1) ☐ Notice of References Cited (PTO-892)

2) ☒ Information Disclosure Statement(s) (PTO/SB/08)
Paper No(s)/Mail Date 20120814, 20121130

3) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. ____ .

4) ☐ Other: ____.

DETAILED ACTION

Response to Amendment

1. Claims 1-39 have been cancelled, and Claims 40-69 have been added; therefore, Claims 40-69 are currently pending in application 13/585,779.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).
3. A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned

with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

4. Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. **Claims 40-69 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-20 of U.S. Patent No. 8,244,582 and claims 1-10 of U.S. Patent No. 7,979,307.** Although the conflicting claims are not identical, they are not patentably distinct from each other because all the inventions disclose equivalent elements for automated profile collection.

Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jonathan Ouellette whose telephone number is (571) 272-6807. The examiner can normally be reached on Monday through Thursday, 8am - 5:00pm.
7. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jamisue Plucinski can be reached on (571) 272-6811. The fax phone numbers for the organization where this application or proceeding is assigned (571) 273-8300 for all official communications.
8. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Office of Initial Patent Examination whose telephone number is (571) 272-4000. Information regarding the status of an application may also be obtained from

Art Unit: 3629

the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.

Publication No.US-2012-0323718-A1

Publication Date:12/20/2012

NOTICE OF PUBLICATION OF APPLICATION

The above-identified application will be electronically published as a patent application publication pursuant to 37 CFR 1.211, et seq. The patent application publication number and publication date are set forth above.

The publication may be accessed through the USPTO's publically available Searchable Databases via the Internet at www.uspto.gov. The direct link to access the publication is currently <http://www.uspto.gov/patft/>.

The publication process established by the Office does not provide for mailing a copy of the publication to applicant. A copy of the publication may be obtained from the Office upon payment of the appropriate fee set forth in 37 CFR 1.19(a)(1). Orders for copies of patent application publications are handled by the USPTO's Office of Public Records. The Office of Public Records can be reached by telephone at (703) 308-9726 or (800) 972-6382, by facsimile at (703) 305-8759, by mail addressed to the United States Patent and Trademark Office, Office of Public Records, Alexandria, VA 22313-1450 or via the Internet.

In addition, information on the status of the application, including the mailing date of Office actions and the dates of receipt of correspondence filed in the Office, may also be accessed via the Internet through the Patent Electronic Business Center at www.uspto.gov using the public side of the Patent Application Information and Retrieval (PAIR) system. The direct link to access this status information is currently <http://pair.uspto.gov/>. Prior to publication, such status information is confidential and may only be obtained by applicant using the private side of PAIR.

Further assistance in electronically accessing the publication, or about PAIR, is available by calling the Patent Electronic Business Center at 1-866-217-9197.

Office of Data Management, Application Assistance Unit (571) 272-4000, or (571) 272-4200, or 1-888-786-0101

SUPPLEMENTAL INFORMATION DISCLOSURE STATEMENT

Dear Sir:

Assignee discloses the references listed on forms PTO-1449 attached to this document.

Assignee continues to direct the Examiner to the following applications, which share the same first inventor, as well as the references cited therein:

Serial No.	Filing Date	Earliest Parent Filing Date
11/968,117	12/31/2007

SUPPLEMENTAL PRELIMINARY AMENDMENT

Dear Sir:

Assignee requests entry of the following amendments and consideration of the following remarks.

Amendments to the Claims begin on page 2.

Remarks begin on page 9.

Upon entry of this amendment, there will be twenty (30) total claims pending, of which, three (3) are independent claims. Assignee has previously paid for twenty (20) total claims and three (3) independent claims, accordingly fees for ten (10) excess total claims (\$30 x 10) are submitted herewith.

Amendments

IN THE CLAIMS:

1.-39. (Cancelled)

40. (New) An automated method of collecting profiles of Internet-using entities, the method comprising:

(a) electronically receiving at a programmed computer system coupled to a global computer network, from at least one server controlled by one of a plurality of unaffiliated third parties, an electronically URL-redirected partial profile of an entity that uses a user computer coupled to the global computer network to access a website, which partial profile is available to one of the third parties and contains at least one profile attribute related to the entity, which partial profile is received along with an identification of the one of the third parties that contributed the partial profile, and automatically with the computer system storing the received partial profile;

(b) automatically with the computer system electronically adding the received partial profile to a maintained profile believed to be related to the same entity;

(c) automatically with the computer system generating and storing an electronic record of which of the plurality of unaffiliated third parties contributed to the maintained profile particular profile attributes; and

(d) wherein the maintained profile, including the added partial profile, comprises data used in targeting third-party advertisements to the user computer over the global computer network.

41. (New) The method of claim 40 further comprising, in accordance with a predetermined arrangement, automatically using the electronic record of which of the plurality of unaffiliated third parties contributed to the maintained profile particular profile attributes to create electronic data used to identify a payment amount due to the unaffiliated third party as a result of using at least one of the profile

attributes in the partial profile contributed by that third party in targeting the third-party advertisements to the entity's computer over the global computer network.

42. (New) The method of claim 40 wherein the computer system electronically adding the received partial profile to a maintained profile believed to be related to the same entity comprises the computer system adding the received partial profile to a maintained profile believed related to the same entity on account of the received partial profile and the maintained profile being related to the same user computer.

43. (New) The method of claim 42 wherein the computer system determines that the received partial profile and the maintained profile are related to the same user computer by automatically reading a cookie on the user computer.

44. (New) The method of claim 40 further comprising automatically with the computer system electronically maintaining an electronic record of which unaffiliated third party contributed, to the maintained profile, the profile attributes used in targeting the advertisements.

45. (New) The method of claim 40 further comprising automatically with the computer system electronically determining whether the received partial profile contains any profile attributes about the entity that were not previously contained in a maintained profile.

46. (New) The method of claim 40 further maintaining with the computer system a credibility rating associated with at least one of the profile attributes of the maintained profile.

47. (New) The method of claim 46 wherein the credibility rating is reflected in a price for the at least one profile attribute.

48. (New) The method of claim 40 further comprising automatically with the computer system selecting profile attributes from the maintained profile based on the source thereof.

49. (New) The method of claim 40 further comprising automatically with the computer system electronically reading a cookie previously stored on the entity's computer, as a result of the URL redirection.

50. (New) A computer system programmed and connected to perform a method of collecting profiles of Internet-using entities, the method comprising:

(a) electronically receiving at a computer system coupled to a global computer network, from at least one server controlled by one of a plurality of unaffiliated third parties, an electronically URL-redirected partial profile of an entity that uses a user computer coupled to the global computer network to access a website, which partial profile is available to one of the third parties and contains at least one profile attribute related to the entity, which partial profile is received along with an identification of the one of the third parties that contributed the partial profile, and automatically with the computer system storing the received partial profile;

(b) automatically with the computer system electronically adding the received partial profile to a maintained profile believed to be related to the same entity;

(c) automatically with the computer system generating and storing an electronic record of which of the plurality of unaffiliated third parties contributed to the maintained profile particular profile attributes; and

(d) wherein the maintained profile, including the added partial profile, comprises data used in targeting third-party advertisements to the user computer over the global computer network.

51. (New) The computer system of claim 50 wherein the method performed by the computer system further comprises, in accordance with a predetermined arrangement, automatically using the electronic record of which of the plurality of unaffiliated third parties contributed to the maintained profile particular profile attributes to create electronic data used to identify a payment amount due to the unaffiliated third party as a result of using at least one of the profile attributes in the

partial profile contributed by that third party in targeting the third-party advertisements to the entity's computer over the global computer network.

52. (New) The computer system of claim 50 wherein the computer system electronically adding the received partial profile to a maintained profile believed to be related to the same entity comprises the computer system adding the received partial profile to a maintained profile believed related to the same entity on account of the received partial profile and the maintained profile being related to the same user computer.

53. (New) The computer system of claim 52 wherein the computer system determines that the received partial profile and the maintained profile are related to the same user computer by automatically reading a cookie on the user computer.

54. (New) The computer system of claim 50 wherein the method performed by the computer system further comprises automatically with the computer system electronically maintaining an electronic record of which unaffiliated third party contributed, to the maintained profile, the profile attributes used in targeting the advertisements.

55. (New) The computer system of claim 50 wherein the method performed by the computer system further comprises automatically with the computer system electronically determining whether the received partial profile contains any profile attributes about the entity that were not previously contained in a maintained profile.

56. (New) The computer system of claim 50 wherein the method performed by the computer system further comprises maintaining with the computer system a credibility rating associated with at least one of the profile attributes of the maintained profile.

57. (New) The computer system of claim 56 wherein the credibility rating is reflected in a price for the at least one profile attribute.

58. (New) The computer system of claim 50 wherein the method performed by the computer system further comprises automatically with the computer system selecting profile attributes from the maintained profile based on the source thereof.

59. (New) The computer system of claim 50 wherein the method performed by the computer system further comprises automatically with the computer system electronically reading a cookie previously stored on the entity's computer, as a result of the URL redirection.

60. (New) A tangible, non-transitory data storage medium comprising indicia of instructions for a processor to perform a method of collecting profiles of Internet-using entities, the method comprising:

(a) electronically receiving at a programmed computer system coupled to a global computer network, from at least one server controlled by one of a plurality of unaffiliated third parties, an electronically URL-redirected partial profile of an entity that uses a user computer coupled to the global computer network to access a website, which partial profile is available to one of the third parties and contains at least one profile attribute related to the entity, which partial profile is received along with an identification of the one of the third parties that contributed the partial profile, and automatically with the computer system storing the received partial profile;

(b) automatically with the computer system electronically adding the received partial profile to a maintained profile believed to be related to the same entity;

(c) automatically with the computer system generating and storing an electronic record of which of the plurality of unaffiliated third parties contributed to the maintained profile particular profile attributes; and

(d) wherein the maintained profile, including the added partial profile, comprises data used in targeting third-party advertisements to the user computer over the global computer network.

61. (New) The data storage medium of claim 60 wherein the indicia of instructions instruct the processor to perform a method that further comprises: in accordance with a predetermined arrangement, automatically using the electronic record of which of the plurality of unaffiliated third parties contributed to the maintained profile particular profile attributes to create electronic data used to identify a payment amount due to the unaffiliated third party as a result of using at least one of the profile attributes in the partial profile contributed by that third party in targeting the third-party advertisements to the entity's computer over the global computer network.

62. (New) The data storage medium of claim 60 wherein the computer system electronically adding the received partial profile to a maintained profile believed to be related to the same entity comprises the computer system adding the received partial profile to a maintained profile believed related to the same entity on account of the received partial profile and the maintained profile being related to the same user computer.

63. (New) The data storage medium of claim 62 wherein the computer system determines that the received partial profile and the maintained profile are related to the same user computer by automatically reading a cookie on the user computer.

64. (New) The data storage medium of claim 60 wherein the indicia of instructions instruct the processor to perform a method that further comprises: automatically with the computer system electronically maintaining an electronic record of which unaffiliated third party contributed, to the maintained profile, the profile attributes used in targeting the advertisements.

65. (New) The data storage medium of claim 60 wherein the indicia of instructions instruct the processor to perform a method that further comprises: automatically with the computer system electronically determining whether the received partial profile contains any profile attributes about the entity that were not previously contained in a maintained profile.

66. (New) The data storage medium of claim 60 wherein the indicia of instructions instruct the processor to perform a method that further comprises: maintaining with the computer system a credibility rating associated with at least one of the profile attributes of the maintained profile.

67. (New) The data storage medium of claim 66 wherein the credibility rating is reflected in a price for the at least one profile attribute.

68. (New) The data storage medium of claim 60 wherein the indicia of instructions instruct the processor to perform a method that further comprises: automatically with the computer system selecting profile attributes from the maintained profile based on the source thereof.

69. (New) The data storage medium of claim 60 wherein the indicia of instructions instruct the processor to perform a method that further comprises: automatically with the computer system electronically reading a cookie previously stored on the entity's computer, as a result of the URL redirection.

Remarks

This application presents claims modified from those issued in Serial No. 13/115,949, changed as follows (the comparison shows, in redlined form, a comparison of independent claim 1 of the parent to the first independent claim of this application):

An automated method of collecting profiles of Internet-using entities, the method comprising:

(a) electronically receiving at a programmed computer system coupled to a global computer network, from at least one server controlled by one of a plurality of unaffiliated third parties, an electronically URL-redIRECTED partial profile of an entity that uses a user computer coupled to the global computer network ~~and accessing to access~~ to access a website, which partial profile is available to one of the third parties and contains at least one profile attribute related to the entity, which partial profile is received along with an identification of the one of the third parties that contributed the partial profile, and automatically with the computer system storing the received partial profile;

(b) ~~wherein receiving the partial profile is achieved as a result of automatic electronic URL redirection from a portion of a page of the website accessed by the user computer;~~

~~——~~(c)——automatically with the computer system electronically adding the received partial profile to a maintained profile believed to be related to the same entity;

~~(d)~~(c) automatically with the computer system generating and storing an electronic record of which of the plurality of unaffiliated third parties contributed to the maintained profile particular profile attributes; and

~~(e)~~(d) wherein the maintained profile, including the added partial profile, comprises data used in targeting third-party advertisements to the user computer over the global computer network.

The other claims are apparatus and computer-program counterparts, with dependent claims modified to conform. Accordingly, the claims of this application should be allowable.

Please feel free to telephone the undersigned if it would in any way advance prosecution of this application.

PROTECTING YOUR INVENTION OUTSIDE THE UNITED STATES

Since the rights granted by a U.S. patent extend only throughout the territory of the United States and have no effect in a foreign country, an inventor who wishes patent protection in another country must apply for a patent in a specific country or in regional patent offices. Applicants may wish to consider the filing of an international application under the Patent Cooperation Treaty (PCT). An international (PCT) application generally has the same effect as a regular national patent application in each PCT-member country. The PCT process **simplifies** the filing of patent applications on the same invention in member countries, but **does not result** in a grant of "an international patent" and does not eliminate the need of applicants to file additional documents and fees in countries where patent protection is desired.

Almost every country has its own patent law, and a person desiring a patent in a particular country must make an application for patent in that country in accordance with its particular laws. Since the laws of many countries differ in various respects from the patent law of the United States, applicants are advised to seek guidance from specific foreign countries to ensure that patent rights are not lost prematurely.

Applicants also are advised that in the case of inventions made in the United States, the Director of the USPTO must issue a license before applicants can apply for a patent in a foreign country. The filing of a U.S. patent application serves as a request for a foreign filing license. The application's filing receipt contains further information and guidance as to the status of applicant's license for foreign filing.

Applicants may wish to consult the USPTO booklet, "General Information Concerning Patents" (specifically, the section entitled "Treaties and Foreign Patents") for more information on timeframes and deadlines for filing foreign patent applications. The guide is available either by contacting the USPTO Contact Center at 800-786-9199, or it can be viewed on the USPTO website at <http://www.uspto.gov/web/offices/pac/doc/general/index.html>.

For information on preventing theft of your intellectual property (patents, trademarks and copyrights), you may wish to consult the U.S. Government website, <http://www.stopfakes.gov>. Part of a Department of Commerce initiative, this website includes self-help "toolkits" giving innovators guidance on how to protect intellectual property in specific countries such as China, Korea and Mexico. For questions regarding patent enforcement issues, applicants may call the U.S. Government hotline at 1-866-999-HALT (1-866-999-4158).

LICENSE FOR FOREIGN FILING UNDER

Title 35, United States Code, Section 184

Title 37, Code of Federal Regulations, 5.11 & 5.15

GRANTED

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where

page 2 of 3

the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under 37 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Bureau of Industry and Security, Department of Commerce (15 CFR parts 730-774); the Office of Foreign Assets Control, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

NOT GRANTED

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).

PROTECTING YOUR INVENTION OUTSIDE THE UNITED STATES

Since the rights granted by a U.S. patent extend only throughout the territory of the United States and have no effect in a foreign country, an inventor who wishes patent protection in another country must apply for a patent in a specific country or in regional patent offices. Applicants may wish to consider the filing of an international application under the Patent Cooperation Treaty (PCT). An international (PCT) application generally has the same effect as a regular national patent application in each PCT-member country. The PCT process **simplifies** the filing of patent applications on the same invention in member countries, but **does not result** in a grant of "an international patent" and does not eliminate the need of applicants to file additional documents and fees in countries where patent protection is desired.

Almost every country has its own patent law, and a person desiring a patent in a particular country must make an application for patent in that country in accordance with its particular laws. Since the laws of many countries differ in various respects from the patent law of the United States, applicants are advised to seek guidance from specific foreign countries to ensure that patent rights are not lost prematurely.

Applicants also are advised that in the case of inventions made in the United States, the Director of the USPTO must issue a license before applicants can apply for a patent in a foreign country. The filing of a U.S. patent application serves as a request for a foreign filing license. The application's filing receipt contains further information and guidance as to the status of applicant's license for foreign filing.

Applicants may wish to consult the USPTO booklet, "General Information Concerning Patents" (specifically, the section entitled "Treaties and Foreign Patents") for more information on timeframes and deadlines for filing foreign patent applications. The guide is available either by contacting the USPTO Contact Center at 800-786-9199, or it can be viewed on the USPTO website at <http://www.uspto.gov/web/offices/pac/doc/general/index.html>.

For information on preventing theft of your intellectual property (patents, trademarks and copyrights), you may wish to consult the U.S. Government website, <http://www.stopfakes.gov>. Part of a Department of Commerce initiative, this website includes self-help "toolkits" giving innovators guidance on how to protect intellectual property in specific countries such as China, Korea and Mexico. For questions regarding patent enforcement issues, applicants may call the U.S. Government hotline at 1-866-999-HALT (1-866-999-4158).

LICENSE FOR FOREIGN FILING UNDER**Title 35, United States Code, Section 184****Title 37, Code of Federal Regulations, 5.11 & 5.15****GRANTED**

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where

page 2 of 3

the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under 37 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Bureau of Industry and Security, Department of Commerce (15 CFR parts 730-774); the Office of Foreign Assets Control, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

NOT GRANTED

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).

NOTICE TO FILE CORRECTED APPLICATION PAPERS

Filing Date Granted

An application number and filing date have been accorded to this application. The application is informal since it does not comply with the regulations for the reason(s) indicated below. Applicant is given TWO MONTHS from the date of this Notice within which to correct the informalities indicated below. Extensions of time may be obtained by filing a petition accompanied by the extension fee under the provisions of 37 CFR 1.136(a).

The required item(s) identified below must be timely submitted to avoid abandonment:

- A replacement abstract not exceeding 150 words in length and commencing on a separate sheet in compliance with 37 CFR 1.72(b) and 37 CFR 1.121 is required.

Applicant is cautioned that correction of the above items may cause the specification and drawings page count to exceed 100 pages. If the specification and drawings exceed 100 pages, applicant will need to submit the required application size fee.

Replies should be mailed to:

Mail Stop Missing Parts
Commissioner for Patents
P.O. Box 1450
Alexandria VA 22313-1450

Registered users of EFS-Web may alternatively submit their reply to this notice via EFS-Web.

RESPONSE TO NOTICE

Dear Sir:

In response to the Notice to File Corrected Application Papers, dated August 29, 2012, assignee submits the following replacement abstract.

Amendments

IN THE ABSTRACT:

Please delete the abstract paragraph and add the following paragraph:

A method of accumulating descriptive profile data uses a databank that can be contacted by profile providers who contribute profile elements about an online visitor. The method includes keeping track of which profile provider contributed which elements, so that use of particular elements in targeting electronic third-party advertisements automatically can result in compensation.

Remarks

The Notice to File Corrected Application Papers, dated August 29, 2012, requests a replacement abstract. Applicant presents a replacement abstract in compliance with the word count suggested by 37 C.F.R. § 1.72(b).

Please feel free to telephone the undersigned if it would in any way advance prosecution of this application.

Respectfully submitted,
ALMONDNET, INC.
by its attorney

If a new application is being filed and the application includes the necessary components for a filing date (see 37 CFR 1.53(b)-(d) and MPEP 506), a Filing Receipt (37 CFR 1.54) will be issued in due course and the date shown on this Acknowledgement Receipt will establish the filing date of the application.

National Stage of an International Application under 35 U.S.C. 371

If a timely submission to enter the national stage of an international application is compliant with the conditions of 35 U.S.C. 371 and other applicable requirements a Form PCT/DO/EO/903 indicating acceptance of the application as a national stage submission under 35 U.S.C. 371 will be issued in addition to the Filing Receipt, in due course.

New International Application Filed with the USPTO as a Receiving Office

If a new international application is being filed and the international application includes the necessary components for an international filing date (see PCT Article 11 and MPEP 1810), a Notification of the International Application Number and of the International Filing Date (Form PCT/RO/105) will be issued in due course, subject to prescriptions concerning national security, and the date shown on this Acknowledgement Receipt will establish the international filing date of the application.

This collection of information is required by 37 CFR 1.53(b). The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.11 and 1.14. This collection is estimated to take 12 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. **SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.**
If you need assistance in completing the form, call 1-800-PTO-9199 and select option 2.

Privacy Act Statement

The **Privacy Act of 1974 (P.L. 93-579)** requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether disclosure of these records is required by the Freedom of Information Act.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (*i.e.*, GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspection or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

A Descriptive-Profile Mercantile Method

CROSS-REFERENCE TO RELATED APPLICATIONS

This application is a continuation of application Ser. No. 09/593,993, filed 06/14/2000 and entitled A Descriptive-Profile Mercantile Method, which itself claims priority from Israel Application No. 133,489 filed on 12/13/1999. The disclosures of said application and its entire file wrapper (included all prior art references cited therewith) are hereby specifically incorporated herein by reference in their entirety as if set forth fully herein. Furthermore, a portion of the disclosure of this patent document contains material, which is subject to copyright protection. The copyright owner has no objection to the facsimile reproduction by anyone of the patent document or the patent disclosure, as it appears in the Patent and Trademark Office patent file or records, but otherwise reserves all copyright rights whatsoever.

FIELD OF THE INVENTION

The present invention generally relates to a mercantile method.

More specifically, the present invention relates to a mercantile method directed to brokerage of attributes of information.

BACKGROUND OF THE INVENTION

Advances in database technology have given rise to commerce in records, files and databases, per se. For example, paying for a database credit check for an

individual or buying a mailing list have become common practice. These well-known systems do not address the problems of how the database is to collect all of the attributes of information that are contained therein. Often, the contents of a database are the result of massive clerical efforts, which usually represent the product of many calendar years of transactional accumulations.

Sometimes, whole databases are merged to form higher precision data clusters. For example, voting turnout lists may be integrated with census data to produce a register from which a statistical profile of voters may be derived. Another example relates to merging the records of a credit card company with the records of a mortgage company. For those persons having an entry in each of the constituent record sets, the result is a credit profile of more precise resolution. In this example, the actual economic value of merged records exceeds the combined values of constituent records. This would likewise be true for the inclusion of any additional attribute of information to any record.

Unfortunately, the current state of information commerce is focused on the sales of whole databases, whole records, or evaluations based on single or clusters of records. In commercial applications where specific attributes of information strongly affect the value of evaluations, there is a need in the art for commerce in such attributes. For example, in targeted advertising, every attribute, which substantially affects the probability of that advertisement's success, innately has a discrete economic value. Likewise, in actuarial calculations, how precisely a client can be profiled determines what the probability of profiting from such a client.

More specifically, there remains a need in the art for assigning values to information attributes or for managing value assignments to information attributes. In the absence of such assignments or management, the commerce in information attributes, per se, is substantially precluded; especially in client-specific advertisement profiling, client-specific actuarial targeting, and the like.

NOTICES

The present invention will forthwith be described with a certain degree of particularity, however those versed in the art will readily appreciate that various modifications and alterations may be carried out without departing from either the spirit or scope, as hereinafter claimed.

In describing the present invention, explanations are presented in light of currently accepted theories and models; be they scientific, economic, sociological, etc. Such theories and models are subject to changes, both adiabatic and radical. Often these changes occur because representations for fundamental component elements are innovated, because new transformations between these elements are conceived, or because new interpretations arise for these elements or for their transformations. Therefore, it is important to note that the present invention relates to specific technological actualization in embodiments. Accordingly, theory or model dependent explanations herein, related to these embodiments, are presented for the purpose of teaching, the current man of the art or the current team of the art, how these embodiments may be substantially realized in practice. Alternative or equivalent explanations for these embodiments may neither deny nor alter their realization.

GLOSSARY

Profile: A collection of attributes that describe a person or an organization or any other entity that can be described by a combination of data. For example, a person profile could be a collection of the following attributes: the person's gender, the person's age, the person's education, the person's interests as reflected in his behavior or as reported by the person or as reflected from his membership in a specific club and so forth. An organization profile could be a collection of the following attributes: number of employees, activities the organization maintain whether business activities or other activities, the organization's revenues, the organization's gross profit, the organization's operating profit, the organization's net profit, the organization's

equity and so forth. It should be mentioned that profile attributes include, among other things, attributes that enable the identification of the entity described by the profile such as name, address, URL, cookie. In addition, profile attributes may include information learned about the entity described by the profile from a communication protocol such as the information learned about the visitor to a web site from its http header.

User: any entity that owns attributes contained in at least one partial profile. The entity could be a web site that has a database of its visitor profiles, an organization with a database of partial profiles or the subject described by the profile itself.

Cookie: A text (or alphanumeric) string that is put on a computer hard disk of a visitor to a web site by the web site's server. The cookie enables the identification of the specific computer on its future visits to the web site. Each cookie is reported (by the computer browser) only to the web site server that installed that cookie. Therefore, it should be clearly understood that the only way for a third party to acquire cookie data is to receive that data from the server that installed that cookie, or from another third party who so acquired the data from a chain of parties going back to that cookie setting server, etc.

Contract: An agreement between a user and a system incorporating the method of the present invention wherein ownership of an attribute or a right to represent an attribute is transferred from one party to another for an agreed consideration. Generally, examples include a purchase of an attribute for cash or credit, or an acceptance of an attribute according to a brokerage fee schedule. More specifically, since there are many problems in assigning the value of an attribute, the system of the present invention may simply agree to store new attributes with the proviso that users wishing to acquire a copy of these attributes will transfer a payment specified by the original attribute

provider (the royalty payment) to that provider and a brokerage fee for providing this service payable to the system's account. Alternatively, the attribute provider or the system may elect to assign a value to an attribute using a formula which factors in such parameters as newness of the attribute, geographical extent wherein the attribute is of presumable value, veracity of the attribute, etc.

SUMMARY OF THE INVENTION

The present invention generally relates to a descriptive-profile mercantile method, for use at a juncture in a data-communications topology having associated therewith a maintained databank of partial profiles, the method including the steps of:

- (a) from a user, receiving a transaction having therein a first partial profile;
- (b) using the first partial profile, searching a databank having a plurality of second partial profiles, wherein is included in said databank at least one null profile so that said searching will always yield at least one proximate second partial profile to the first partial profile;
- (c) between the user and the databank, contracting:
 - i. for the databank to own or represent a right to a first mutually agreed portion of the first partial profile, and substantially thereafter said databank incorporating the agreed portion of the first profile into at least one second partial profile; or
 - ii. for the user to own or represent a right to a second mutually agreed portion of at least one said proximate second partial profile, and substantially thereafter the databank transmitting to the user the second mutually agreed portion of the second profile.

The present invention comes to provide a means for making viable the economic commerce in information attributes. Since the value of such attribute will

only become well understood with the implementation of the present method in the electronic commerce marketplace, the present best enabling mode for the present invention operates on a brokerage representation model. According to this model, a typical use of the present invention may be according to the following scenario.

An electronically facilitated visitor to an Internet web-site presents his credentials. These credentials could be the visitor profile itself or a cookie or a user name and so forth that enables the site to retrieve the visitor profile or any combination of the above. Of course, it could be that the site does not have a profile of the visitor to that web-site. The web-site may make better profit from the visitation if it were to know more about the visitor. The web-site forwards particulars from the visitor's credentials (a partial profile), as well as (optionally) a redirect to a portion of the visitor's page to a server located in cyberspace (at a juncture in a data communications topology). By redirecting a portion of the visitor's page to the server, the visitor's browser reports to the server a cookie the server put on the visitor's computer in the past, if any. This server interconnects the user's transactions and the server own cookie (if used) with a computer having therein software for running the method of the present invention. Associated with the computer is a databank, having therein an organized ensemble of information attributes.

The computer uses the forwarded visitor credentials with its server cookie (if any) to search the associated databank. Either or both of two possible mercantile events are set into motion thereby.

Firstly, it may be the case that the credentials contain new information attributes which were not heretofore known in the databank. According to a simple model of evaluating the value of these attributes, the database incorporates these new attributes and the computer assigns a user selected micro-payment royalty for each elected use of these attributes by any other user. Stated simply, if the user provides a date of birth for a known named person in the data bank, then the user is the owner of that date of birth attribute, and a user designated micro payment royalty (or credit) is assigned to the user for each purchase of that attribute by

another user. The owner of the databank may likewise collect for itself a brokerage commission for each use of the attribute.

Secondly, the databank may contain new attributes that were not in the initial visitor credentials. In this case, the user is told that such attributes exist for purchase, what these new attributes describe (e.g. education level associated with the visitor), and the micro-payment royalty plus brokerage fee that is charged for each respective attribute. If the user is interested in any of these attributes, then a contract is agreed to, resulting in a micro-payment transfer from the user to the broker and to the royalty owner, and a transfer of a copy of the attribute to the user (the buyer).

Other types of contracts and other types of pricing structures are available for the user in his interactions with the "system of the present invention" (e.g. the computer with its associated databank); as will be describes in subsequent sections.

BRIEF DESCRIPTION OF THE FIGURES AND APPENDICES

In order to understand the invention and to see how it may be carried out in practice, embodiments including the preferred embodiment will now be described, by way of non-limiting example only, with reference to the accompanying drawings, in which:

Figure 1 illustrates a schematic view of an Internet data-communications topology;

Figure 2 illustrates a schematic view of a system using the descriptive-profile mercantile method;

Figure 3 illustrates a schematic view of a computer program product;

Figure 4 illustrates a schematic view of a program storage device; and

Figure 5 illustrates a schematic view of an installed computer system for facilitating a descriptive-profile mercantile method.

DETAILED DESCRIPTION OF THE INVENTION

In Figure 1 there is presented a schematic illustration of a data-communications topology as a wide area network (e.g. the Internet) (1) having interconnected thereto a visitor (2), a user (3), and a system (4) embodying the method of the present invention.

The present invention relates to a descriptive-profile mercantile method (further presented in figure 2), for use at a juncture in a data-communications topology having associated therewith a maintained databank of partial profiles, the method including the steps of:

- (a) from a user (3), receiving (5) a transaction having therein a first partial profile;
- (b) using the first partial profile, searching (6) a databank (7) having a plurality of second partial profiles, wherein is included in said databank at least one null profile so that said searching will always yield at least one proximate second partial profile to the first partial profile;
- (c) between the user and the databank, contracting:
 - i. (10) for the databank to own or represent a right to a first mutually agreed portion of the first partial profile, and substantially thereafter said databank incorporating the agreed portion of the first profile into at least one second partial profile; or
 - ii. (9) for the user to own or represent a right to a second mutually agreed portion of at least one said proximate second partial profile, and substantially thereafter the databank transmitting to the user the second mutually agreed portion of the second profile.

According to an embodiment of the present invention, receiving a transaction includes extracting at least one predetermined key portion of the first partial profile,

wherein at least one of these extracted predetermined key portions is then used as the first partial profile for the searching of the databank. According to a variation of this embodiment, extracting includes constructing at least one composite key for the searching of the databank using a combinatorial of at least two of the predetermined key portions of the first partial profile.

According to another embodiment of the present invention, contracting includes selecting a pricing structure according to a rating of the user.

According to a different embodiment of the present invention, contracting a right includes accepting an obligation to pay for substantially each use or transfer of the agreed portion.

According to a further embodiment of the present invention, incorporating the agreed portion includes assigning a credibility weighting to the agreed portion of the first profile. According to a variation of this embodiment, incorporating includes convoluting the assigned credibility weighting of the first profile with a pre-existing credibility weighting of a substantially like agreed portion of a proximate second profile; and storing the convoluted new credibility weighting for the agreed portion in the databank. According to a further refinement of this variation, contracting includes selecting a pricing structure according to a result of a computation comparing the new credibility weighting with the pre-existing credibility weighting.

According to an additional embodiment of the present invention, **receiving** a transaction includes **consulting** an external database (11).

According to an extension embodiment of the present invention, the method furthermore includes:

- i) **searching** at least one external database (11) for a partial profile or portion thereof which complements a at least one second partial profile of the databank, and
- ii) between the database and the databank, **contracting** for the databank to own or represent a right to a first mutually agreed portion of the complementing first partial profile, and substantially thereafter said databank **incorporating** the agreed portion of the first profile into at least one second partial profile.

The present invention also relates to a computer program product (see figure 3) including a computer usable medium having computer readable program code embodied therein for facilitating descriptive profile mercantile activities, the computer readable program code including:

- a) first computer readable program code (20) for causing a computer to **receive** a transaction from a user, the transaction having therein a first partial profile;
- b) tied to the first computer readable program code, second computer readable program code (21) for causing the computer to use the first partial profile to **search** a databank having a plurality of second partial profiles, wherein is included in said databank at least one null profile so that said searching will always yield at least one proximate second partial profile to the first partial profile; and
- c) tied to the second computer readable program code, third computer readable program code (22) for causing the computer to **contract** between the user and the databank:
 - i) for the databank to own or represent a right to a first mutually agreed portion of the first partial profile, and substantially thereafter for said databank to **incorporate** the agreed portion of the first profile into at least one second partial profile; or

- ii) for the user to own or represent a right to a second mutually agreed portion of at least one said proximate second partial profile, and substantially thereafter for the databank to **transmit** to the user the second mutually agreed portion of the second profile.

Furthermore, as illustrated in figure 4, the present invention relates to a program storage device (30) readable by machine, tangibly embodying a program of instructions executable by the machine to perform method steps for a descriptive-profile mercantile method, for use at a juncture in a data-communications topology having associated therewith a maintained databank of partial profiles, said method steps including:

- a) from a user, **receiving** a transaction having therein a first partial profile;
- b) using the first partial profile, **searching** a databank having a plurality of second partial profiles, wherein is included in said databank at least one null profile so that said searching will always yield at least one proximate second partial profile to the first partial profile;
- c) between the user and the databank, **contracting**:
 - i) for the databank to own or represent a right to a first mutually agreed portion of the first partial profile, and substantially thereafter said databank **incorporating** the agreed portion of the first profile into at least one second partial profile; or
 - ii) for the user to own or represent a right to a second mutually agreed portion of at least one said proximate second partial profile, and substantially thereafter the databank **transmitting** to the user the second mutually agreed portion of the second profile.

The present invention also relates to a computer system for facilitating a descriptive-profile mercantile method (see figure 5), the system including:

- a) a computer (40) installed at a juncture in a data-communications topology (1);

- b) associated with said computer, a storage device (42) for keeping a maintained databank of partial profiles; and
- c) associated with the internal functionality components of the computer, appurtenances (41) for performing method steps including:
 - i) from a user, **receiving** a transaction having therein a first partial profile;
 - ii) using the first partial profile, **searching** a databank having a plurality of second partial profiles, wherein is included in said databank at least one null profile so that said searching will always yield at least one proximate second partial profile to the first partial profile;
 - iii) between the user and the databank, **contracting**:
 - (1) for the databank to own or represent a right to a first mutually agreed portion of the first partial profile, and substantially thereafter said databank **incorporating** the agreed portion of the first profile into at least one second partial profile; or
 - (2) for the user to own or represent a right to a second mutually agreed portion of at least one said proximate second partial profile, and substantially thereafter the databank **transmitting** to the user the second mutually agreed portion of the second profile.

DETAILED DESCRIPTION OF THE PREFERRED EMBODIMENT

In the context of the preferred embodiment of the present invention, "attribute" relates to an information particular (or attribute) that is aggregated with other particulars to form a partial profile. Examples of attributes may be: name, address, income, age, education, details of product purchase transaction over the Internet, credit rating, etc.

In the context of the preferred embodiment of the present invention, "data" relates to knowledge concerning a visitor.

In the context of the preferred embodiment of the present invention, "data-communications topology" relates to a virtually interconnected collection of communications facilities including at least one mutually agreed protocol between any directly communication facilities in the collection.

In the context of the preferred embodiment of the present invention, "information" relates to the collection of all attributes known by a user about a visitor.

In the context of the preferred embodiment of the present invention, "pricing structure" relates to the price and payments for data exchanged by the user and the system.

In the context of the preferred embodiment of the present invention, all profiles are, by definition, partial. A profile may describe aspects of a person, or an organization, or of a corporation. It is logically impossible to have complete information about any of these. However, any particular of information about any of these may have an economic value for a customer of profile information.

In the context of the preferred embodiment of the present invention, a "databank" relates to an accessible searchable aggregation of records or like data structure units wherein "partial" profiles are stored.

In the context of the preferred embodiment of the present invention, "system" relates to a computer embodying the descriptive profile mercantile method according to the present invention.

In the context of the preferred embodiment of the present invention, "transaction" relates to a process to complete a communicative activity between the parties that reciprocally affects or influences the other party. It may include an acquisition provision of a partial profile, an identification of the user, a reference to a contractual mechanism related to the acquisition, screening, and/or distribution of new data and a pricing structure.

In the context of the preferred embodiment of the present invention, "user" relates to an individual, web site, search-robot and/or other type of software agent that interacts with the system by virtue of their contacting a juncture in the data-

communications topology where the method is installed in order to acquire, trade, dispose of and/or broker some attribute data for the purpose of acquiring some potential economic or other value in connection with that attribute data.

In the context of the preferred embodiment of the present invention, “visitor” relates to an entity the user has access to or is interested in. The visitor could be a consumer or potential customer of an offering of goods, services, or information.

INTRODUCTION

This invention relates to gaining an ability to buy, sell, broker, and trade specific pieces of data between two disjoint parties within the context of a system that may include a databank and that may include a micro-payment royalty arrangement as a pricing structure in connection with the aforesaid exchange of data.

The specific pieces of data that may be involved in the exchange are known as attributes. The attributes relate to details of a particular profile. The profile can be a collection of descriptive information as used by an advertiser for generating targeted advertising or used by an insurer for finding a more specific actuarial rate. It is noted that a secondary type of profile that is also contained in another embodiment of the invention is a form of a collective profile that is an aggregate that is based on a pre-structured analysis of the existing individual profiles such as average or typical.

In the normal course of a transaction between a user and an embodiment of a system according to the present invention a typical scenario ensues:

1. A visitor arrives at a web site of the user. The web site of the user collects a variety of specific data about the visitor that may include the visitor's cookie and any other information that the visitor voluntarily disclosed to the web site.
2. The web site has a number of interests in the visitor and the information that the web site possesses about the visitor. In connection to a profile of the visitor, there would be a benefit to the web site if the web site could acquire additional information as to the specific visitor or at least acquire typical profile information about a class of individuals possessing similar profiles relative to the specific visitor. Possession of such additional information will enable the web site to engage in potentially more successful product offering and/or targeted advertising to the visitor. Another independent benefit that

can accrue to the web site is the gain of some economic remuneration for and as a function of the information itself that the web site possesses about the visitor.

In order for the web site to progress and to potentially achieve either or both of the above mentioned benefits (the improved targeted advertising (or improved product offering) to the visitor as well as the gain of some economic remuneration of the information itself about the visitor); the web site now becomes a user of the system of the present invention. The web site as a user of the present invention constructs a transaction that contain those portions of the information it possesses about the visitor that it is allowed to diverge to third parties.

The transaction includes:

1. Information that the user is allowed to disclose to third parties about the visitor.
2. Contract terms about the user, typically including but not limited to: identity, pre-determined rate structures per transaction type, and information type, pre-determined contractual relations with the system as to what each party - the user and the system can do with information exchanged between them.
3. Instructions as to the type of transaction - buy, sell, broker, and/or trade information to be conducted between the user and the system.

Thus, the user sends a transaction in the data communication topology where the system is installed; as for example, via the Internet, Intranet, LAN, WAN, wireless packet communications system, etc. Thereupon, the system receives the transaction, identifies the user, interprets instructions sent concerning the transaction's contractual terms and type, i.e. the applicable contract and structure for using all or some of the attributes contained in the information (hereinafter, "First Visitor Profile Data") includes the profile of the visitor as known to the site,

visitor information included in the communication protocol such as the information in the http header, profile attributes that enable the identification of the entity described by the profile by the databank such as name, address, URL, cookie put by the server connected to the databank and so forth. It should be noted that the profile of the visitor known to the site mentioned above might not include certain attributes the user is not interested in exposing to the databank or attributes that are of no interest to the databank. For example, a databank that identifies web site visitors by the cookie its server puts on their computers, could decide not to take 'real world identifying attributes' such as name, address and e-mail in order to give web surfers a level of anonymity

The system searches a databank according to what is contained in the First Visitor Profile Data (contained in the transaction) in order to find either: at least one profile in the databank that matches the information in the visitor profile (that includes the information dispatched by the user related to the visitor, visitor information included in the communication protocol such as the information in the http header, profile attributes that enable the identification of the entity described by the profile by the databank such as name, address, URL, cookie put by the server connected to the databank and so forth) or to find at least one aggregate profile that describes a profile of a group that the visitor might belong to.

If it is the intent of the user, as contained in the transaction instructions, to purchase additional attributes that may relate to the First Visitor Profile Data, then the system examines the profiles it has found in its search, determines if it has any new attributes not sent by the user. In the event that the system has found new attributes that were sent by the user, the system reviews the contract instructions of the transaction in order to determine the relevance of the new attributes found to the intent of the user. If the system finds the new attributes relevant, then the system will debit the user's account in accordance with a pre-agreed pricing structure in connection with additional attributes related to the First Visitor Profile Data that are delivered as data to the user.

A non-limiting example of the principle of data release in accordance with the user's contractual instructions is herein provided. It may be that in the contract with the user, the user has instructed that it is never interested in receiving any data that does not specifically relate to the visitor, meaning the user is not interested in information about an average profile of a group that the visitor might belong to. Another example could be that the user has instructed that it is not interested in the habits of a visitor, but specifically, only in information about his age, gender, education and income. The reason may be to preclude the system from disclosing the name of the visitor since the user always knows the name of the visitor and has no interest in paying to re-learn what it already knows. Thus, in accordance with the contractual instructions, no attribute data relating to information the user specified it is not interested in receiving will either be sent, and since such information was not sent, it will not be debited to the user's account.

An alternative example is the case where the user only has an interest in a pre-defined - within the transactional instructions - set of attributes. For example, the user may only be interested in what type of car the visitor drives, or what the visitor's current credit rating is, or, what may be the most interesting example, what category of goods have been purchased by the visitor over a pre-defined period. It is noted that elements of this last example may typically be a piece of information that other typical users trade with or sell to the system.

It should be noted that a user may restrict the use of attributes it sells to the databank. The restrictions could be of number of usages, to whom the databank has the permission to sell, and so forth.

A second class of data that is found by the system as it searches may equally be of value to the user. This is the search result that demonstrates discrepancies between the disclosure of information by the user to the system and the results of the search by the system. The fact that there is a discrepancy, as well as the nature of the discrepancy, may be of value to the user, the system, or both.

A third category is the example where there are pieces of information relating to the user in the descriptive portion of the transaction that describes the

visitor which the search by the system failed to disclose. For example, the make and model of the car driven by the visitor, recently purchased from the user's web site might be the new information otherwise unknown to the system. In this instance, the system would go through an appropriate contractual arrangement in order to credit the user for the new attribute which the user has delivered to the system.

The various kinds of contracts available in a transaction between the system and the user are: buy, sell, broker, and trade. Where new information is disclosed to the system a royalty arrangement (or, alternatively, an outright purchase or sale) comprised of micro payments may be employed. In addition to the various kinds of contracts, there are various types of users. A user may be a large scale commercial web site or an individual small scale web page. Furthermore, there may be different types of rate structures. An audited user which may have taken efforts to verify information regarding a user, for example a credit bureau, would have a different payment rate for new information that it discloses to the system than a user with information that is neither audited nor verified but which is causal.

Thus the value of information in a databank can change as a function of its credibility and source. Accordingly, the royalty payment rate for said information could be enhanced or reduced as a function of its value.

In addition to profiles of a visitor it may be of interest to allow an embodiment of the invention to create a type of secondary market for the information consisting of a predetermined class of profiles about all visitors. For example it may be of interest to know what type of individuals, including their profession, income, gender, and geographic location, buy a certain model of vehicle. The purchase, sale, trade, and/or brokerage of this class of data can then enter a mercantile model and may be of significant interest to advertisers.

DESCRIPTION

The preferred embodiment of the present invention relates to the use of a procedure on a computer attached to a network, Internet, Intranet, LAN, WAN, wireless packet communication system or hybrid composite of any of the above whereby data is exchanged by purchase, sale, trade, or brokerage and micro payments of royalties as a pricing structure that may accompany the data exchange.

This procedure begins with the introduction to the system of data that contains a partial profile that will be used in the establishment, supplementation, or improvement of a descriptive profile. The partial profile will often itself contain certain predetermined identified commercial attributes, demographic attributes, or behavioral attributes or combinations thereof or the like. These attributes then allow construction of a descriptive profile that resides as existing information in a databank. However, inherent design characteristics of the descriptive profile result in the descriptive profile always being partial. This means that data within the profile relates to one or more attributes of the item, business, service, data characteristic, advertisement, or person that is being profiled. The descriptive profile is then methodically employed in an activity that verifies or contradicts, maintains, modifies, updates or downgrades, and/or enhances the databank of previously existing partial profiles. Thereafter, the system may retain, market, and/or exchange with the user new resultant (of the process described) data that contains further descriptive profile attributes for further usage.

Since the present invention is directed to the value of details of a profile, it is an object of the present invention to facilitate the transfer of rights to such particulars. For example, a visitor may arrive at a commercial Internet web-site. The visitor may disclose his cookie and may provide the web-site with other facts about him/herself on a non-confidential basis. The web site may then contact a juncture in a data-communications topology where the present method is installed. According to one scenario, the web-site is a familiar user of the present method, and has pre-arranged the terms and conditions of what information he may wish to

transfer rights to. For example, after considering the web-site transmission containing the non-confidential disclosed information, the system may find that all of the information already recorded in its databank with the single exception of the visitor's annual income. By prearranged contract details, the web-site is given a predetermined micro-payment credit for providing this detail. Alternatively, by prearranged contract the databank agrees to store this user attribute and to credit the providing web-site with a micro-payment royalty for each use of this attribute "purchased" from the databank by each interested party.

Likewise, according to the same prearranged contractual arrangement between the user and the databank, the databank may find that it represents a right to an attribute that has not been disclosed to it by the user. In this example, the system's databank may then transmit a query to the user in the form: "for the identified visitor (detail from original transaction inserted), are you interested in the following attributes according to the associated payment conditions: (education level, micro-payment price schedule 1), (gender, micro-payment price schedule 2), etc.?"

The systematic procedure described in the preceding paragraph includes various steps that can be better illustrated by example. However, the reader should be aware that all examples which are given in this document are limiting examples that are expressed in this document solely for the purpose of explanation and not for the purpose of limitation.

Initially a user will interface with the system by providing the system's databank with a partial profile consisting of at least one attribute which will enable the identification of the entity described by the profile in the system's databank (the attribute could be for example, the cookie installed on the visitor's computer (the visitor to a web site which is a user of the system of course) by the server attached to the databank. The user enables the server attached to the databank to receive the cookie it installed by redirecting a portion of the visitor page to the databank's server) . For example a company might provide the system with a name of one of its customers. This step sets the process in motion.

For once there is an initiation by contribution of an initial attribute list by the user, the system will search existing data in the databank.

It should be recognized that the existing databank would have the characteristics that when it is approached by the user it will already contain or have the ability to acquire or generate a multiplicity of other partial profiles and room for at least one null profile; since it is the business of the databank to consider representing any new item of profile information. For example the databank might contain a list of geographic addresses of individuals. Then, once the user provides a name, the system will provide either a corresponding address or the message address unknown.

An alternative example has the user, in this case a web portal, providing the computer with a list of the previously monitored search habits of one of the portal's visitors. The system's databank might then suggest to the portal other web sites that contain text and/or graphics of similar type which the portal might then suggest to the visitor, presuming that the system maintains profiles on portals or web sites or surfing habits. If the web sites provided by the portal are provided on a fee basis, then a mechanism may be included in the contractual basis between the portal and the system whereby partial remuneration in the form of a micro payment would be made for any click through activity on the part of the visitor to a web site suggested by the system to the portal and then suggested by the portal to the visitor. It is noted that the click itself would be of further interest to both the portal and the system in the building by the system of a profile related to the behavioral characteristics or psychological makeup or predisposition of the visitor.

Once there is a coupling of the first partial profile of the user with a second partial profile existing in the databank, a contract can be formed between the user and the system related to the new information set which has resulted. The contract should provide that the system will own or acquire a license to utilize an agreed portion of the first partial profile which has been confirmed and at some time

thereafter the system will incorporate the agreed portion of the first profile into at least one second partial profile in the system's databank.

For example the name of an individual (an initial partial profile provided by the user) when coupled with age (a second partial profile provided by another use, inherent in the system's databank, or acquired by the system searching other databases will provide a partial second profile of certain demographic value consisting of name and age. If, for example, other partial profiles are found to correspond to gender, geographic address, and/or general income, there is a further enhancement of the partial second profile which results in a gain in the value of the information residing or incorporated from other databases into the system's databank and offered for exchange in accordance with the terms and instructions existing between the user and the system.

Alternatively, rather than the system acquiring by ownership or license an agreed portion of the first profile; the user itself might desire to acquire a right to own or license to use at least a part of an agreed portion of the second partial profile which has been confirmed by the system by its coupling with the first partial profile. Thus it would be an agreed function of the system to provide to the user an agreed portion of the second profile

For example the user might have the name and car model owned by a driver; the system's databank might have or have acquired the driving record of the driver and the safety record of the particular car model. The result of the coupling is the ability to refine an appropriate insurance rate for the particular driver and his car.

Alternatively the descriptive profile mercantile method might do both of the above by providing ownership or license to use certain information gleaned by the coupling of an initial partial profile with a second partial profile to both the system and the user. For example the system's databank might retain the use of the names and addresses and actuarial calculations of insurance agents residing in a geographical area proximate to the driver mentioned in the above paragraph, while a user (in this case the driver himself) might retain the name and address of the insurance agents willing to offer him insurance.

Inherent in the above examples is that the system that receives an input or exchange of data consisting of a first partial profile from a user will distill from that information at least one predetermined attribute. This attribute is then utilized by the system for searching the system's databank. Thus, the system, when receiving data, will, within the parameters of the transaction, extract at least one predetermined key portion of the first partial profile, wherein at least one of these extracted predetermined key portions is then used as the first partial profile for the searching of the system's databank. When the system extracts data it also constructs at least one composite key for the searching of the databank using a combinatorial of at least two of the predetermined key portions of the first partial profile. For example, a combination of the name and address of a person described in a profile will be used to search the databank. The combinatorial use is of importance to differentiate between partial profiles of people with the same name that do not allow cookies, for example. Continuing the example, in addition to whether the advertisement is for automobiles, it may be important to couple that information with advertisements only for home utility vans such that the first partial profile will now consist of car advertisements only for home utility vans.

An "interest" expressed by a user and the system, as to what these parties define between them as relevant data, may be expressed by the user and the system in a pricing structure. The pricing structure will include a contract between the user and the system that will include an obligation by the party which utilizes the information flowing to the system's databank to pay the other for substantially each use or transfer of the agreed information transferred between them. Instant data may or may not be ephemeral, and the profiles themselves may have either a limited or an unlimited shelf live. This means that information becomes currency and is treated by the parties in a manner similar to currency. To own or utilize certain information, there is a price associated with it either as a sales price or a rental price. In the event that the information is re-useable, in part or in whole then a certain predetermined royalty may be associated with each use of the portion of the

information which is reused. Let an example be provided at this juncture to further illustrate the operation of the preferred embodiment.

Normative market research consists of an array of information that is gleaned from answers provided to a questioner. However, the market research contains within itself not only the ability to provide truthful responses but also the ability to provide sampling errors due to either wrong answers, wrongly recorded answers, an error in the framing of the questions themselves, and/or an error in the population base which is being questioned. Clearly the larger and more diverse (or more homogeneous) the sample population (depending on the type of responses required), the larger number of similar questions answered, and the ability to better refine the questions all assist in increasing the value of the market analysis performed.

In the embodiment of the invention described, the user provides either a question or an answer, i.e. the initial partial profile. Thereupon, the system thereupon takes the initial partial profile and extracts from it a predetermined data that is then used for searching the databank. Depending on the contract between the user and the system, the system will or will not pay the user for the initial partial profile, or parts thereof. The search of the databank, results in the construction of a new profile that contains at least two predetermined parts of the first partial profile. For example, both the user and the system may be interested in screening the responses to a market survey of an individual respondent in order to ascertain whether on previous or similar questionnaires the respondent's answers were identical or deviant. This will allow both the user and the system to value the truthfulness of the current responses. The aforesaid quality value will have a predetermined monetary or other agreed "barter" value between the parties.

In addition, since the upgrading or downgrading of the credibility of the respondent has qualitative value in and of itself for other market surveys; to the extent that the user's information contributed to the new evaluation of the respondent, a payment might flow to the user. Similarly, to the extent that the upgrading or downgrading of the credibility of the respondent is based on existing information in the system's databank, the system may provide a royalty payment to

the initiator of the existing information in the system's databank. Thus, to the extent that the information inherent in the initial partial profile and in existing partial profiles have value and to the extent that participants who utilize the system (including the system's databank itself) have agreed on the value rating of the information and the amount to be paid between them an exchange of predetermined economic value will flow between the participants. In addition, to the extent there is further information and further participants, the continuing re-evaluation by the participants of a market valuation of the information as a function of the expected utility value of the information may further drive over time the price evaluation of both the information and the payments to be made between users and the system.

Furthermore, the preferred embodiment may embrace a further possible variations, i.e. an assignment by the contracting participants and/or the databank, per se, of a credibility rating to the agreed portion of the first partial profile. Coupling of the first partial profile with a second partial profile result in verification/confirmation of the first partial profile and second partial profile or contradiction/down grading of the credibility of the first partial profile and/or the second partial profile. By example, the first partial profile contains the name of Joe Blue, the information that he is male, and the information that he lives in Mississippi. However, the corresponding second partial profile associated with Joe Blue contains the information that he is a she (real name Josephine) and that she lives in Mississippi. The verification - perhaps- of the name is of dubious value in and of itself. However, in the event that for a certainty it can be established that Joe Blue is really Josephine Blue and that the gender is female rather than male, then, to a user of the information, the validation or disqualification of the information has significant value. Assume that the user of the information is an advertiser of beauty care products. The fact that Joe is male or female can result in an advertisement of beauty care products specifically targeted to the profile - in this case, male or female. In this instant case, the user (the advertiser) will assign a value to the credibility of the information.

Intrinsic to the example immediately above is the ability of the participants either individually or collectively to either raise or lower the rated utility value assigned to the first partial profile consistent with the pre-determined (but perhaps equally dynamic) credibility weighting system of the second partial profile. Thereafter the newly rated utility value of the partial profile incorporated in the database is stored for future usage. Lets see how this works in the case of Joe (Josephine) Blue. The first partial profile indicated that Joe was male; however all subsequent partial profiles which could be assigned to Joe (Josephine) Blue render to a statistical certainty that Joe (Josephine) Blue is actually female. This, combined with other attributes like geographical address, income level, and even spending patterns, when stored in the databank, results in an increasingly higher utility value rating for the (credible) information associated with Joe (Josephine) Blue. Thus, the raising or lowering of the credibility rating of an attribute due to the interaction between the associated attribute of the first partial profile and the second partial profile results in a corresponding change in the rating of the anticipated utility value of the attributes and profile themselves.

A further variation of the preferred embodiment incorporates an agreed portion of the data and assigns a credibility rating to the agreed portion of the first profile. This is accomplished by assigning a credibility rating of the first profile with a pre-existing credibility rating of a substantially like agreed portion of a proximate second profile; and storing the convoluted new credibility weighting for the agreed portion in the system's databank. This may result in an interesting result. When the participants select a pricing structure in accordance with a predetermined corresponding rating of the utility value of the partial attributes, the result is the continuous re-calibration of new information with existing information and a predetermined agreement by the parties as to the various value rating of an attribute.

If, for example, Ms. Blue's credit rating were confirmed as bankrupt, the desire of an advertiser to send her advertisements for the purchase of a pleasure craft would be seriously impacted notwithstanding the fact that other information in the databank related to Ms Blue indicates that she is a water skiing enthusiast and

otherwise fits both demographic, behavioral, and/or psychological profiles (which might reside in the databank) associated with candidates for potential purchasers of pleasure craft.

Another particularly useful variation of the preferred embodiment of the invention includes within it the possibility of consultation by the system with an external database or external databases. For example, the system is not restricted to searching the existing attributes residing within its own databank. Rather, the system is capable of acting as a first partial profile user to other databases, searching them, trading information with them or borrowing, renting, or purchasing other attributes with them. Thus the information related to credit worthiness attributes of Ms. Blue of the previous example might reside in a database owned by a credit company. Nonetheless, as per the example, the system would be able to utilize the information resident in the credit company's database for its own purposes related to the transaction with the user.

Furthermore the preferred embodiment may embrace other possible variations, including an ability to search one or more external databases for a partial profile, or part thereof, which complements at least one second partial profile of the system's databank. In the example of Ms. Blue, the name may be resident in the databank as well as a number of different external databases. Other attributes may reside as well either in the databank or in one or more external databases. Nonetheless, the result by search, correlation, and rating of the information in the databank and the databases results in both an expanded profile and a higher rating as to credibility of the partial profile existing both in the databank and in the other databases.

Thus, both system and owners of other databases may themselves contract between themselves for the right to own, use, license, or rent the other's partial profile and for the right to sublicense others to further use the other's partial profile. Since the information may very well have a shelf life - even as its credibility and rating may change over time - the result is a corresponding velocity of the value of the information in that not only is the more the information used is the more

valuable it is and becomes; but the more the information can be used the greater the potential value it has to its owners of licensors (with a right to sublicense). If we return to our example of Ms. Blue, the fact that she is female (information from the system's databank), is interested in water skiing (a partial attribute contributed by the first partial profile user), and has a restored credit rating (provided by an external credit service database) means that another user looking at its own profiles of young, single, sports minded women, would desire to provide her with advertisements related to scuba diving in the Gulf of Mexico, for example. This other user would pay the system for the information it has stored or accessed. The system itself would pay the initial provider of the verification of the gender of Ms. Blue, to the user who contributed that Ms. Blue is interested in water skiing and might share a fee associated with the clarification of Ms. Blues' actual credit worthiness.

As an alternative embodiment to a process that has previously been described is the ability to embody the invention not as a process but as a computer useable program, i.e. a software product, which allows the exchange of descriptive profiles between users, databanks, and/or computers. Another alternative is usage as a computer program storage device.

CLAIMS

I/We claim:

1. A descriptive-profile mercantile method, for use at a juncture in a data-communications topology having associated therewith a maintained databank of partial profiles, the method including the steps of:

a) from an entity who owns or represents a right to multiple profiles, electronically receiving a transaction having therein a first partial profile of a single visitor to the entity, said transaction including real-time access to the single visitor wherein an identifier is recognized or placed on the single visitor;

b) using the first partial profile, electronically searching a databank having a plurality of second partial profiles, wherein is included in said databank at least one null profile so that said electronic searching will always yield at least one proximate second partial profile to the first partial profile;

c) i) between the entity and the databank, electronically contracting for a purchase-payment or a trade or a brokerage payment in exchange for the databank to own or represent a right to a first mutually agreed portion of the first partial profile, and substantially thereafter said databank incorporating the agreed portion of the first profile into at least one second partial profile; or

ii) between the entity and the databank, electronically contracting for a purchase-payment or a trade or a brokerage-payment in exchange for the entity to own or represent a right to a second mutually agreed portion of at least one said proximate second partial profile, and substantially thereafter the databank transmitting to the user-entity the second mutually agreed portion of the second profile.

2. The method according to claim 1 wherein electronically receiving a transaction includes extracting at least one predetermined key portion of the first partial profile, wherein at least one of these extracted predetermined key portions is then used as the first partial profile for the electronic searching of the databank.

3. The method according to claim 2 wherein extracting includes constructing at least one composite key for the electronic searching of the databank using a combinatorial of at least two of the predetermined key portions of the first partial profile.
4. The method according to claim 1 wherein electronically contracting includes selecting a pricing structure according to a rating of the entity.
5. The method according to claim 1 wherein electronically contracting a right includes accepting an obligation to pay for substantially each use or transfer of the agreed portion.
6. The method according to claim 1 wherein incorporating the agreed portion includes assigning a credibility weighting to the agreed portion of the first profile.
7. The method according to claim 6 wherein incorporating includes convoluting the assigned credibility weighting of the first profile with a pre-existing credibility weighting of a substantially like agreed portion of a proximate second profile; and storing the convoluted new credibility weighting for the agreed portion in the databank.
8. The method according to claim 7 wherein electronically contracting includes selecting a pricing structure according to a result of a computation comparing the new credibility weighting with the pre-existing credibility weighting.
9. The method according to claim 1 wherein electronically receiving a transaction includes consulting an external database.
10. The method according to claim 1 further including i) electronically searching at least one external database for a partial profile or portion thereof which

complements a at least one second partial profile of the databank, and ii) between the database and the databank, electronically contracting for the databank to own or represent a right to a first mutually agreed portion of the complementing first partial profile, and substantially thereafter said databank incorporating the agreed portion of the first profile into at least one second partial profile.

11. A computer program product including a computer usable medium having computer readable program code embodied therein for facilitating descriptive profile mercantile activities, the computer readable program code including:

a) first computer readable program code for causing a computer to receive a transaction from an entity who owns or represents a right to multiple profiles, the transaction having therein a first partial profile of a single visitor to the entity, said transaction including real-time access to the single visitor wherein an identifier is recognized or placed on the single visitor;

b) tied to the first computer readable program code, second computer readable program code for causing the computer to use the first partial profile to search a databank having a plurality of second partial profiles, wherein is included in said databank at least one null profile so that said searching will always yield at least one proximate second partial profile to the first partial profile; and

c) tied to the second computer readable program code, third computer readable program code: i) for causing the computer to contract for a purchase-payment or a trade or a brokerage payment between the entity and the databank for the databank to own or represent a right to a first mutually agreed portion of the first partial profile, and substantially thereafter for said databank to incorporate the agreed portion of the first profile into at least one second partial profile; or ii) for causing the computer to contract for a purchase-payment or a trade or a brokerage payment between the entity and the databank for the entity to own or represent a right to a second mutually agreed portion of at least one said proximate second partial profile, and substantially thereafter for the databank to transmit to the entity the second mutually agreed portion of the second profile.

12. A program storage device readable by machine, tangibly embodying a program of instructions executable by the machine to perform method steps for a descriptive-profile mercantile method, for use at a juncture in a data-communications topology having associated therewith a maintained databank of partial profiles, said method steps including:

a) from an entity who owns or represents a right to multiple profiles, receiving a transaction having therein a first partial profile of a single visitor to the entity, said transaction including real-time access to the single visitor wherein an identifier is recognized or placed on the single visitor;

b) using the first partial profile, searching a databank having a plurality of second partial profiles, wherein is included in said databank at least one null profile so that said searching will always yield at least one proximate second partial profile to the first partial profile;

c) i) between the entity and the databank, contracting for a purchase-payment or a trade or a brokerage payment in exchange for the databank to own or represent a right to a first mutually agreed portion of the first partial profile, and substantially thereafter said databank incorporating the agreed portion of the first profile into at least one second partial profile; or ii) between the entity and the databank, contracting for a purchase-payment or a trade or a brokerage payment in exchange for the entity to own or represent a right to a second mutually agreed portion of at least one said proximate second partial profile, and substantially thereafter the databank transmitting to the entity the second mutually agreed portion of the second profile.

13. A computer system for facilitating a descriptive-profile mercantile method, the system including:

a) a computer installed at a juncture in a data-communications topology;

b) associated with said computer, a storage device for keeping a maintained databank of partial profiles; and

c) associated with the internal functionality components of the computer, software for performing method steps including:

i) from an entity who owns or represents a right to multiple profiles, receiving a transaction having therein a first partial profile of a single visitor to the entity, said transaction including real-time access to the single visitor wherein an identifier is recognized or placed on the single visitor;

ii) using the first partial profile, searching a databank having a plurality of second partial profiles, wherein is included in said databank at least one null profile so that said searching will always yield at least one proximate second partial profile to the first partial profile;

iii) (1) between the entity and the databank, contracting for a purchase-payment or a trade or a brokerage payment in exchange for the databank to own or represent a right to a first mutually agreed portion of the first partial profile, and substantially thereafter said databank incorporating the agreed portion of the first profile into at least one second partial profile; or (2) between the entity and the databank, contracting for a purchase-payment or a trade or a brokerage payment in exchange for the entity to own or represent a right to a second mutually agreed portion of at least one said proximate second partial profile, and substantially thereafter the databank transmitting to the entity the second mutually agreed portion of the second profile.

14. A descriptive-profile mercantile method, for use at a juncture in a data-communications topology having associated therewith a maintained databank of partial profiles, the method including the steps of:

a) establishing a data rights contract agreement between an entity and a databank,

b) from the entity, who owns or represents a right to multiple profiles, electronically receiving a transaction having therein a first partial profile of a single visitor to the entity, said transaction including real-time access to the single visitor wherein an identifier is recognized or placed on the single visitor;

c) using the first partial profile, electronically searching the databank having a plurality of second partial profiles, wherein is included in said databank at least one null profile so that said electronic searching will always yield at least one proximate second partial profile to the first partial profile;

d) i) between the entity and the databank, electronically affirming the agreement for a royalty payment or a purchase-payment or a trade or a brokerage payment in exchange for the databank to own or represent a right to a first mutually agreed portion of the first partial profile, and substantially thereafter said databank incorporating the agreed portion of the first profile into at least one second partial profile; or ii) between the entity and the databank, electronically affirming the agreement for a royalty payment or a purchase-payment or a trade or a brokerage-payment in exchange for the entity to own or represent a right to a second mutually agreed portion of at least one said proximate second partial profile, and substantially thereafter the databank transmitting to the user-entity the second mutually agreed portion of the second profile.

15. The method according to claim 14 wherein electronically receiving a transaction includes extracting at least one predetermined key portion of the first partial profile, wherein at least one of these extracted predetermined key portions is then used as the first partial profile for the electronic searching of the databank.

16. The method according to claim 15 wherein extracting includes constructing at least one composite key for the electronic searching of the databank using a combinatorial of at least two of the predetermined key portions of the first partial profile.

17. The method according to claim 14 wherein electronically contracting includes selecting a pricing structure according to a rating of the entity.

18. The method according to claim 14 wherein electronically contracting a right includes accepting an obligation to pay for substantially each use or transfer of the agreed portion.

19. The method according to claim 14 wherein incorporating the agreed portion includes assigning a credibility weighting to the agreed portion of the first profile.

20. The method according to claim 19 wherein incorporating includes convoluting the assigned credibility weighting of the first profile with a pre-existing credibility weighting of a substantially like agreed portion of a proximate second profile; and storing the convoluted new credibility weighting for the agreed portion in the databank.

21. The method according to claim 20 wherein electronically contracting includes selecting a pricing structure according to a result of a computation comparing the new credibility weighting with the pre-existing credibility weighting.

22. The method according to claim 14 wherein electronically receiving a transaction includes consulting an external database.

23. The method according to claim 14 further including i) electronically searching at least one external database for a partial profile or portion thereof which complements a at least one second partial profile of the databank, and ii) between the database and the databank, electronically contracting for the databank to own or represent a right to a first mutually agreed portion of the complementing first partial profile, and substantially thereafter said databank incorporating the agreed portion of the first profile into at least one second partial profile.

24. A computer program product including a computer usable medium having computer readable program code embodied therein for facilitating descriptive profile mercantile activities, the computer readable program code including:

- a) first computer readable program code for causing a computer to receive a transaction from an entity who owns or represents a right to multiple profiles, the transaction having therein a first partial profile of a single visitor to the entity, said transaction including real-time access to the single visitor wherein an identifier is recognized or placed on the single visitor;
- b) tied to the first computer readable program code, second computer readable program code for causing the computer to use the first partial profile to search a databank having a plurality of second partial profiles, wherein is included in said databank at least one null profile so that said searching will always yield at least one proximate second partial profile to the first partial profile; and
- c) tied to the second computer readable program code, third computer readable program code: in accordance with an
 - i) for causing the computer to affirm an aspect of an established data rights contract agreement, between the entity and the databank, for a royalty-payment or a purchase-payment or a trade or a brokerage payment between the entity and the databank for the databank to own or represent a right to a first mutually agreed portion of the first partial profile, and substantially thereafter for said databank to incorporate the agreed portion of the first profile into at least one second partial profile; or
 - ii) for causing the computer to affirm an aspect of an established data rights contract agreement, between the entity and the databank, for a royalty-payment or a purchase-payment or a trade or a brokerage payment between the entity and the databank for the entity to own or represent a right to a second mutually agreed portion of at least one said proximate second partial profile, and substantially thereafter for the databank to transmit to the entity the second mutually agreed portion of the second profile.

25. A program storage device readable by machine, tangibly embodying a program of instructions executable by the machine to perform method steps for a descriptive-profile mercantile method, for use at a juncture in a data-communications topology having associated therewith a maintained databank of partial profiles, said method steps including:
- a) from an entity who owns or represents a right to multiple profiles, receiving a transaction having therein a first partial profile of a single visitor to the entity, said transaction including real-time access to the single visitor wherein an identifier is recognized or placed on the single visitor;
 - b) using the first partial profile, searching a databank having a plurality of second partial profiles, wherein is included in said databank at least one null profile so that said searching will always yield at least one proximate second partial profile to the first partial profile;
 - c) i) between the entity and the databank, affirming an aspect of an established data rights contract agreement, between the entity and the databank, for a royalty-payment or a purchase-payment or a trade or a brokerage payment in exchange for the databank to own or represent a right to a first mutually agreed portion of the first partial profile, and substantially thereafter said databank incorporating the agreed portion of the first profile into at least one second partial profile; or
 - ii) between the entity and the databank, affirming an aspect of an established data rights contract agreement, between the entity and the databank, for a royalty-payment or a purchase-payment or a trade or a brokerage payment in exchange for the entity to own or represent a right to a second mutually agreed portion of at least one said proximate second partial profile, and substantially thereafter the databank transmitting to the entity the second mutually agreed portion of the second profile.
26. A computer system for facilitating a descriptive-profile mercantile method, the system including:

- a) a computer installed at a juncture in a data-communications topology;
- b) associated with said computer, a storage device for keeping a maintained databank of partial profiles; and
- c) associated with the internal functionality components of the computer, software for performing method steps including:
 - i) from an entity who owns or represents a right to multiple profiles, receiving a transaction having therein a first partial profile of a single visitor to the entity, said transaction including real-time access to the single visitor wherein an identifier is recognized or placed on the single visitor;
 - ii) using the first partial profile, searching a databank having a plurality of second partial profiles, wherein is included in said databank at least one null profile so that said searching will always yield at least one proximate second partial profile to the first partial profile;
 - iii) (1) between the entity and the databank, affirming an aspect of an established data rights contract agreement, between the entity and the databank, for a royalty-payment or a purchase-payment or a trade or a brokerage payment in exchange for the databank to own or represent a right to a first mutually agreed portion of the first partial profile, and substantially thereafter said databank incorporating the agreed portion of the first profile into at least one second partial profile; or (2) between the entity and the databank, affirming an aspect of an established data rights contract agreement, between the entity and the databank, for a royalty-payment or a purchase-payment or a trade or a brokerage payment in exchange for the entity to own or represent a right to a second mutually agreed portion of at least one said proximate second partial profile, and substantially thereafter the databank transmitting to the entity the second mutually agreed portion of the second profile.

27. Transaction of Profile Information Attributes; the attributes being derived from using of a descriptive-profile mercantile method substantially as hereinbefore described and illustrated and said method operating at a juncture in a data-

communications topology having associated therewith a maintained databank of profiles, the method including the steps of establishing a data rights contract agreement between a user-entity and a databank-entity, and in accordance with the agreement either (a) assigning to the databank-entity to own or represent a right to a mutually agreed portion of a profile, and substantially thereafter the databank-entity electronically incorporating the agreed portion; or (b) assigning to the user-entity to own or represent a right to a mutually agreed portion of a profile, and substantially thereafter the databank-entity electronically transmitting to the user-entity the agreed portion; the transaction comprising:

using an electronic procedure on a computer attached to a data-communications topology wherein the procedure is facilitating, between two disjoint parties, a data exchange of said attributes by an accompanying pricing structure selected from the list: purchase, sale, trade, brokerage, and payment of royalties.

28. The transaction according to claim 27 wherein the data-communications topology having the computer attached thereto is selected from the list: a network, Internet, Intranet, LAN, WAN, wireless packet communication system, and a hybrid composite of any of the aforesaid.

29. The transaction according to claim 27 wherein the computer has therein an organized ensemble of information attributes.

30. The transaction according to claim 27 wherein said attributes enable identification of an entity described by a profile and the attributes are selected from the list: name, address, URL, cookie, information learned from a communication protocol about a visitor to a web site from an http header, the visitor's credentials, a redirect to a portion of the visitor's page to a server located in cyberspace, name, address, income, gender, age, education, details of a person's or organization's product purchase transaction over the Internet, credit rating, web portal search

habits, a questionnaire response, a person's interests as reflected in his behavior or as reported by the person or as reflected from his membership in a specific club, an organization's number of employees, an organization's activities, an organization's revenues, an organization's gross profit, an organization's operating profit, an organization's net profit, an organization's equity, descriptive information as used by an advertiser for generating targeted advertising or used by an insurer for finding a more specific actuarial rate, and an average or typical aggregate based on a pre-structured analysis of an existing individual profiles.

31. The transaction according to claim 27 wherein the user-entity is selected from the list: an individual, web site, search-robot, and software agent.

32. The transactions according to claim 27 wherein the computer installs a method to acquire, trade, pay royalty for use of, dispose of, or broker attribute data.

33. The transaction according to claim 27 wherein the data exchange includes articles of information commerce selected from the list: information the user-entity is allowed to disclose to third parties about a visitor; contract terms about the visitor; instructions as to type of transaction; visitor demographic attributes; visitor behavioral attributes; and a predetermined class of profiles for a plurality of visitors.

34. The transaction according to claim 27 wherein the procedure includes a databank-entity activity selected from the list: verification, contradiction, maintenance, modification, update, downgrade, enhancement, and credibility rating.

35. A computer useable program protocol between two entities allowing an electronic transaction of Profile Information Attributes substantially as hereinbefore described and illustrated; and the transactions includes an activity selected from the list: assigning values to information attributes, managing value assignments to

information attributes, commerce in information attributes, client-specific advertisement profiling of information attributes, and client-specific actuarial targeting of information attributes; and the entities are selected from the list: users, databanks, and computers; and the attributes are characterized by their respective derivation from a descriptive-profile mercantile method substantially as hereinbefore described and illustrated.

36. A Transaction of Profile Information Attributes user-side software for use in a descriptive-profile mercantile method data-communications protocol operating at a juncture in a data-communications topology having associated therewith a maintained databank of profiles wherein the method includes the step of establishing a data rights contract agreement between a user-entity and a databank-entity for a royalty payment or a purchase-payment or a trade or a brokerage-payment, and in accordance with the agreement the software facilitates either (a) the user-entity assigning to the databank-entity to own or represent a right to a mutually agreed portion of a profile; or (b) the user-entity accepting an assignment from the databank-entity to own or represent a right to a mutually agreed portion of a profile.

37. A Transaction of Profile Information Attributes databank-side software for use in a descriptive-profile mercantile method data-communications protocol operating at a juncture in a data-communications topology having associated therewith a maintained databank of profiles wherein the method includes the step of establishing a data rights contract agreement between a user-entity and a databank-entity for a royalty payment or a purchase-payment or a trade or a brokerage-payment, and in accordance with the agreement the software facilitates either (a) the databank accepting from the user-entity to own or represent a right to a mutually

agreed portion of a profile, and substantially thereafter the databank electronically incorporating the agreed portion; or (b) the databank assigning to the user-entity to own or represent a right to a mutually agreed portion of a profile, and substantially thereafter the databank electronically transmitting the agreed portion to the user-entity.

38. A maintained databank of partial profiles including therein a data-article selected from the list: a transacted partial profile according to claim 1, and a transacted attribute derived from using of a descriptive-profile mercantile method substantially as hereinbefore described and illustrated and said method operating at a juncture in a data-communications topology having associated therewith a maintained databank of profiles, the method including the steps of establishing a data rights contract agreement between a user-entity and a databank-entity, and in accordance with the agreement either (a) assigning to the databank-entity to own or represent a right to a mutually agreed portion of a profile, and substantially thereafter the databank-entity electronically incorporating the agreed portion; or (b) assigning to the user-entity to own or represent a right to a mutually agreed portion of a profile, and substantially thereafter the databank-entity electronically transmitting to the user-entity the agreed portion; where in said transaction is comprising using an electronic procedure on a computer attached to a data-communications topology wherein the procedure is facilitating, between two disjoint parties, a data exchange of said attributes by an accompanying pricing structure selected from the list: purchase, sale, trade, brokerage, and payment of royalties.

39. A maintained databank of partial profiles including therein a data-article selected from the list: a transacted partial profile according to claim 14, and a transacted attribute derived from using of a descriptive-profile mercantile method substantially as hereinbefore described and illustrated and said method operating at a juncture in a data-communications topology having associated therewith a

maintained databank of profiles, the method including the steps of establishing a data rights contract agreement between a user-entity and a databank-entity, and in accordance with the agreement either (a) assigning to the databank-entity to own or represent a right to a mutually agreed portion of a profile, and substantially thereafter the databank-entity electronically incorporating the agreed portion; or (b) assigning to the user-entity to own or represent a right to a mutually agreed portion of a profile, and substantially thereafter the databank-entity electronically transmitting to the user-entity the agreed portion; where in said transaction is comprising using an electronic procedure on a computer attached to a data-communications topology wherein the procedure is facilitating, between two disjoint parties, a data exchange of said attributes by an accompanying pricing structure selected from the list: purchase, sale, trade, brokerage, and payment of royalties.

ABSTRACT

A descriptive-profile mercantile method, for use at a juncture in a data-communications topology having associated therewith a maintained databank of partial profiles, is disclosed. The method includes the steps of: from a user, receiving a transaction having therein a first partial profile; using the first partial profile, searching a databank having a plurality of second partial profiles, wherein is included in said databank at least one null profile so that said searching will always yield at least one proximate second partial profile to the first partial profile; and between the user and the databank, contracting: (I) for the databank to own or represent a right to a first mutually agreed portion of the first partial profile, and substantially thereafter said databank incorporating the agreed portion of the first profile into at least one second partial profile; or (II) for the user to own or represent a right to a second mutually agreed portion of at least one said proximate second partial profile, and substantially thereafter the databank transmitting to the user the second mutually agreed portion of the second profile. The present invention operates best on a brokerage representation model; and thereby provides a means for making viable the economic commerce in information attributes.

I hereby declare that:

Each inventor's residence, mailing address, and citizenship are as stated below next to their name.

I believe the inventor(s) named below to be the original and first inventor(s) of the subject matter which is claimed and for which a patent is sought on the invention entitled:

A Descriptive-profile Mercantile Method

(Title of the Invention)

the specification of which

is attached hereto

OR

was filed on (MM/DD/YYYY)

as United States Application Number or PCT International

Application Number

and was amended on (MM/DD/YYYY)

(if applicable).

I hereby state that I have reviewed and understand the contents of the above identified specification, including the claims, as amended by any amendment specifically referred to above.

I acknowledge the duty to disclose information which is material to patentability as defined in 37 CFR 1.56, including for continuation-in-part applications, material information which became available between the filing date of the prior application and the national or PCT international filing date of the continuation-in-part application.

I hereby claim foreign priority benefits under 35 U.S.C. 119(a)-(d) or (f), or 365(b) of any foreign application(s) for patent, inventor's or plant breeder's rights certificate(s), or 365(a) of any PCT international application which designated at least one country other than the United States of America, listed below and have also identified below, by checking the box, any foreign application for patent, inventor's or plant breeder's rights certificate(s), or any PCT international application having a filing date before that of the application on which priority is claimed.

Prior Foreign Application Number(s)	Country	Foreign Filing Date (MM/DD/YYYY)	Priority Not Claimed	Certified Copy Attached?

This collection of information is required by 35 U.S.C. 115 and 37 CFR 1.63. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.11 and 1.14. This collection is estimated to take 21 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. **SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.**

If you need assistance completing the form, call 1-800-PTO-9199 and select option 2.

WARNING: Petitioner/applicant is cautioned to avoid submitting personal information in documents filed in a patent application that may contribute to identity theft. Personal information such as social security numbers, bank account numbers, or credit card numbers (other than a check or credit card authorization form PTO-2038 submitted for payment purposes) is never required by the USPTO to support a petition or an application. If this type of personal information is included in documents submitted to the USPTO, petitioners/applicants should consider redacting such personal information from the documents before submitting them to the USPTO. Petitioner/applicant is advised that the record of a patent application is available to the public after publication of the application (unless a non-publication request in compliance with 37 CFR 1.213(a) is made in the application) or issuance of a patent. Furthermore, the record from an abandoned application may also be available to the public if the application is referenced in a published application or an issued patent (see 37 CFR 1.14). Checks and credit card authorization forms PTO-2038 submitted for payment purposes are not retained in the application file and therefore are not publicly available.					
I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under 18 U.S.C. 1001 and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.

PRELIMINARY AMENDMENT

Dear Sir:

In consideration of this continuation application, assignee requests entry of the following amendments to the specification and consideration of the following remarks.

An amendment to the title is on page 2.

Amendments to the Specification begin on page 3.

Amendments to the Claims begin on page 4.

Remarks begin on page 5.

Amendments

IN THE TITLE:

Please amend the title as follows:

A Descriptive Profile Mercantile Method and Stored Program for Accumulating
Descriptive Profile Data Along with Source Information for Use in Targeting Third-
Party Advertisements

IN THE CROSS-REFERENCE TO RELATED APPLICATIONS SECTION:

Please amend the paragraph as follows:

~~This application is a continuation of application Ser. No. 09/593,993, filed 06/14/2000 and entitled A Descriptive Profile Mercantile Method, which itself claims priority from Israel Application No. 133,489 filed on 12/13/1999. The disclosures of said application and its entire file wrapper (included all prior art references cited therewith) are hereby specifically incorporated herein by reference in their entirety as if set forth fully herein. Furthermore, a~~This application is a continuation of application Serial No. 13/115,949, filed May 25, 2011, now U.S. Patent 8,244,582, which is a continuation of application Serial No. 12/186,918, filed August 6, 2008, now U.S. Patent 7,979,307, which is a division of application Serial No. 11/099,861, filed April 6, 2005, now U.S. Patent 7,428,493, which is a continuation of application Serial No. 09/593,993, filed June 14, 2000, now U.S. Patent 6,925,440, which claims priority to Israel Application No. 133,489, filed December 13, 1999. A portion of the disclosure of this patent document contains material, ~~which that~~ is subject to copyright protection. The copyright owner has no objection to the facsimile reproduction by anyone of the patent document or the patent disclosure, as it appears in the Patent and Trademark Office patent file or records, but otherwise reserves all copyright rights whatsoever.

IN THE CLAIMS:

1. (Original) A descriptive-profile mercantile method, for use at a juncture in a data-communications topology having associated therewith a maintained databank of partial profiles, the method including the steps of:

a) from an entity who owns or represents a right to multiple profiles, electronically receiving a transaction having therein a first partial profile of a single visitor to the entity, said transaction including real-time access to the single visitor wherein an identifier is recognized or placed on the single visitor;

b) using the first partial profile, electronically searching a databank having a plurality of second partial profiles, wherein is included in said databank at least one null profile so that said electronic searching will always yield at least one proximate second partial profile to the first partial profile;

c) i) between the entity and the databank, electronically contracting for a purchase- payment or a trade or a brokerage payment in exchange for the databank to own or represent a right to a first mutually agreed portion of the first partial profile, and substantially thereafter said databank incorporating the agreed portion of the first profile into at least one second partial profile; or

ii) between the entity and the databank, electronically contracting for a purchase-payment or a trade or a brokerage-payment in exchange for the entity to own or represent a right to a second mutually agreed portion of at least one said proximate second partial profile, and substantially thereafter the databank transmitting to the user-entity the second mutually agreed portion of the second profile.

2-39. (Cancelled)

REMARKS

Assignee cancels all but one claim from the parent application, to avoid excess claims fees and plans to file a Supplemental Preliminary Amendment as soon as possible to present new claims for prosecution in this application.

Please feel free to telephone the undersigned if it would in any way advance prosecution of this application.

Respectfully submitted,
ALMONDNET, INC.
by its attorney
